

for a proper understanding of the monuments of Olympia and their history. This book so reduced in bulk and in a dark buckram binding would be a valuable travelling companion. These points, however, concern only the plan of the volume. The contents of a comprehensive work of this character can, of course, easily be criticised in its details. It is unfortunate that the author did not rewrite the chapter on the Heraion so as to do full justice to Dörpfeld's latest excavations there, which prove that this temple, once regarded as the oldest Greek temple, was built above the ruins of two previous temples, the earliest of which dates from the eighth century B.C. The author is a believer in the northern theory and brings Poseidon as well as Zeus from that religion whence also came a continuous movement of worshippers of the Sky God. He rejects Pausanias' statements about the authorship of the sculptures of the Temple of Zeus and would like to assign them to a native Elean school. He does not discuss the many solutions suggested for this problem, but a list of them in tabular form would have been useful. In dealing with the Great Altar of Zeus on p. 194

he might have referred back to p. 26, where he mentions the prehistoric remains formerly identified with this altar. The apsidal plan of the wings of the Bouleuterion might have been more fully treated and further references given, as, for instance, to the apsidal shrine of classical date of Corinth and to Buschor's belief that some of the early sanctuaries at the Acropolis at Athens also had an apse at one end. More attention might have been paid to minor details. We note mistakes like Dickinson for Dickins and Dittenberg for Dittenberger, while the spelling of Greek names, ancient and modern, seems inconsistent. Sometimes *opisthodomos* is used and sometimes *opisthodomē*, and *Hagios Johannes* shows two systems. It would have been better, e.g. on p. 140, to have used *Antigonos* throughout and to have avoided *Monophthalmos*. The footnotes require more revision, and when several books are quoted by their titles, e.g. on p. 28, the names of the authors should have been added. The illustrations are on the whole good, but several of the small line blocks in the text, e.g. Figs. 18 and 36, are not up to the standard of the Clarendon Press.

EXTERNAL EVIDENCE FOR INTERPOLATION IN HOMER.

The External Evidence for Interpolation in Homer. By GEORGE MELVILLE BOLLING. Pp. xii+259. Oxford: Clarendon Press. 21s. net. 1925.

MR. BOLLING'S aim is excellent. He bids us turn from vain disputing about origins to the tradition. What lines are shown by external witnesses (quotations, scholia, papyri, medieval manuscripts) to be post-Aristarchean, post-Zenodotean, post-Peisistratean? There he stops, since a sixth-century Athenian text is, in his view, the fountain-head: not a jot of earlier material, except what this included, 'seeped' into local texts. That view is disputable: the suggestion that the 'City' texts, for instance, were so called from the markets to which Alexandria exported them, not from their places of origin, is improbable (see Allen, *O. and T.*, pp. 283-296). But that is a detail not essential to B.'s argument.

Summarising his own earlier work, he

asks for definitive rejection, as post-Aristarchean, of some six score lines from the *Iliad*, some nine score from the *Odyssey*. Freed from these, he says, the vulgate of the *Iliad*, at any rate, contains all lines attested for the text of Aristarchus, and not one demonstrably unknown to him. That is impressive, whether we think with Mr. Bolling that the longer texts were killed by the professors, or with Mr. Allen that the Roman publishers are to be thanked. But when we hear that, with the cuts suggested, and no others, the vulgate will agree with Aristarchus 'line for line,' we grow uneasy. What if fresh papyri weakened the authority for other 'formulaic lines' than those now listed? Would they not go to swell the list? What if Γ389, a good line, well placed, and by no means so dispensable as e.g. Γ319, were yet found well attested in papyri? The absence or the presence

The External Evidence for Interpolation in Homer George Melville Bolling, 1925 **Homer: Odyssey Books VI-VIII**

Studies in the Text and Transmission of the Iliad Martin L. West, 2015-08-31 In den jahrzehntelangen Vorarbeiten zu seiner weltweit so beachteten Homerausgabe hat der Editor viele interessante und zugleich neue Details zur Textberlieferung gewonnen, die er nunmehr in einer Spezialmonographie zusammengefasst hat. Somit wird der Homerforscher in die neusten Ergebnisse zu Textproblemen in Homers Ilias eingeführt und bestimmte editorische Entscheidungen von West sind für den Fachmann klarer nachzuvollziehen.

Homeric Questions Gregory Nagy, 2009-03-06 A Choice Outstanding Academic Book. The Homeric Question has vexed Classicists for generations: Was the author of the Iliad and the Odyssey a single individual who created the poems at a particular moment in history? Or does the name Homer hide the shaping influence of the epic tradition during a long period of oral composition and transmission? In this innovative investigation Gregory Nagy applies the insights of comparative linguistics and anthropology to offer a new historical model for understanding how, when, where, and why the Iliad and the Odyssey were ultimately preserved as written texts that could be handed down over two millennia. His model draws on the comparative evidence provided by living oral epic traditions in which each performance of a song often involves a recomposition of the narrative. This evidence suggests that the written texts emerged from an evolutionary process in which composition, performance, and diffusion interacted to create the epics we know as the Iliad and the Odyssey. Sure to challenge orthodox views and provoke lively debate, Nagy's book will be essential reading for all students of oral traditions.

The Journal of Roman Studies, 1924 Includes section Notices of recent publications.

A New Companion to Homer Ian Morris, Barry B. Powell, 1997-02-01 This volume is the first English language survey of Homeric studies to appear for more than a generation and the first such work to attempt to cover all fields comprehensively. Thirty leading scholars from Europe and America provide short authoritative overviews of the state of knowledge and current controversies in the many specialist divisions in Homeric studies. The chapters pay equal attention to literary, mythological, linguistic, historical, and archaeological topics, ranging from such long-established problems as the Homeric Question to newer issues like the relevance of narratology and computer-assisted quantification. The collection, the third publication in Brill's handbook series *The Classical Tradition*, will be valuable at every level of study, from the general student of literature to the Homeric specialist seeking a general understanding of the latest developments across the whole range of Homeric scholarship.

The Seer and the City Margaret Foster, 2024-05-28 Seers featured prominently in ancient Greek culture, but they rarely appear in archaic and classical colonial discourse. A Life for Language Robert Anderson Hall, 1990-01-01 Leonard Bloomfield 1887-1949 was one of the greatest linguists of the twentieth century He devoted his entire life to a thorough going study of language its structure and its use summed up in masterly fashion in his book *Language* 1933 After his premature death at the age of 62 his work was at first acclaimed as an exemplary application of the scientific method to linguistics but then fell into unjustified neglect Now that the centenary of his birth has passed the time has come for the story of Bloomfield's life and work to be recounted in a biography Accordingly basing his discussion on all available materials including some information not accessible until recently Professor Hall has presented Bloomfield's life history in its intellectual and cultural setting This book is not only a biography but also a personal memoir in which Hall draws on his contacts with Bloomfield who was his teacher at Chicago and a senior colleague at Yale There emerges from this study a fuller picture than we have had heretofore presenting both Bloomfield's recognized achievement in establishing the study of language as a scientific discipline and the less known aspects of his character and of his personal life which in certain respects was very tragic and sad
