Husserl's Constitutive Phenomenology Bob Sandmeyer,2009-01-11 If Edmund Husserl s true philosophy lay in his unpublished research manuscripts as he argues then it is in these rather than the introductions and fragmentary studies he published during his lifetime that we may possibly find a systematic of his philosophy This work constitutes a study of the full range of Husserl s writings with the special task of uncovering there the systematic presentation or presentations of the transcendental phenomenological problematic Sandmeyer s study contains an overview of Husserl s total set of writings a translation of Husserl correspondence with Georg Misch a translation of a draft outline of the system of phenomenological philosophy produced by Husserl in collaboration with his assistant Eugen Fink and it also closely traces the influence of Wilhelm Dilthey on Husserl s philosophy

The Fullness of the Logos in the Key of Life Anna-Teresa Tymieniecka, 2009-03-08 Lamentations over the disarray and disorientation in the philosophical

quest may be heard from all sides today The horizon of the All no longer beacons for our hope of attaining it seems ever to recede Yet challenging the mistrust of reason that pursuit is precisely engaged in what is undertaken here Our forty year elaboration of the onto-poiesis phenomenology of life as first philosophy phenomenology in its unravelling of the metamorphic deployment of the logos of life has laid the foundations for the retrieval of the metaphysical vision Here the classic concerns of philosophy are not negligently dismissed but are ciphered afresh in the light of innumerable perspectives and insights brought to philosophical attention in a New Enlightenment by advances in the sciences of life and of human apprehension Strikingly enough pursuit of the greatest enigma of all namely that of the All enhancing Divine is revived in the revelation that the logos informing life is the Fullness of God In the Fullness being revealed in the infinite intricacies of the operations of the Logos of Life we find the plenitude of God s experiencing man In times when the prevailing critique of reason casts aspersions on the quest for God through reason the full revelation of the logos brings to the entire human experience the infinities of God

Groundwork of Phenomenological Marxism Ian H. Angus, 2021-07-26 In *Groundwork of Phenomenological Marxism* Crisis Body World Ian H Angus investigates the crisis of reason in a contemporary context Beginning with Edmund Husserl s *The Crisis of the European Sciences and Transcendental Phenomenology* Angus connects the phenomenology of human motility to Marx s ontology of labor in *Capital* and shows its basis in natural fecundity excess He argues that the formalization of reason creates an inability to foster differentiated community as expected by both Husserl and Marx and that the formalization of human motility by the regime of value reveals the ontological productivity of natural fecundity showing that ecology is the contemporary exemplary science Addressing the crisis requires a philosophy of technology especially digital technology and a dialogue between cultural civilizational lifeworlds which surpasses Husserl s assumption that Europe is the home of reason Angus s overall conception of phenomenology is Socratic in that it is concerned with the presuppositions and applications of knowledge forms in their lifeworld grounding He further shows that the contemporary event is the epochal confrontation between planetary technology and place based Indigeneity This book lays out the fundamental concepts of a systematic phenomenological Marxian philosophy

The Concept of Time in Early Twentieth-Century Philosophy Flavia Santoian, 2015-11-26 This book presents a collection of authoritative contributions on the concept of time in early twentieth century philosophy It is structured in the form of a thematic atlas each section is accompanied by relevant elementary logic maps that reproduce in a spatial form the directionalities arguments and or discourses reported on in the text The book is divided into three main sections the first of which covers phenomenology and the perception of time by analyzing the works of Bergson Husserl Sartre Merleau Ponty Deleuze Guattari and Derrida The second section focuses on the language and conceptualization of time examining the works of Cassirer Wittgenstein Heidegger Lacan Ricoeur and Foucault while the last section addresses the science and logic of time as they appear in the works of Guillaume Einstein Reichenbach Prigogine and Barbour The purpose of the book is threefold to provide readers with

