Face Of Europe:

Britain Faces Europe Robert L. Pfaltzgraff, Jr., 2016-11-11 Transformations of thought among British foreign policy makers since World War II have motivated this new study For the first time in its history during the postwar decade Britain began to abandon its world power outlook and to turn toward a European consensus substituting regional interests for its global perspective The author asks How does a people so attuned to worldwide interests and commitments reconcile itself to such drastically altered circumstances as those that followed World War II How does a people that has historically viewed with hostility the unification of continental Europe develop as a top foreign priority participation in the European integration movement The book focuses on the response of the British Government to changing international and domestic forces including elite groups at home Britain Faces Europe is the first book to examine both the development of British policy and the evolution of attitudes in the British private sector toward European integration between 1957 and 1967 Drawing on public documents and interviews the author traces the movement of British policy toward a more European outlook Investigating publications of interest groups such as the National Farmers Union the Trades Union Congress the Confederation of British Industry and such Europe oriented groups as Federal Union and the United Kingdom Council for Europe the author traces the development of support for Common Market membership in the private sector Developing attitudes in representative British newspapers and journals and those of parliamentary parties are described Publications and statements of anti European organizations and public opinion polls are also examined Important elements of the study for all students and observers of world affairs are its examination of British expectations from European integration and its assessment of the British Common Market case from propositions about integration drawn from theoretically oriented literature The book is an innovation in approach in that other studies have focused almost exclusively on descriptions of official policy without major reference to either the private sector or theories of integration at the international level

HUMAN FACE FOR EUROPE. EUROPEAN COMMUNITIES. OFFICE FOR OFFICIAL PUBLICATIONS.,1990 U.S. *Imports for Consumption & General Imports* ,1965 U.S. Imports for Consumption and General Imports ,1969 A *Human Face for Europe* ,1990 U.S. Imports for Consumption and General Imports United States. Bureau of the Census,1966 Newer Islamic Movements in Western Europe Lars Pederson,2019-01-04 Published in 1999 this book analyses the development of the recent cultural trend represented by the newer Islamic movements among Muslim immigrants in Western Europe Included is a comprehensive description of the institutionalisation and organisation of Islam in Western Europe and an investigation of the organisation activities visions and strategies of the European and Islamic movements Particular attention is paid to the most important Islamist trend among the Turkish minorities Milli Gorus The empirical data is original and has been primarily collected through interviews with leaders of Islamic organisations in Denmark Berlin and Paris The Islamistic stress on the validity of Islam as constituting the basis of particular social and

cultural interest is analysed in the perspective of the concepts of life world and system world presented by Jurgen Habermas. The investigation demonstrates the existence of locally organised communities whose social and cultural interests are in need of representation. It is shown that Islamism constitutes a clear and concrete point of departure from a positive identification in the Muslim immigrant societies. This critical relevance of Islamism is discussed in the light of the social and economic marginalisation characterising the situation of the immigrated Muslim minorities in Western Europe. The main conclusion is that Islamism is a collective political representation of an alternative position to the dominant cultural and social marginalisation.

Annuaire Europeen 1999/European Yearbook 1999 Francis Rosenstiel, Edith

Lejard-Boutsavath, Jean-Jacques Martz, 2001-08-01. The European Yearbook promotes the scientific study of nineteen European supranational organisations and the Organisation for Economic Co-operation and Development (OECD). Each volume contains a detailed survey of the history, structure and yearly activities of each organisation and an up-to-date chart providing a clear overview of the member states of each organisation. Each volume contains a comprehensive bibliography covering the year's relevant publications. This is an indispensable work of reference for anyone dealing with the European institutions.

The European Defence Initiative Geoffrey Lee Williams, 1986-06-18. States and Regions in the European Union Tanja A. Börzel, 2002. Tanja Börzel argues that the effect of Europeanization on the politics and institutions of the EU's member states depends on the degree of conflict between European and domestic norms and rules. This book examines the relationship between the central state and regions in Germany and Spain, showing how Europeanization has served to weaken the powers of the regions. In both countries, the regions were forced to cooperate more closely with the centre, but the institutional impact in the two countries has been strikingly different. In Germany, the existing cooperative federal system was reinforced, but in Spain, the traditional competitive relationship between the levels of government could not continue. Europeanization has led to a significant change in the pattern of Spanish politics, turning rivalry into cooperation. This book thus presents an important analysis of the impact of Europeanization on domestic politics and on the relationship between states and regions in particular.

Reflections on Europe Dennis L. Bark, 1997. **The British political elite and Europe, 1959-1984** Bob Nicholls, 2019-01-06. This book offers an original interpretation of Britain's relationship with Europe over a 25-year period (1959-84) and advances the argument that the current problems over EU membership resulted from much earlier political machinations. This evidence-based account of the seminal period analyses the applications for EEC membership, the 1975 referendum, and the role of the press. Was the British public misled over the true aims of the European project? How significant was the role of the press in changing public opinion from anti to pro Common Market membership? Why, after over 40 years since Britain became a member of the European community, does the issue continue to deeply divide not only the political elite but also the British public? These and other pertinent questions are answered in this timely book on a subject
