Educated Mind How Cognitive Tools Shape Our Understanding:

The Educated Mind Kieran Egan, 2007-12-01 The Educated Mind offers a bold and revitalizing new vision for today's uncertain educational system. Kieran Egan reconceives education taking into account how we learn. He proposes the use of particular intellectual tools such as language or literacy that shape how we make sense of the world. These mediating tools generate successive kinds of understanding: somatic, mythic, romantic, philosophical, and ironic. Egan's account concludes with practical proposals for how teaching and curriculum can be changed to reflect the way children learn. A carefully argued and readable book. Egan proposes a radical change of approach for the whole process of education. There is much in this book to interest and excite those who discuss research or deliver education. Ann Fullick, *New Scientist*. A compelling vision for today's uncertain educational system. Library Journal. Almost anyone involved at any level or in any part of the education system will find this a fascinating book to read. Dr. Richard Fox, *British Journal of Educational Psychology*. A fascinating and provocative study of cultural and linguistic history and of how various kinds of understanding that can be distinguished in that history are recapitulated in the developing minds of children. Jonty Driver, *New York Times Book Review*. *Teaching and Mobile Learning* Flavia Santoianni, Corrado Petrucco, Alessandro Ciasullo, Daniele Agostini, 2022-01-31 Teaching and Mobile Learning Interactive Educational Design is a groundbreaking book which shows how to design innovative educational mobile learning environments to instructional designers, curriculum developers, and learning professionals. The book aims to solicit teachers, educators, and practitioners to adapt their teaching with the help of educational digital models related to mobile technologies. Mobile learning is a revolution in concepts like space, sound, production, and learning to get more and more customized, in always connected and ever-changing educational mobile learning environments. Researchers and academicians can be trained in cognition processes in learning management of mixed reality and virtual bodies. Mixed reality mobile technologies are becoming tools for education and training in mixed reality mobile learning. Readers of this book will understand how user and device innovative interactions are borderline with attention deficit disorder, digital amnesia, and information overload. The book develops educational knowledge on how to manage mobile technology and specific learning disorders to monitor the use of smartphones and technology tools and to empower their role in learning enhancement processes. **Cultivating Imagination in Leadership** Gillian Judson, Meaghan Dougherty, 2023 This comprehensive book provides a theoretical understanding of how imagination contributes to effective leadership as well as practical tools all educational leaders can employ to cultivate their imaginations and the imaginations of others in their communities. To support these goals, book chapters offer multiple perspectives on what imagination is, why it is essential for educational leaders, and how it can be developed. Contributions by leadership scholars and school-based leaders are organized around three themes: exploring possibilities, poetics of memory and imagination's role in social justice and equity. Each section opens with a leadership story that shows how a school leader developed and used imagination to create solutions to real problems. Contributors to this

volume were invited to read each other's work and share their questions and thoughts This work can now be used by individuals or within formal or informal learning communities to expand deepen and apply concepts Expanding on Kieran Egan's theory of Imaginative Education this book will help current and future leaders employ imagination to make sense of and address the day to day challenges they encounter Book Features Brings together empirical and conceptual research on imagination's varied roles in educational leadership Provides practical strategies and implementable techniques for cultivating leadership imagination Demonstrates what cognitive tools all leaders can use to deepen their understanding of issues to emotionally and imaginatively engage their school communities and to support equity diversity and inclusion Offers easy to use activities and guidelines for applying imagination to key leadership processes and practices Includes Cultivating Curiosity Conversation and Imagination sections at the end of chapters to stimulate individual reflection and collaborative discussion Contributors Laurie Anderson Sean Blenkinsop Lori Driussi Lynn Fels Mark Fettes James W Koschoreck Dan Laitsch Craig Mah Jessica Masterson Moraimo Machado Sarah Pazur Rose Pillay Tara Preston Courtney Robertson Jonathan Sclater Karen Steffensen Katie Strom Zachary D Thomas and Kara Mitchell Viesca

Getting it Wrong from the Beginning Kieran Egan, 2002-01-01 The ideas upon which public education was founded in the last half of the nineteenth century were wrong And despite their continued dominance in educational thinking for a century and a half these ideas are no more right today So argues one of the most original and highly regarded educational theorists of our time in *Getting It Wrong from the Beginning* Kieran Egan explains how we have come to take mistaken concepts about education for granted and why this dooms our attempts at educational reform Egan traces the nineteenth century sources of Progressive thinking about education and their persistence even now He diagnoses the problem with our schools in a radically different way and likewise prescribes novel alternatives to present educational practice His book is both persuasive and full of promise a book that belongs on the must read list for anyone who cares about the success of our schools

Fostering Imagination in Higher Education Joy

Whitton,2018-04-24 Imagination and creative teaching approaches are increasingly important across all higher education disciplines not just the arts Investigating the role of imagination in teaching and learning in non arts disciplines this book argues that a lack of clarity about what imagination looks like in higher education impedes teachers in fostering their students creativity Fostering Imagination in Higher Education tells four ethnographic stories from physics history finance and pharmaceutical science courses analytically observing the strategies educators use to encourage their students imagination and detailing how students experience learning when it is focussed on engaging their imagination The highly original study is framed by Ricoeur s work on different forms of imagination reproductive and productive or generative It links imaginative thinking to cognitive science and philosophy in particular the work of Clark Dennett and Polanyi and to the mediating role of disciplinary concepts and social cultural practices The author s discussion of models graphs strategies and artefacts as tools for taking learners thinking forward has much to offer understandings of pedagogy in higher education Students in these case studies learned to create themselves as knowledge producers and professionals It positioned them to experience actively the constructed nature of the knowledge and processes they were learning to use and the continuing potential of knowledge to be remade in the future This is what makes imaginative thinking elemental to the goals of higher education