a comprehensive overview of the concept of time in early twentieth century philosophy to show how conceptual reasoning can be supported by accompanying linguistic and spatial representations and to stimulate novel research in the humanistic field concerning the complex role of graphic representations in the comprehension of concepts **Thinking After Europe** Francesco Tava, Darian Meacham, 2016-08-16 Jan Patočka perhaps more so than any other philosopher in the twentieth century managed to combine intense philosophical insight with a farsighted analysis of the idea and challenges facing Europe as a historical cultural and political signifier As a political dissident in communist Czechoslovakia he also became a moral and political inspiration to a generation of Czechs including Václav Havel He accomplished this in a time of intense political repression when not even the hint of a unified Europe seemed visible by showing in exemplary fashion how concrete thought can be without renouncing in any way its depth Europe as an idea and a political project is a central issue in contemporary political theory Patočka's political thought offers many original insights into questions surrounding the European project Here for the first time a group of leading scholars from different disciplines gathers together to discuss the specific political impact of Patočka's philosophy and its lasting significance **The New Yearbook for Phenomenology and Phenomenological Philosophy** Burt Hopkins, John Drummond, 2015-03-24 The New Yearbook for Phenomenology and Phenomenological Philosophy provides an annual international forum for phenomenological research in the spirit of Husserl's groundbreaking work and the extension of this work by such figures as Scheler Heidegger Sartre Levinas Merleau-Ponty and Gadamer **After Heidegger?** Gregory Fried, Richard Polt, 2017-11-08 This unique volume collects more than 30 new essays by prominent scholars on what remains philosophically provocative in Heidegger's thought His writings continue to invite analysis and application but particularly in the light of his political affiliations they must also be critiqued Philosophy today takes place after Heidegger in that his views should not be accepted naively and there are new issues that he did not address but also in that we continue to think in the wake of important questions that he raised The contributors to this volume ask questions such as What does it mean to think after Heidegger What is valuable in his early work on finite existence and in his early and late phenomenology What is the root of his political errors Are there still elements in his thought that can yield helpful political insights Should we emulate his turn toward releasement Can he help us understand the postmodern condition Readers will find thought provoking echoes and points of contention among these engaging and lively essays **Husserl** David W. Smith, David Woodruff Smith, 2006-10-19 In this stimulating introduction David Woodruff Smith introduces the whole of Husserl's thought demonstrating his influence on philosophy of mind and language on ontology and epistemology and on philosophy of logic mathematics and science Starting with an overview of his life and works and his place in twentieth century philosophy and in western philosophy as a whole David Woodruff Smith introduces Husserl's concept of phenomenology explaining his influential theories of intentionality objectivity and subjectivity In subsequent chapters he covers Husserl's logic metaphysics realism and transcendental idealism and epistemology Finally he

assesses the significance and implications of Husserl's work for contemporary philosophy of mind and cognitive science Including a timeline glossary and extensive suggestions for further reading Husserl is essential reading for anyone interested in this eminent philosopher phenomenology or twentieth century philosophy **Alef, Mem, Tau** Elliot R.

Wolfson,2006-04-05 Alef Mem Tau also discusses Islamic mysticism and Buddhist thought in relation to the Jewish esoteric tradition as it opens the possibility of a temporal triumph of temporality and the conquering of time through time

Phenomenology and Existentialism in the Twentieth Century Anna-Teresa Tymieniecka,2010-06-23 The discussion on the phenomenology of life will continue to be crucial to the general outlook and direction of phenomenological investigations The importance of it is not only the fact that it is an innovation in the philosophical circle but it is also an effort that contributes to the re-reading of the hitherto exaggerated differences between phenomenology and metaphysics What is new and significant about life is that even though it is evident in the flow of the history of philosophy no philosopher has seriously addressed it Not many philosophers have said something in particular about life in serious philosophical reflection The discussion on life by Henri Bergson attests to this and one can hardly point to other deep reflections elsewhere about the subject The advantage here about our area is not only that it has extended the horizon of phenomenological thinking it has also helped to lead phenomenology from the constitutive analysis to a creative impetus that has brought a new point of view to the field hence raising questions about the general philosophical tradition from ancient times This is a reading which my philosophy attempts to investigate about Tymieniecka's thought The emphasis in philosophy till now has been more on reason in its intellectual and pure rational dimension based on the earliest conception of the human person distinguished by rationality **Historical Dictionary of Husserl's Philosophy** John J. Drummond,2022-03-14 Edmund Husserl is generally regarded as the founding figure of the philosophical movement of phenomenology by which he understands a descriptive science of the essential structures of experiences and of their objects precisely as these are experienced Phenomenology has had a decisive influence on philosophy in the 20th century especially in Europe The movement known as continental philosophy whether practiced in Europe or elsewhere has its roots in phenomenology and in the post-Hegelian philosophies of Søren Kierkegaard Friedrich Nietzsche and Karl Marx Historical Dictionary of Husserl's Philosophy Second Edition contains a chronology an introduction and an extensive bibliography The dictionary section has more than 600 cross-referenced entries on his key concepts and major writings as well as entries on his most important predecessors contemporaries and successors This book is an excellent resource for students researchers and anyone wanting to know more about Edmund Husserl

Transcendental Idealism and Metaphysics Daniele De Santis,2023-10-19 Winner of the Edward Goodwin Ballard Prize as announced at the Society for Phenomenology and Existential Philosophy Meeting on September 27 2024 The book offers a systematic reconstruction of the disagreement between Husserl and Heidegger from the former's point of view but without falling into any form of Husserlian apologetics The main thesis is that Husserl's

critique of Heidegger's existential analytics as a form of philosophical anthropology entails a deeper fundamental thesis namely that Heidegger confuses the subject matter of first philosophy the transcendental subject with metaphysics in the Husserlian sense of the expression At stake in Husserl's critique of Heidegger's philosophy in *Being and Time* is the refusal to transcendentalize the irrational aspects of our human existence This second volume focuses on the question of being clarifying the distinction between ontology and metaphysics in Husserl's thought In fact contrary to a long standing and established interpretive tradition according to which Husserl's phenomenology is metaphysically neutral the book shows to what extent Husserl always understood as the ultimate goal of his philosophizing the positive foundation of a metaphysics This volume appeals to students and researchers
