**Educating the Majority** Carol Pearson, Donna L. Shavlik, Judith G. Touchton, 1989      **The Rise of Women in Higher Education** Gary A. Berg, 2019-11-28 The story of the American university in the past half century is about the rise of women in participation as students faculty members college athletes and in subsequently changing the overall university culture for the better Now almost sixty percent of the overall college student population in America is female and still growing By the year 2000 women surpassed men worldwide in attendance at higher education institutions At the same time after years of a disproportionate dominant male professoriate female faculty members are now becoming the majority of university professors While top university presidents are still largely male women have achieved real gains in the overall administrative ranks and trustee positions In all areas of the university disparities still exist in terms of compensation and balance in key areas of the academy but the overall positive trend is clear Few to this date have recognized and chronicled this extraordinary change in college education one of society s fundamental and influential institutions For universities the test for the future is to make the changes needed in broad areas within higher education from financial aid to curriculum student activities and overall campus culture in order to better foster a newly empowered majority of women students      *Challenged by Coeducation* Leslie Miller-Bernal, Susan L. Poulson, 2007-01-22 Challenged by Coeducation details the responses of women s colleges to the most recent wave of Women s colleges originated in the mid nineteenth century as a response to women s exclusion from higher education Women s academic successes and their persistent struggles to enter men s colleges resulted in coeducation rapidly becoming the norm however Still many prestigious institutions remained single sex notably most of the Ivy League and all of the Seven Sisters colleges In the mid twentieth century colleges concerns about finances and enrollments as well as ideological pressures to integrate formerly separate social groups led men s colleges and some women s colleges to become coeducational The admission of women to practically all men s colleges created a serious challenge for women s colleges Most people no longer believed women s colleges were necessary since women had virtually unlimited access to higher education Even though research spawned by the women s movement indicated the benefits to women of a room of their own few young women remained interested in applying to women s colleges Challenged by Coeducation details the responses of women s colleges to this latest wave of coeducation Case studies written expressly for this volume include many types of women s colleges Catholic and secular Seven Sisters and less prestigious private and state liberal arts and more applied northern southern and western urban and rural independent and coordinated with a coeducational institution They demonstrate the principal ways women s colleges have adapted to the new coeducational era some have been taken over or closed but most have changed by admitting men and thereby becoming coeducational or by offering new programs to different populations Some women s colleges mostly those that are in cities connected to other colleges and prestigious with a high endowment still enjoy success Despite their dramatic drop in numbers from 250 to fewer than 60 today women s

colleges are still important editors Miller Bernal and Poulson argue With their commitment to enhancing women s lives women s colleges and formerly women s colleges can serve as models of egalitarian coeducation **Higher Education for Women in Postwar America, 1945-1965** Linda Eisenmann,2006-01-19 Outstanding Academic Title for 2007 Choice Magazine This history explores the nature of postwar advocacy for women s higher education acknowledging its unique relationship to the expectations of the era and recognizing its particular type of adaptive activism Linda Eisenmann illuminates the impact of this advocacy in the postwar era identifying a link between women s activism during World War II and the women s movement of the late 1960s Though the postwar period has been portrayed as an era of domestic retreat for women Eisenmann finds otherwise as she explores areas of institution building and gender awareness In an era uncomfortable with feminism this generation advocated individual decision making rather than collective action by professional women generally conceding their complicated responsibilities as wives and mothers By redefining our understanding of activism and assessing women s efforts within the context of their milieu this innovative work reclaims an era often denigrated for its lack of attention to women **Higher Education: Handbook of Theory and Research 13** J.C. Smart,1998-03-31 Published annually since 1985 the Handbook series provides a compendium of thorough and integrative literature reviews on a diverse array of topics of interest to the higher education scholarly and policy communities

Chambers,2011-06-01 More than identity politics intersectionality regards the inability of institutional structures to remedy discrimination because of the intersection between social dynamics which are often discretely conceived Crenshaw Dill 2009 This book focuses on the subpopulation of Black female college students *Digging People Up for Coal* Meredith Fletcher,2002 Yallourn was designed in the 1920s as a garden town laid out on hygienic and aesthetic principles embodying the most modern practice It became a thriving and close knit community that was home to several generations of State Electricity Commission SEC workers and their families By the 1960s however it was being portrayed as outmoded unattractive to modern housewives decrepit and obsolete The town was no longer described as a model town but as an area that had to be cleared This book brings to life the impact of the town and its demise on the individuals who lived there and on

the community they created a community that still exists vividly in memory and imagination      *Women's Studies* Linda Krikos, Cindy Ingold, 2004-08-30 This truly monumental work maps the literature of women's studies covering thousands of titles and Web sites in 19 subject areas published between 1985 and 1999 Intended as a reference and collection development tool this bibliography provides a guide for women's studies information for each title along with a detailed often evaluative review The annotations summarize each work's content its importance or contribution to women's studies and its relationship to other titles on the subject Core titles and titles that are out of print are noted and reviews indicate which titles are appropriate as texts or supplemental texts This definitive guide to the literature of women's studies is a must purchase for academic libraries that support women's studies programs and it is a useful addition to any academic or public library that endeavors to represent the field A team of subject specialists has taken on the immense task of documenting publications in the area of women's studies in the last decades of the 20th century The result is this truly monumental work which maps the field covering thousands of titles and Web sites in 19 subject areas published between 1985 and 1999 Intended as a reference and collection development tool this bibliography provides a guide for women's studies information for each title along with a detailed often evaluative review The annotations summarize each work's content its importance or contribution to women's studies and its relationship to other titles on the subject Most reviews cite and describe similar and contrasting titles substantially extending the coverage Core titles and titles that are out of print are noted and reviews indicate which titles are appropriate as texts or supplemental texts Taking up where the previous volume by Loeb Searing and Stineman left off this is the definitive guide to the literature of women's studies It is a must purchase for academic libraries that support women's studies programs and a welcome addition to any academic or public library that endeavors to represent the field      **Rethinking Liberal Education** Nicholas H. Farnham, Adam Yarmolinsky, 1996-01-11 Liberal education has always had its share of theorists believers and detractors both inside and outside the academy The best of these have been responsible for the development of the concept and of its changing tradition Drawn from a symposium jointly sponsored by the Educational Leadership program and the American Council of Learned Societies this work looks at the requirements of liberal education for the next century and the strategies for getting there With contributions from Leon Botstein Ernest Boyer Howard Gardner Stanley Katz Bruce Kimball Peter Lyman Susan Resneck Pierce Adam Yarmolinsky and Frank Wong *Rethinking Liberal Education* proposes better ways of connecting the curriculum and organization of liberal arts colleges with today's challenging economic and social realities The authors push for greater flexibility in the organizational structure of academic departments and argue that faculty should play a greater role in the hard discussions that shape their institutions Through the implementation of interdisciplinary and collaborative approaches to learning along with better integration of the curriculum with the professional and vocational aspects of the institution this work proposes to restore vitality to the curriculum The concept of rethinking liberal education does not mean the same thing to every educator

To one it may mean a strategic shift in requirements to another the reformulation of the underlying philosophy to meet changing times Any significant reform in education needs careful thought and discussion Rethinking Liberal Education makes a substantial contribution to such debates It will be of interest to scholars and students administrators and anyone concerned with the issues of modern education
