Expression Of Historical Knowledge:

The Expression of Historical Knowledge J. L. Gorman, 1982-01-01 Historical Knowledge Susanna

Fellman, Marjatta Rahikainen, 2011-10-18 Historical Knowledge approaches the topic of historical knowledge in depth and from various angles. It seeks to offer theoretical and methodological building blocks for the use of anyone pursuing historical research. This book brings novel insights into classic and topical issues currently under debate: the importance of theory in historical thinking, the dialectic of text and annotation, the actor and observer levels, the relationship between the general and the individual, the issue of comparison and the problem of sporadic sources and of understanding the singularity of each one. The overall theme of the book, the possibility of historical knowledge, reflects the very issue that makes historical research distinctive: the challenges of evidence and the problems both concrete and conceptual with deciphering and interpreting remnants of the past. This book refreshes the discussion about sources and proper evidence, two issues that the linguistic turn and the postmodern challenge pushed into the background. The book addresses these issues in an easily accessible way and serves as an introduction and guide to the role of theory, method and evidence in historical research, not only for students and scholars of history but also for anyone outside the field with an interest in the topic. Historical Knowledge is the first book to include texts by the three eminent historians: Professors Natalie Zemon Davis, Carlo Ginzburg and Giovanni Levi. The other contributors, Professors Risto Alapuro, Janken Myrdal and Matti Peltonen, are active debaters in current theoretical and methodological discussion.

Understanding History Jonathan Gorman, 1992 Has any question about the historical past ever been finally answered? Of course there is much disagreement among professional historians about what happened in the past and how to explain it. But this incisive study goes one step further and brings into question the very ability of historians to gather and communicate genuine knowledge about the past. Understanding History applies this general question from the philosophy of history to economic history of American slaveholders. Do we understand the American slaveholders? Has the last word on the subject been said? Both the alleged profitability of slavery and the purported causes of the American Civil War are philosophically analyzed. Traditional narrative history and econometric history are examined and compared, and their different philosophical assumptions made explicit. The problem of justifying historical methodologies is first set in the wider context of the philosophical problem of knowledge, then lucidly explained and resolved along pragmatic lines. The novelty of Gorman's approach lies in its comparison of narrative with econometric history, its analysis of empathetic understanding in terms of cost-benefit analysis and its elucidation of the metaphysical presuppositions of empiricism. It stands out especially for the clarity, rigor and simplicity of its arguments.

Historical Knowledge in Biblical Antiquity, 2019-05-21 Fourteen essays by leading scholars: J. Neusner, B. D. Chilton, W. S. Green, L. H. Schiffman, A. J. Avery Peck, G. W. E. Nickelsburg, S. Mason, C. Dewald, M. Aviam, G. G. Porton ask two questions: What was the purpose of studying the past in biblical antiquity, and what sorts of information did the historians who produced Scripture in Judaism and Christianity seek in accomplishing their purpose?

Ancient Israelite and Greek historiography set the stage for a survey of how diverse Christian and Judaic writers defined the historical mission and carried it out. The Hebrew Scriptures, Gospels, Dead Sea scrolls, apocryphal and pseudepigraphic writers, Josephus, the Mishnah and the Talmuds all are asked to answer those questions. **Adapting Historical Knowledge Production to the Classroom** P.V. Kokkotas, K.S. Malamitsa, A.A. Rizaki, 2011-10-18. The aims of this book are to contribute to professional development of those directly involved in science education: science teachers, elementary and secondary science teacher advisors, researchers in science education etc. to contribute to the improvement of the quality of science education at all levels of education with the exploitation of elements from History of Science incorporated in science teaching. It is argued that through such approaches the students' motivation can be raised, their romantic understanding can be developed and consequently their conceptual understanding of science concepts can be improved since these approaches make science more attractive to them and to contribute to the debate about science education at the international level in order to find new ways for further inquiry on the issues that the book is dealing with. The book is divided in two parts. The first expounds its philosophical and epistemological framework and the second combines theory and praxis, the theoretical insights with their practical applications. *Futurology Express* Philip McShane, 2013-09-25. Envisages a population of collaborators, some with a knack for recovering the story of lost or overlooked ideas, others with a knack for visioning a better future and all bent towards cyclically radiating the light of timely ideas in markets, schools and town halls. *The Anatomy of Historical Knowledge* Maurice Mandelbaum, 2019-12-01. Originally published in 1977. In this major work, an overview of the structure of historical writing, Maurice Mandelbaum clarifies some of the problems concerning the nature of history as a discipline of what constitutes explanation in history and whether historical knowledge is as reliable as other forms of knowledge. The work is divided into three parts. The first part provides an analytic account of different types of historical inquiry. The second treats at length the nature of causal explanation in everyday life and in science and considers the relation between causes and laws. The final part analyzes the concept of objectivity and estimates both the extent to which the inquiries of historians can be said to be objective and the limits of that objectivity in some types of historical accounts. *Nation and History* Peter Brock, John D. Stanley, Piotr Wrobel, Piotr Wróbel, 2006-01-01. The important scholarly achievements of Polish historians remain largely unknown outside Poland. In *Nation and History*, editors Peter Brock, John Stanley and Piotr J. Wróbel have brought together twenty-four essays on Polish historians from the Enlightenment to the Second World War, an era of unparalleled changes in every aspect of Polish life. From the late eighteenth century until 1918, the Polish state was partitioned between its three neighbours: Russia, Prussia, Germany and Austria. Polish historiography throughout this period tended to focus on the reasons behind the old Polish state's decline and fall. This shaped Polish historians' vision of their country's past and created the burden of not only having to discuss the state but the issue of nation, its essence, its shape and its failure. The contributors to this volume from Poland and abroad closely examine the role played