An Integrative Habit of Mind Frederick D. Aquino,2012-05-15 Searching for better ways to inspire people to pursue wisdom Frederick D Aquino argues that teachers and researchers should focus less on state of the art techniques and learning outcomes and instead pay more attention to the intellectual formation of their students We should Aquino contends encourage the development of an integrative habit of mind which entails cultivating the capacity to grasp how various pieces of data and areas of inquiry fit together and to understand how to apply this information to new situations To fully explore this notion An Integrative Habit of Mind brings the work of the great religious figure and educator John Henry Newman into fruitful conversation with recent philosophical developments in epistemology cognition and education Aquino unearths some crucial but neglected themes from Newman s writings and carries them forward into the contemporary context revealing how his ideas can help us broaden our horizons render apt judgments and better understand our world and how we think about it

Language, Feeling, and the Brain Daniel Shanahan,2017-09-08 Linguistic theory since the Cognitive Revolution has followed one of the premises of that revolution by largely sidelining the issue of emotions and concentrating on those aspects of language that are more strictly cognitive However during the last ten years research in cognitive science especially in neuropsychology has begun to fill in the gaps left by the exclusion of emotions from cognitive research The work of those like Oatley Zajonc Damasio and LeDoux to name a few has demonstrated both that it is possible to construct models of how emotions play into the workings of the psyche and that they are necessary in giving us a balanced view of the human mind Language Feeling and the Brain attempts to apply the fruits of this new research in emotion to our understanding of language itself Building on Karl Pribram s integrated model of emotions and motivations the book takes an eclectic approach

to explaining how emotions contribute to the nature of language drawing on research done in neuropsychology philosophy cognitive linguistics anthropology and related fields Its aim is to construct a propositional model for how the emotions may have contributed to the emergence of symbolic formation most especially in the forms of gesture and speech and how identifying that emotional influence sheds new light on everything we have had to say about language itself from lexis and grammar to culture and literature **The Oxford Handbook of Sport and Performance Psychology** Shane M.

Cultivating an Ethical School Robert J. Starratt, 2012-04-27 Often the school is left as an institution seemingly ethically neutral leaving untouched questions about whether the school itself is a site of injustice toward both educators and children Springing from his well known Building an Ethical School Robert J Starratt now looks more closely at the educational leader s responsibility to ensure that the whole fabric of the educational process reflects an ethical philosophy of education Starratt argues that the work of educating young people is by its very nature an ethical work as well as an intellectual work and that this work inescapably engages educators and their pupils with an academic curriculum a social curriculum and a civic curriculum Cultivating an Ethical School lays a foundation for educators seeking to cultivate a comprehensive ethical educating environment The second half of the book then takes up the more specific perspectives on teaching and learning that constitute the heart of cultivating an ethical school Starratt provides examples of how an ethical school can expose students to a variety of perspectives on the challenges they will be called upon to face in the worlds of culture nature and society This valuable book shows leaders and educators the importance of organizing a curriculum and a pedagogy that simultaneously respect and cultivate the intellectual personal and social qualities of being human

Making Sense David R. Olson, 2022-05-05 Understanding as Descartes Locke and Kant all insisted is the primary faculty of the mind

yet our modern sciences have been slow to advance a clear and testable account of what it means to understand of children's acquisition of this concept and in particular how children come to ascribe understanding to themselves and others. By drawing together developmental and philosophical theories, this book provides a systematic account of children's concept of understanding and places understanding at the heart of children's theory of mind. Children's subjective awareness of their own minds of what they think depends on learning a language for ascribing mental states to themselves and others. This book will appeal to researchers in developmental psychology, cognitive science, education, and philosophy who are interested in the cognitive and emotional development of children and in the more basic question of what it means to have a mind.

The Imagination in Education Sean Blenkinsop, 2009-01-14

This collection of essays from scholars in eleven countries centres upon the theory and practice of the use of imagination in education. By bringing together studies covering a wide range of subject matter, we trust that the reader will have the opportunity to appreciate both the diversity within the field and the significance of the topics discussed. We hope too that readers will find connections to their own areas of study. The 13 essays present distinct yet converging points of view, whether it be a discussion of the imagination as a virtue, the use of imagination as a means to improve aboriginal education in Northern Canada, or the description of a museum in Brazil in which the imagination of the child is central to the project. Separately, each of the papers identifies and explores a distinct aspect of Imaginative Education; together, they begin to define the breadth and richness of the field. These essays have been selected from papers presented over a period of several years to research symposiums in imagination and education held every summer in Vancouver, Canada, under the auspices of the Imaginative Education Research Group in the Faculty of Education at Simon Fraser University.
