Plant Genetic Resources B. S. Dhillon, 2005. The agricultural paradigm is already undergoing a shift in focus from food security towards nutritional quality. Horticultural crops, besides improving biological productivity and nutritional standards, also have enormous export potential. This group of crops, comprising fruits, vegetables, root and tuber crops, plantation crops, medicinal and aromatic plants, spices, and condiments, and ornamental crops, would constitute the core of any such agro-economic strategy. In addition to supplementing the economy and national food grid by providing fresh and processed fruits, vegetables, nuts, etc., horticultural crops also help to promote diversification. Depletion of plant genetic resources in areas of diversity at a rapid pace is a matter of global concern. This book profiles all scientific management aspects of the horticultural crop genetic resources, including their diversity, conservation, and sustainable utilization. It also addresses vital concerns regarding management of horticultural crop genetic resources from diverse perspectives and provides recommendations for action in certain areas of research that must be pursued with intensity. The publication would serve as a valuable comprehensive scientific reference for breeders, researchers, teachers, students, and policy makers in biology and agriculture.

The Eyes of the Fleet: An Analysis of the E-2C Aircraft Acquisition Options, 2002. The E-2C Hawkeye is the U.S. Navy's all-weather, carrier-based, airborne early warning (AEW) aircraft. Additional missions for which the E-2C is used include surface surveillance, coordination, strike, and interceptor control, search and rescue, guidance, and communication relay. It is an integral component of the carrier air wing. The basic E-2C model is a relatively old design, having joined the fleet in the early 1970s. However, it has been improved several times, and the most current version, the Hawkeye 2000 (HE2000), now in production, represents the fifth E-2C model. The current production model adds a sensor networking system known as cooperative engagement capability (CEC), which provides all members of the network, ideally all members of the carrier battle group, with a real-time combined radar identification, friend or foe (IFF) picture of the tactical air environment. Northrop Grumman Corporation (NGC) is under contract to deliver 21 of these aircraft to the Navy. The first of these aircraft was delivered in October 2001, and the final one is scheduled to arrive in 2006.