by historians in both the documenting and shaping of Poland's history. While featuring different approaches, *Nation and History* serves as the most comprehensive work on Polish historiography written in English. *Aesthetic as Science of Expression and General Linguistic* Benedetto Croce, 2019-11-26. In *Aesthetic as Science of Expression and General Linguistic* Benedetto Croce undertakes a profound exploration of aesthetics through the prism of expression and language. Croce articulates a philosophy of art that emphasizes the intrinsic connection between aesthetic feeling and expression, setting his work apart in the early 20th-century discourse surrounding aesthetics and linguistic theory. His literary style combines rigorous argumentation with a lyrical prose that illuminates the nuances of sensory experience and its representation, resonating with contemporary movements towards formalism and symbolic interactionism. Croce's theoretical framework not only addresses the nature of art but also situates it within a broader context of cultural and emotional experience, marking a pivotal shift in the understanding of aesthetics. Benedetto Croce, an influential Italian philosopher, historian, and critic, drew upon his extensive background in philosophy and his engagement with the vibrant cultural milieu of early 20th-century Italy to craft this significant work. His ideas were shaped by the tumultuous political landscape of his time and his commitment to idealism, which informed his belief in the centrality of artistic expression to human experience. His life and writings reflect a deep engagement with the interplay of art, thought, and society, which is vividly encapsulated in this text. *Aesthetic as Science of Expression and General Linguistic* is essential for anyone seeking to deepen their understanding of aesthetics and its relevance to contemporary debates. Croce's insights challenge readers to reconsider the relationship between art, language, and perception, making it a vital resource for scholars, students, and enthusiasts of philosophy and the arts alike.

Chambers's Encyclopaedia, 1864. *History as a Science: The Philosophy of R.G. Collingwood* Jan van der Dussen, 1981-10-31. 1.1 COLLINGWOOD'S RECEPTION. Collingwood's scholarly reputation is a complicated and variegated affair. For one has not only to make a distinction between his reputation during his life and after his premature death in 1943 but also between his reputation as a philosopher and as an archaeologist and historian. Collingwood himself considered philosophy as his primary occupation and his work in archaeology and history as that of an amateur. This work, however, reached the highest standards, and his contributions to archaeology and history have always been appreciated accordingly. Though Collingwood's reputation as the main expert on Roman Britain in the period between the two wars remains unchallenged, modern developments in this field have inevitably superseded his contributions and made them primarily voices from a past period. Philosophy was the other half of Collingwood's scholarly life. In his own thinking, there was always a close relationship between philosophy and archaeological and historical practice. His interpreters have not always recognized this connection. I have met archaeologists who were surprised to hear that Collingwood was a philosopher as well, who either did not know that he had been a practising and philosophers' archaeologist and historian or thought it no more than a private hobby. Collingwood's reputation as a philosopher was very different from the one he gained in archaeology and history. For in

the philosophical climate at Oxford between the wars he was always an isolated figure

Herder's Hermeneutics Kristin Gjesdal, 2017-07-25 Through a detailed study of Herder's Enlightenment thought especially his philosophy of literature Kristin Gjesdal offers a new and sometimes provocative reading of the historical origins and contemporary challenges of modern hermeneutics She shows that hermeneutic philosophy grew out of a historical anthropological and poetic discourse in the mid eighteenth century and argues that as such it represents a rich stimulating and relevant engagement with the potentials and limits of human meaning and understanding Gjesdal's study broadens our conception of hermeneutic philosophy the issues it raises and the answers it offers and underlines the importance of Herder's contribution to the development of this discipline Her book will be highly valuable for students and scholars of eighteenth century thought especially those working in the fields of hermeneutics aesthetics and European philosophy

