Education State Formation Pr:

Education and State Formation A. Green, 2013-10-23 Education has always been a key instrument of nation building in new states National education systems have typically been used to assimilate immigrants to promote established religious doctrines to spread the standard form of national languages and to forge national identities and national cultures They helped construct the very subjectivities of citizenship justifying the ways of the state to the people and the duties of the people to the state In this second edition of his seminal and widely acclaimed book on the origins of public education in England France Prussia and the USA Andy Green shows how education has also been used as a tool of successful state formation in the developmental states of East Asia While human capital theories have focused on how schools and colleges supply the skills for economic growth Green shows how the forming of citizens and national identities through education has often provided the necessary condition for both economic and social development

Education and State Formation

Andy Green, 2016-07-27 Britain was the last major European state to create a national education system and is set to be the first to dismantle it In this wide ranging comparative study Andy Green examines the reasons for the uneven development of public education in England Prussia France and the USA

New State Formations in Education Policy

Laura Engel, 2009-01-01 New State Formations in Education Policy Reflections from Spain explores globalization shifting state spaces and education in relation to a diverse set of processes including democratization decentralization and Europeanization The book offers a unique perspective on education policy formation in the modern nation state in which education policy makers have to take into account and negotiate not only pressures related to devolution and regionalization but also policy ideas emanating from the developing European agenda and notions circulating within the global space In this way education policy concepts are not only formed in relation to national regional dynamics but are influenced more broadly by a complex set of supranational and global considerations While the book focuses on Spain this study reflects the growing influence of globalization on national systems of education The book therefore will be of interest to those engaged in studies of globalization and education and those with an interest in the contemporary political cultural and educational context of Europe

Building a New Educational State Joan Malczewski, 2016-11-30 Joan Malczewski investigates the relationship in postwar America between northern philanthropies and southern states exploring how education reform did or did not come about and by extension how state and local systems developed in response Highly attuned to foundations limitations in this time Malczewski focuses on the ways that the state as an actor enabled or inhibited different foundation initiatives She zeroes in on Mississippi and North Carolina which had different objectives and thus had distinct relationships with northern foundations These state responses illuminate the interrelationships among institutions with varying capacities to set agendas or to effect or resist change
