Extra Life Coming Of Age In Cyberspace:

Extra Life David Bennahum, 1999-10-08 Today's digital culture traces its roots to the 1980s when the first computer generation came of age. These original techno kids grew up with home brew programs, secret computer access codes and arcades where dedicated video gamers fought to extend their play by earning extra life. In that era of gleeful discovery driven by a sense of adventure and a surge of power, kids found a world they could master one few grownups could understand. In this fast paced real life tale set in the bedrooms, computer rooms and video arcades of the 80s, popular media chronicler David S. Bennahum takes readers back to his initiation into this electronic universe to his discovery of PONG at age five. We follow him from video game addiction, his Bar Mitzvah gift was an Atari 800 with 48K of RAM, to his ascent to master programmer with the coveted title of Super User in his high school's computer room. Bennahum reflects on how computers empowered him and his friends to create a world of their own. We see how their geekiness grounded in roleplaying, iterative thinking and systems analysis led to a productive social existence, the extra life they found on the other side of the screen. Hilarious, poignant and packed with little known computer lore, *Extra Life* is a grand digital adventure set against the background of the emerging information age.

Extra Life David S. Bennahum, 1998 Bennahum relates his experiences growing up with the new technology of the 1980s from PONG at age five to becoming a programmer, a Super User in high school. He reflects on how familiarity with technology, geekiness, role playing, iterative thinking and systems analysis led to a productive social existence. Jacket *Digital Play* Stephen Kline, Nick Dyer-Witheford, Greig De Peuter, 2003 A uniquely critical study of video gaming that blends perspectives from political economy, cultural studies and communications theory.

Consuming Youth Robert Latham, 2007-11-01 From the novels of Anne Rice to *The Lost Boys* from *The Terminator* to cyberpunk science fiction, vampires and cyborgs have become strikingly visible figures within American popular culture, especially youth culture. In *Consuming Youth*, Rob Latham explains why, showing how fiction, film and other media deploy these ambiguous monsters to embody and work through the implications of a capitalist system in which youth both consume and are consumed. Inspired by Marx's use of the cyborg vampire as a metaphor for the objectification of physical labor in the factory, Latham shows how contemporary images of vampires and cyborgs illuminate the contradictory processes of empowerment and exploitation that characterize the youth consumer system. While the vampire is a voracious consumer driven by a hunger for perpetual youth, the cyborg has incorporated the machineries of consumption into its own flesh. Powerful fusions of technology and desire, these paired images symbolize the forms of labor and leisure that American society has staked out for contemporary youth. A startling look at youth in our time, *Consuming Youth* will interest anyone concerned with film, television and popular culture. *Twisty Little Passages* Nick Montfort, 2005-02-11 A critical approach to interactive fiction as literature and game. Interactive fiction, the best known form of which is the text game or text adventure, has not received as much critical attention as have such other forms of electronic literature as hypertext fiction and the

conversational programs known as chatterbots *Twisty Little Passages* the title refers to a maze in Adventure the first interactive fiction is the first book length consideration of this form examining it from gaming and literary perspectives Nick Montfort an interactive fiction author himself offers both aficionados and first time users a way to approach interactive fiction that will lead to a more pleasurable and meaningful experience of it *Twisty Little Passages* looks at interactive fiction beginning with its most important literary ancestor the riddle Montfort then discusses Adventure and its precursors including the I Ching and Dungeons and Dragons and follows this with an examination of mainframe text games developed in response focusing on the most influential work of that era Zork He then considers the introduction of commercial interactive fiction for home computers particularly that produced by Infocom Commercial works inspired an independent reaction and Montfort describes the emergence of independent creators and the development of an online interactive fiction community in the 1990s Finally he considers the influence of interactive fiction on other literary and gaming forms With *Twisty Little Passages* Nick Montfort places interactive fiction in its computational and literary contexts opening up this still developing form to new consideration

Softimage Ingrid Hoelzl, Remi Marie, 2015-09-01 With today's digital technology the image is no longer a stable representation of the world but a programmable view of a database that is updated in real time It no longer functions as a political and iconic representation but plays a vital role in synchronic data to data relationships It is not only part of a program but it contains its own operating code the image is a program in itself Softimage aims to account for that new reality taking readers on a journey that gradually undoes our unthinking reliance on the apparent solidity of the photographic image and building in its place an original and timely theorization of the digital image in all its complexity one that promises to spark debate within the evolving fields of image studies and software studies

Maternal Subjectivity Ellen Toronto, 2023-09-28 In this book Ellen Toronto reveals the dissociation of maternal subjectivity from human experience and provides a psychoanalytic exploration of the non history of motherhood to make possible an understanding and appreciation of maternal worlds The persistent patriarchal order acknowledges the mother's

existence largely as a womb a bearer of children and although her role is essential in the service of the species we know very little of her story as a person The absent presence of the mother as an individual subject and collective ignorance about her experiences has constituted an existential trauma that is a trauma of non existence and it is only by revealing this dissociation Toronto argues that we can begin to excavate the stories of individual mothers as they have borne and raised the world s children and at last realise that the burdens they carry belong to us all As a fulsome account of the maternal perspective which draws from a variety of sources including historical research mythological stories and clinical case material this book will be significant for students of psychoanalysis feminism and history as well as psychoanalysts in training and in practice who seek a richer understanding of maternal being *Encyclopedia of New Media* Steve Jones,2002-12-10

Caring and Doing for Others Alice S. Rossi, 2001-05 From all sides we hear that Americans are becoming increasingly self absorbed and disconnected and that our interest in social and civic responsibility is on the decline A more encouraging profile emerges in this study of Americans at work at home with their families and in their communities The book is based on a national representative survey of more than 3 000 Americans aged 25 to 74 plus in depth interviews with adults drawn from the survey to find out what Americans mean by social responsibility The book explores the extent to which adults contribute time to caregiving social support and financial assistance to family members the time given to volunteer work and financial contributions to various causes charities and organizations and how these contributions are affected by job obligations A major focus is on age and gender differences which shows midlife to be a transitional time when civic activities increase as family obligations decline All told the study adds a hopeful new voice to the overwhelmingly negative debate about the current state of our civic and social lives
