Educating Feminists Life Histories And Pedagogy:

Educating Feminists Sue Middleton, 1993 *Educating feminists* is a sensitive exploration of the philosophical differences between feminist teacher educators of the post World War II generation and their students who have experienced the restructured schools and recessionary environment of the New Right. The author, writing from New Zealand, reaches across boundaries and cultures with her life history approach to women's studies, giving dimension to abstract sociological, educational, and feminist theory. Weaving autobiography throughout her discussions of policy and pedagogy, Dr Middleton adroitly takes up the postmodern challenge to reveal the personal history of her work. My everyday life in sexist society, my life as a woman, an academic, a mother, and a citizen is studied as sociologically relevant in that it is generative of my pedagogy. Of particular interest to educators employing life history methods, this book will also appeal to researchers in teachers' education and to professors and students in sociology, women's studies, the philosophy of education, and professional development and leadership. The Routledge International Handbook on Narrative and Life History Ivor Goodson, Ari Antikainen, Pat Sikes, Molly Andrews, 2016-10-04 In recent decades there has been a substantial turn towards narrative and life history study. The embrace of narrative and life history work has accompanied the move to postmodernism and post-structuralism across a wide range of disciplines: sociological studies, gender studies, cultural studies, social history, literary theory, and most recently psychology. Written by leading international scholars from the main contributing perspectives and disciplines, *The Routledge International Handbook on Narrative and Life History* seeks to capture the range and scope as well as the considerable complexity of the field of narrative study and life history work by situating these fields of study within the historical and contemporary context. Topics covered include: The historical emergences of life history and narrative study; Techniques for conducting life history and narrative study; Identity and politics; Generational history; Social and psycho-social approaches to narrative history. With chapters from expert contributors, this volume will prove a comprehensive and authoritative resource to students, researchers, and educators interested in narrative theory, analysis, and interpretation.

Education Feminism Barbara J. Thayer-Bacon, Lynda Stone, Katharine M. Sprecher, 2013-12-15 Collection of important essays by feminist scholars from cultural studies, philosophy of education, curriculum theory, and women's studies. *Education Feminism* is a revised and updated version of Lynda Stone's out-of-print anthology *The Education Feminism Reader*. The text is intended as a course text and provides students a foundational base in feminist theories in education. The classics section is comprised of the readings that students have most responded to in classes. The contemporary readings section demonstrates how the third-wave feminist criticism of the 1990s has an impact on today's feminist work. Both of these sections address critical multicultural educational issues and have an

inclusive diverse selection of feminist scholars who bring race class sexual orientation religious practices and colonial postcolonial perspectives to bear on their work The individual essays are concise and well written and arranged in such a way that it is easy for instructors to assign them around themes of their own choosing The incredible value of this fine collection is that it demonstrates what it means to critically consider interrogate and challenge historic and contemporary ideas regarding educational equity while using these very ideas to imagine new possibilities It will serve as an indispensable resource in graduate classrooms where students can use the text to ground and forward explorations of the necessarily complex considerations of equity in education today Adela C Licona coeditor of *Feminist Pedagogy Looking Back to Move Forward*

education Handbook of Education Politics and Policy Bruce S. Cooper, James G. Cibulka, Lance D. Fusarelli, 2014-11-10
This revised edition of the Handbook of Education Politics and Policy presents the latest research and theory on the most important topics within the field of the politics of education. Well-known scholars in the fields of school leadership, politics, policy, law, finance, and educational reform examine the institutional backdrop to our educational system, the political behaviors and cultural influences operating within schools, and the ideological and philosophical positions that frame discussions of educational equity and reform. In its second edition, this comprehensive handbook has been updated to capture recent developments in the politics of education, including Race to the Top and the Common Core State Standards, and to address the changing role politics play in shaping and influencing school policy and reform. Detailed discussions of key topics touch upon important themes in educational politics, helping leaders understand issues of innovation, teacher evaluation, tensions between state and federal lawmakers over new reforms and testing, and how to increase student achievement. Chapter authors also provide suggestions for improving the political behaviors of key educational groups and individuals, with the hope that an understanding of political goals, governance processes, and policy outcomes may contribute to ongoing school reform.

EBOOK: SUBJECT TO FICTION Peter Munro, 1998-04-16
How do the life histories of women teachers illuminate the gendered nature of the teaching profession? How do women teachers negotiate their own sense of self against within cultural stereotypes of teachers? Situated within current feminist poststructuralist theories regarding the subject, this book takes seriously the lives of women teachers. Drawing on the life histories of three teachers, it explores their narrative strategies to author themselves as active agents within and against the essentializing discourses of teaching. The complex and contradictory ways in which these women construct themselves as subjects while simultaneously disrupting the notion of a unitary subject provide new ways to think about subjectivity, resistance, power, and agency. The implications of this reconceptualization for feminist theorizing, curriculum theory, and life history research are woven throughout the book.

Understanding Education Sharon Gewirtz, Alan Cribb, 2009-09-28
Who should be educated, when, by whom, and how? What purposes should education serve? Why does education matter? These fundamental questions of value are not always seen as central to the sociology of education. However, this book argues that they are pivotal and provides a sophisticated and engaging introduction to the field that is designed to open up these important debates. It draws attention to the many points of disagreement that exist between major thinkers in the sociology of education and the values on which their ideas are based. By involving readers in crucial questions about the potential contribution of sociology to education policies and practices, it aims to bridge the divide between education as it is talked about by academics and the concerns of policymakers and educators who have to make practical decisions about what is to be done. Chapter by chapter, the book introduces competing approaches in the sociology of education: structural functionalism, symbolic interactionism, Marxism, feminism, critical race theory, and poststructuralism. It shows how these can be applied to major themes such as social reproduction, the

politics of knowledge multicultural education identity and teachers work Throughout the authors emphasise the importance of understanding social and educational values and the ways in which these underpin and impact upon the work of both academics and educators
