*Education for Peace* ASCD 1973 Yearbook Committee, 1973-01-01      *Resources in Education*, 2001-10      **Research in Education**, 1973-12      Exploring Betty A. Reardon's Perspective on Peace Education Dale T. Snauwaert, 2019-05-15 This book presents commentaries by a leading international group of peace education scholars and practitioners concerning Reardon's peace education theory and intellectual legacy. The guiding question throughout the book is: How can her foundational work be used to advance the theory and practice of peace education? In an attempt to find answers, the contributing authors explore three general areas of inquiry: 1. Theoretical Foundations of Peace and Human Rights Education; 2. Feminism and the Gender Perspective as Pathways of Transformation Toward Peace and Justice; and 3. Peace Education Pedagogy and Practices. A contemplative commentary by Reardon herself rounds out the coverage.      Routledge International Companion to Education Miriam Ben-Peretz, Sally Brown, Bob Moon, 2004-04-28 The Routledge International Companion to Education addresses the key issues underpinning the rethinking and restructuring of education at the beginning of the new millennium. The volume contains over fifty major contributions exploring a wide range of issues including philosophy of education, the economics and resourcing of education, testing and assessment, current issues and future prospects, standards, multiculturalism, anti-racism, computers in classrooms, mother tongue education, civics and moral education. Each chapter gives a contemporary account of developments in the field and looks to the future and the directions that new activity and inquiry are likely to take. All the chapters are written from an international perspective.      **Human Rights and World Public Order** Myres Smith McDougal, Harold Dwight Lasswell, Lung-chu Chen, 2019 As a classic text of the New Haven School of International Law, this book explores human rights and international law in the broadest sense, taking into account social sciences research while embracing all values secured or consequently fulfilled or needed to thus be achieved. The re-issuance of this venerable title unveils this work to a new generation of scholars, students and practitioners of international law and human rights.      INTRODUCTION TO HUMAN RELATIONS STUDIES George Henderson, Wesley C. Long, 2016-07-01 This book is based on the authors' experiences as professors of human relations and community activists at the University of Oklahoma, which has the largest degree-granting human relations program in the United States. The specific objectives of this book are to prepare students to work for the provision of equal opportunities for minority groups and women; develop skills pertaining to leadership, communication, group and organizational behaviors by the analysis of behavioral science data; and to function responsibly in situations where conflict and tension call for coordination of interpersonal, intergroup and organizational efforts. The programs discussed in this book were designed to provide participants with opportunities to gain self-insight, knowledge of moral and ethical codes of behaviors, as well as group dynamics, communication skills and cognitive tools used to diagnose problems and select the appropriate strategies for change. Unique features include historical and current human relations problems and strategies, interdisciplinary approaches to the creation

and development of human relations programs an educational approach to the ways of supplementing and complementing relevant issues emphasis on social justice and equity and the similarities and differences among and between culturally different people Several articles and essays that illustrate a few of the issues that concerned professional helpers may be involved in are included Special attention is given to the consequences of unequal educational economic political and social opportunities for some of our nation s citizens This book will be a valuable tool for students who are enrolled in their first courses pertaining to professional helpers teachers licensed therapists counselors business managers human service practitioners and community organizers

**Educating for Peace** Lokanath Mishra,2013-05-20 We know that peace education helps individuals transform conflict in their own lives understand and respect other cultures and ways of living and treasure the Earth Teachers of peace education encourage their students to cooperate with each other think critically solve problems constructively take part in responsible decision making communicate clearly and share their feelings and commitment openly These skills and values are essential for survival in an increasingly interdependent world where violence has become an instrument of policy Peace education seeks to enable learners to envision a range of possibilities that could lead from a culture of war and violence to a culture of peace One widely used method to encourage such envisioning is posing an inquiry into the characteristics of peace Efforts are being made to educate students and teachers about non violence and human rights via peace education programs This book lays a foundation for students teachers and peace educators to explore the elements necessary to create a peaceful society Educating for Peace will help to build a peaceful just and sustainable world for our children Educating for Peace consists of seventeen chapters Chapter one deals with the pro motion of education for a peaceful society chapter two details how to emphasise the importance of peace to children Chapter three of this book sketches out peace education in a non formal way while chapter four deals with education for peace and non violence The following chapter clearly defines the conceptualization of peace education Chapter six defines what exactly a culture of peace entails while chapter seven deals with a research study on non violence Chapters eight and nine address pressing concerns in peace education and creating a violence free school respectively Chapters ten and eleven deal with the role of value education for world peace Chapter twelve deals with pedagogical approaches and chapter thirteen defines human rights education The remaining chapters deal with different aspects of peace education This book is an attempt to identify and deliberate on topics that should be addressed if we are to fully establish peace education This book is written mainly for researchers peace educators and students      Education for Peace ,1973      **How Educational Ideologies Are Shaping Global Society** Joel

Spring,2014-04-08 In this book Joel Spring explores three major international educational ideologies that are shaping global society neo liberal educational ideology human rights education and environmentalism Neo liberal ideology reflects a rethinking of nationalist forms of education as the nation state slowly erodes under the power of a growing global civil society Traditional nationalist education attempts to mold loyal and patriotic citizens who are emotionally attached to symbols of the state whereas the goal of neo liberal educational ideology is to change nationalist education to serve the needs of the global economy These changes are fueling a clash between the ideas of free market and consumer based neo liberals and those of human rights and environmental educators Human rights education is concerned with creating activist global citizens It is rooted in the idea that inherent in human rights doctrines is a collective responsibility to ensure the rights of all

