Excerpt from *Elements of Entomology*: An Outline of the Natural History and Classification of British Insects. Amongst the numerous works published on Entomology it appeared to the author that there was none which gave in a popular and readable form an outline of the principal groups into which Insects are usually divided. It was with the object of filling up this gap in our Entomological literature that the present little book was written. over the surface of the subject avoiding details as much as was consistent with giving a true picture of the principal phenomena of Insect life and with the view of bringing the subject home to his readers as closely as possible he has always endeavoured to select as examples of each group those common insects which occur almost everywhere About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
