On the Ocean Sir Barry Cunliffe, 2017-12-15 For humans the sea is and always has been an alien environment Ever moving and ever changing in mood it is a place without time in contrast to the land which is fixed and scarred by human activity giving it a visible history While the land is familiar even reassuring the sea is unknown and threatening By taking to the sea humans put themselves at its mercy It has often been perceived to be an alien power teasing and cajoling The sea may give but it takes Why then did humans become seafarers Part of the answer is that we are conditioned by our genetics to be acquisitive animals we like to acquire rare materials and we are eager for esoteric knowledge and society rewards us well for both Looking out to sea most will be curious as to what is out there a mysterious island perhaps but what lies beyond Our innate inquisitiveness drives us to explore Barry Cunliffe looks at the development of seafaring on the Mediterranean and the Atlantic two contrasting seas the Mediterranean without

a significant tide enclosed and soon to become familiar the Atlantic with its frightening tidal ranges an ocean without end We begin with the Middle Palaeolithic hunter gatherers in the eastern Mediterranean building simple vessels to make their remarkable crossing to Crete and we end in the early years of the sixteenth century with sailors from Spain Portugal and England establishing the limits of the ocean from Labrador to Patagonia The message is that the contest between humans and the sea has been a driving force perhaps the driving force in human history **On the Ocean** Barry W. Cunliffe, 2017

The story of the contest between humans and the sea played out in the Mediterranean and the Atlantic from early prehistory until AD 1500 **Freedom** Evaggelos Vallianatos, 2025-02-01 In this book Vallianatos paints a picture of freedom in Greek history and civilization Freedom for the Greeks he says has been like breathing air He documents how freedom gave birth to the great achievements of Greek civilization The Greeks repeatedly defeated large invading Persian armies in early fifth century BCE Those heroic victories secured Greek and Western civilization Modern Greeks also won over large Turkish forces in the 1820s thus establishing the independence of Greece In 1940 the Greeks defeated a large Italian army winning the first victory of WWII The result of the triumph of freedom especially in ancient Greece Vallianatos says was an explosion of light Civilization bloomed with the craftsmanship of the Bronze Age 3 100 BCE the poetry of Homer the Olympics democracy Aristotle and his invention of science technology theater the Parthenon gorgeous art and architecture and the cosmic Greek influence of Alexander the Great and the Antikythera computer of genius in the second century BCE These Greek achievements influenced the founders of the American Republic They are still important for clear thinking and inspiration in support of our democracy They guide us to family farming and citizen soldiers always commanded by civilians This book may attract readers the world over Classics scholars students and tourists About 22 000 of them visit the Parthenon every day These Parthenon lovers would be interested in this book which in addition to its global overview of Greek history includes a chapter explaining why the Parthenon has been the Soul of Greece Vallianatos argues that the Greeks are us They were reason and science as much as piety for the gods The Olympics celebrated Zeus The Athenians built the Parthenon to honor Athena daughter of Zeus The second century BCE Antikythera computer was designed to predict the eclipses of the Sun and the Moon both gods for the Greeks This book brings this intimate dimension of piety for the gods to the surface where it belongs This enables Vallianatos to retell Greek history as it actually happened In contrast many books about the Greeks ignore or malign Greek religion which distort the history and civilization of the Greeks *Ancient Geography* Duane W. Roller, 2015-08-27 Before Columbus there was Eratosthenes inventor of the discipline of geography as it is known today There was Alexander the Great the man who sought to reach the very ends of the known world and whose empire spanned three continents And there was Strabo author of the *Geographica* a 17 volume encyclopaedia of geographical knowledge which expounded the definition history and mathematics of geography In this the first major study of ancient geography and geographers to be published in English for over 60 years Duane W Roller offers a comprehensive
