Fa Lun Gong Chuang Shi Ren Li Hongzhi Ping Zhuan:

Qigong Fever David A. Palmer, 2007-03-27 Qigong a regimen of body breath and mental training exercises was one of the most widespread cultural and religious movements of late twentieth century urban China The practice was promoted by senior Communist Party leaders as a uniquely Chinese healing tradition and as a harbinger of a new scientific revolution yet the movement's mass popularity and the almost religious devotion of its followers led to its ruthless suppression In this absorbing and revealing book David A Palmer relies on a combination of historical anthropological and sociological perspectives to describe the spread of the qigong craze and its reflection of key trends that have shaped China since 1949 including the search for a national identity and an emphasis on the absolute authority of science Qigong offered the promise of an all powerful technology of the body rooted in the mysteries of Chinese culture However after 1995 the scientific underpinnings of qigong came under attack its leaders were denounced as charlatans and its networks of followers notably Falungong were suppressed as evil cults According to Palmer the success of the movement proves that a hugely important religious dimension not only survived under the CCP but was actively fostered if not created by high ranking party members Tracing the complex relationships among the masters officials scientists practitioners and ideologues involved in qigong Palmer opens a fascinating window on the transformation of Chinese tradition as it evolved along with the Chinese state As he brilliantly demonstrates the rise and collapse of the qigong movement is key to understanding the politics and culture of post Mao society