people Environmentalism is the most radical of the ideologies because it rejects the industrial and consumerist paradigm that has dominated most economic thought including capitalism and communism Spring synthesizes and analyzes the effect of these educational ideologies on shaping the future of the global society In the concluding section he compares the effect of these ideologies on global society with the possibility of a world divided between conflicting civilizations How Educational Ideologies Are Shaping Global Society Intergovernmental Organizations NGOs and the Decline of the Nation State features a critical exploration of the transition of schooling from a function of the nation state to a globalized economic and political system a discussion of the major organizations and trading blocs shaping the future globalization of educational policies an analysis of the major competing global ideologies of education including national and corporate models that emphasize training workers for a competitive global free market the worldwide network of human rights and peace educators who are teaching a global set of ethics and the environmental movement s efforts to create a common set of educational standards for sustainable development and sustainable consumption and an exploration of the possible future of global educational policy and school organizations By integrating a wide range of previously scattered information within a bold new framework for understanding educational ideologies and their impact on the global society Spring raises important questions for researchers professionals and students in history and philosophy of education educational policy educational studies comparative education multicultural education curriculum studies critical media studies global studies human rights education and related areas

Encyclopedia of Violence, Peace, and Conflict ,1999-08-16 The Encyclopedia of Violence Peace and Conflict a three volume set written by more than 200 eminent contributors from around the world takes advantage of increasing worldwide awareness in the public private commercial and academic sectors about manifestations of violence in all segments of society While the contributors do not use these volumes to make specific arguments they do describe and clarify the developments in thought that have led to current theories about and positions on violence and peace Our reviewers consistently note that while many in depth studies of war peace and aggression exist the attendant specialization keeps scholars from learning about related fields No publication competing with the Encyclopedia of Violence Peace and Conflict can satisfy their need for a vast introductory work to such a diverse and socially important field This major work includes more than 190 multidisciplinary articles with over 1 000 cross references and more than 2 000 bibliography entries for further reading which are arranged alphabetically for easy access More than 190 multidisciplinary articles with over 1 000 cross references Article outline and glossary of key terms begin each article Entries arranged alphabetically for easy access Three volume set with subject index of over 750 entries Articles written by more than 200 eminent contributors from around the world

Educating for Humanity Neil Tucker,2025-03-11 This book explores the international landscape of educational scholarship policy and practice Tucker argues there is a fundamental aim for world education It is to educate complete human beings in all their dimensions such that they become the best persons they can be and participate fully in

the human story Tucker asks What is the world of education for What is it that early childhood centers schools and local communities are meant to do for children and their learning Representing a decade of research the text examines the most common concepts of the purposes of education human nature and learning offered by scholars international authorities and pedagogies nations education organizations neuroscience early childhood educators and individual schools To educate for humanity Tucker provides a complete concept of holistic education of whole child and holistic learning for a whole world The book is an essential resource for those involved in the world of education teachers university administrators school authorities policy makers and educational organizations Parents and community members with a strong interest in the education of all children will also find much that is informative and challenging to think about **Human Trafficking**

Marie Durham, 2012-11-29 We all feel the pull that innate knowing that we were put here on this earth for some important purpose greater than ourselves But how can we realize that calling in a world that seems so utterly broken and in perpetual turmoil How can one person make a difference How do we help others when overcoming our own personal problems seems so overwhelming It is simply by rediscovering our connectedness through community participation that both our inner and outer worlds begin to transform The Gifts of Community reveals the mutual path to personal and community development a path that has been well hidden behind cultural messages of competition and self preservation By sharing your gifts with others you are gifted with all that you have felt has been missing in your life You grow as a person realize your dreams develop your talents and meet your soul partners And as you realize this potential and begin to think in the mindset of community the world around you will change for the better as well Community is a grand scale gift exchange As you give good to others good comes back to you Departments of Labor, Health and Human Services, Education, and Related

Agencies Appropriations for 1999 United States. Congress. House. Committee on Appropriations. Subcommittee on the Departments of Labor, Health and Human Services, Education, and Related Agencies, 1998 *Human Rights Education and the Politics of Knowledge* Joanne Coysh, 2017-02-24 Around the world there are a myriad of NGOs using human rights education HRE as a tool of community empowerment with the firm belief that it will help people improve their lives One way of understanding these processes is that they translate universal human rights speak using messages and symbols which make them relevant to people s daily lives and culturally resonant However an alternative more radical perspective is that these processes should engage individuals in modes of critical inquiry into the ways that that existing power structures maintain the status quo and control not only how we understand and speak about social inequality and injustice but also act on it This book is a critical inquiry into the production distribution and consumption of HRE and how the discourse is

constructed historically socially and politically through global institutions and local NGO practice The book begins with the premise that HRE is composed of theories of human rights and education both of which are complex and multifaceted However the book demonstrates how over time a dominant discourse of HRE constructed by the United Nations institutional framework has come to prominence and the ways it is reproduced and reinforced through the practice of intermediary NGOs engaged in HRE activities with community groups Drawing on socio legal scholarship it offers a new theoretical and political framework for addressing how human rights pedagogy knowledge and power can be analysed between the global and local by connecting the critical but well trodden theories of human rights to insights on critical pedagogy It uses critical discourse analysis and ethnographic research to investigate the practice of NGOs engaged in HRE using contextual evidence and findings from fieldwork with NGOs and communities in Tanzania Sourcebook of the World's Religions Joel

Beverluis,2011-02-08 Now in its third edition this is the most comprehensive work available on the rich variety of paths available to today s spiritual seekers More than an academic reference it explores how religions can collaborate to help the world Essays exploring the realm of building an interfaith community add to the book s detailed portraits of the major religious traditions The Sourcebook also contains essays on spiritual practices as diverse as theosophy wicca and indigenous religions This revised edition of the Sourcebook offers an unparalleled look at where spirituality is headed in the coming millennium
