the same kind of analysis as the others in the series with the understanding that here we are dealing with the history of interpretation rather than a substantive body of analysis of a certain aspect of the economy for example labor or international trade That understanding must be complex and subtle inasmuch as revision of interpretation of earlier ideas is part of the process both cause and consequence of re analyzing the economy In this group we are interested in how recent and contemporary writers have interpreted the history of economic thought differently both among themselves and from earlier writers