The Power of Historical Knowledge Susan L. Mizruchi, 2014-07-14 In this provocative study Susan Mizruchi argues that the act of writing history is the key to the political concerns of American novelists Using nineteenth century theories of history as well as recent narratological models she examines reconstructions of the past in *The House of the Seven Gables* 1851 *The Bostonians* 1886 *The Wings of the Dove* 1902 and *An American Tragedy* 1925 Her special focus allows us to see that the efforts on the part of characters and narrators alike to reshape the past reveal both anxieties about the self and larger struggles for political power Professor Mizruchi demonstrates the deepening connections between narrative and political coercion from Hawthorne to Dreiser whose novels as she further shows both incorporate and portray their characters incorporating the conditions of their contemporary worlds Her argument addresses a major contemporary dialogue on the subversive qualities of American texts and the place of history in literary interpretation Originally published in 1988 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

Historical Knowledge Production Cultures in Late Socialist Hungary and Croatia Réka Krizmanics, 2024-01-08 *Historical Knowledge Production Cultures in Late Socialist Hungary and Croatia* Expertise Unsettled offers a comparative study and analysis from the Hungarian case and integrating academic party and popular historiography into a single analytical framework Narratives concerning the history of the interwar period and the Second World War and circumstances of their elaboration are at the forefront of this study Réka Krizmanics argues that even within state socialist Eastern Europe different enabling and restrictive factors were at play and investigates the specificities of late socialism while embedding them in the context of their interwar Stalinist and post Stalinist legacies Expertise Unsettled refers to the growing peril of historians who proved to be often divided among themselves and were increasingly on the defense as a guild when literature cinema and

interested non professionals got involved in making and criticizing narratives of the recent past Party history and party historians have been often sidelined in intellectual history but the author argues that their inclusion is crucial both for a more complex understanding of what late state socialism meant for historians and to historicize practices of contemporary post socialist especially illiberal memory regimes

Systematic Theology: Volume Two Paul Tillich, 2013-12-27 The second volume of the eminent Christian philosopher's magnum opus in which he explores humanity's quest for Christ Paul Tillich's Systemic Philosophy is the most comprehensive and definitive presentation of his groundbreaking theological message his method of correlation which finds the answers to humanity's most urgent existential dilemmas in the principles of Christian revelation In volume two of this three volume work Tillich comes to grips with the central idea of his system the doctrine of the Christ Here Tillich describes the human predicament as the state of estrangement from ourselves from our world and from the divine Ground of Being This situation drives us to the quest for a new state of things in which reconciliation and reunion conquer estrangement This is the quest for the Christ

The Consumption of Inequality K. Halnon, 2013-09-18 The fads fashions and media in popular consumer culture frequently make recreational and ideological fun of poverty and lower class living In this book Halnon delineates how incarceration segregation stigmatization cultural and social consecration and carnivalization work in the production and consumption of inequality

Human Nature and Historical Knowledge Leon Pompa, 1990 This is a challenging book about the presuppositions of historical knowledge

Memory, History, Forgetting Paul Ricoeur, 2004-08-16 Firstly Paul Ricoeur takes a phenomenological approach to memory He then addresses recent work by historians by reopening the question of the nature and truth of historical knowledge Finally he describes the necessity of forgetting as a condition for the possibility of remembering

Seeing History: Public History in China LI Na, 2023-11-06 When public history was imported from the United States to China around the turn of the twenty first century it was introduced as a sub field within history and has developed along that path ever since Professional historians in China even some forward looking ones see public history as merely presenting a change in the patterns of participation in history making This book offers a sharply different view It contends essentially that public history represents more than a research domain within history or within any existing discipline nor does it fit into any established narratives but rather a fundamental change of the entire process of history making in China In this process the public is prosuming history Public history makes obsolete the old structure for building and acquiring historical knowledge it challenges the old assumptions supersedes the rigid academic hierarchy and stirs the imaginations of the multitudes With an assemblage of case studies this work makes a case for a system view of public history making or public history ing and launches a concept complex public history i e public history ing as complex adaptive systems

Foucault's Critical Philosophy of History Adam Takács, 2023-12-18 Foucault's Critical Philosophy of History Unfolding the Present provides a comprehensive interpretation of Foucault's work by focusing on its methodological procedural and epistemological elements Adam Takács

argues that despite all its thematic and analytical diversity Foucault's procedure can be understood within a unified framework based on the historical problematization of the present. This procedure, triggered by current social issues and aiming at a diagnostic screening of the present through a constructive exploration of the past, thus sets in motion not only a specific philosophical vision of history and a research practice often related to the procedures of historiography but also new ways of critical analysis of social phenomena. This book subjects all these elements to a systematic analysis, demonstrating that within this framework Foucault's often debated views on historical realism and constructivism, his methodological choices and ontological commitments take on a coherent profile culminating in a timely social critical project of liberation of knowledge and political subjectivation.
