Math&Brain Ibrahim Mat Nor, 2009-10-20 Learning should be fun and easy with the right methods and creativities By harnessing all the experiences with some advice from the professionals I think Math Brain can help others to learn faster and create your own attitude of learning and thinking Math Brain are the combination of simplicity conceptual creativity and the free way of thinking in finding a solution By boosting our ability in memorizing at the same time developing creativity in finding solutions in learning process will grows very quickly By keep a strong understanding in concept we will be able to create more creative solutions to the same problems While looking to the problems in different ways make us easily understand which solutions will be the best The same concept can be applied to any problems that we faced in our daily life Creative thinking will be one of the most powerful tools to help us succeed in whatever we do since it will allow creating the effective solutions

Mathematical Psychology Norbert Schwarzer, 2024-11-28 A drawback of standard approaches to try and understand the world of feelings such as love hate fear and anger plus consciousness via quantum concepts results from the old problem that Quantum Theory does not appear to be fully compatible with Einstein s General Theory of Relativity To overcome these difficulties we explicitly tried to avoid pushing any existing theory into the comprehension of the human mind and all its derivatives On the assumption that everything including consciousness may consist of attributes or properties and subjecting them to a general Hamilton extremal principle we surprisingly ended up in generalized Einstein field equations with the whole ensemble having the characteristics of a Quantum Gravity Theory The field of psychology has lacked a unified theory to support phenomenological observations until now and it took a mathematical physicist to find it With example concepts of group think and quantum gravity based human thought processes given among many more it provides a basis for understanding and mitigating and potentially even preventing socioeconomic debt cycles and war and it shows why love can become the black hole in a universe of feelings

Manifestation Math Thoughts + Choices + Actions = Your Life Richard Spitzer, 2018-08-30 For over 2 000 years philosophers teachers scientists and everyday people have been interested in manifestation and attraction concepts And now science and quantum physics support many of the original observations about how people are connected to the vast universe of energy and information But how can we update the centuries of wisdom to a modern practical and usable manifestation process to achieve our individual goals Richard used his research expertise to analyze the historical teachings and the everyday evidence to create a new practical manifestation concept with simple to use practices If you believe that you are what you think and attract what you think about there is now a process to manage your thoughts choices and actions to achieve your goals We see the evidence of successful manifestation all around us people achieving their goals every day Manifestation has three stages thoughts process outcomes We can easily observe the original thoughts and the eventual outcomes But what happens in the middle to create a successful outcome What is the formula for success Richard has reverse engineered manifestation we can observe and filled in the steps that have been missing for how to transform thoughts into successful outcomes Every thought does not become your reality But there is a process and math based goal to achieve the critical balance of positive thoughts to negative thoughts to enter the successful manifestation zone Its almost that simple if you have the right guidance and a way to monitor to your progress Manifestation Math is a practical simple process to manifest goals using the basic math of the universe As Willie Nelson said if you replace negative thoughts with positive thoughts you will have a positive result Manifestation Math has created a simple process to bring this wisdom to everyone
