Education In A Divided World:

Education in a Divided World James Bryant Conant, 1948 **Scholarly Leadership in Higher Education** Wayne J. Urban, 2020-04-02 Urban provides an intellectual history of Harvard presidency of James Bryant Conant 1933 1953 situating it within the broader international landscape and drawing out the implication for the current state of higher education with reference to specific leadership policy issues in the sector Throughout this volume Urban explores the ways in which Conant achieved largely successful attempts to modernize Harvard by upgrading both its student body and its faculty He explores the intellectual excellence agenda that Conant pursued both with students and academics and the ramifications of this He also considers the nature of Conant s part time handling of the role of president the way he delegated campus control to his Provost Paul Buck and the ways the two operated together and separately Urban also looks at Conant s own intellectual breadth as scientist and humanist which showed itself prominently in his activities in pursuit of general education reform Conant s combination of intellect and agenda was unusual for a president in his own time and is exceedingly rare if not completely missing in contemporary university presidencies In exploring this innovative president s time in office at Harvard Urban offers pertinent ideas to today s leaders of higher education **Learning to Divide the World** John Willinsky, 1998 The barbarian rules by force the cultivated conqueror teaches This maxim from the age of empire hints at the usually hidden connections between education and conquest In Learning to Divide the World John Willinsky brings these correlations to light offering a balanced humane and beautifully written account of the ways that imperialism s educational legacy continues to separate us into black and white east and west primitive and civilized Education in a Divided World the Function of the Public Schools in Our Unique Society, by James Bryant Conant James Bryant Conant, 1948 **World Yearbook of Education 2001** Jo Cairns, Roy Gardner, Denis Lawton, 2012-11-12 This yearbook on education for 2001 brings together leading international voices on values in education and presents a window on current debates These include such fundamental issues as who should decide upon the values we adopt **Education, Poverty and the World Bank** Philip W. Jones, 2006 This book explains why the World Bank s commitment to education is important It considers how the nature of the Bank as a financial institution has shaped its view of economic growth development and poverty reduction In shaping its education policies and programs from a banking point of view a particular World Bank approach to educational development has emerged with major implications for the future of education worldwide The book examines the reasons why the Bank is involved in education the evolution of its education policy stances and how the Bank uses education as part of its program of economic globalisation The author provides a framework for assessing the Bank s impact and effectiveness in its education lending especially in terms of poverty reduction Bank work in education is hugely controversial All around the world in industrial countries in transition economies and in the poorest countries the Bank continues to be under fire for its policy prescriptions and its modes of operation From both left and right the Bank is a major target of discontent At the same time

the Bank is frequently misunderstood and misrepresented The book is based on thousands of classified Bank documents examined over the past twenty years and on wide ranging interviews with past and present Bank officials Although critical of many aspects of Bank work in education the book will be recognised as a uniquely authoritative guide to Bank policy formation in education Back cover The Rotarian ,1949-11 Established in 1911 The Rotarian is the official magazine of Rotary International and is circulated worldwide Each issue contains feature articles columns and departments about or of interest to Rotarians Seventeen Nobel Prize winners and 19 Pulitzer Prize winners from Mahatma Ghandi to Kurt Vonnegut Jr have written for the magazine **Hearings** United States. Amsler,2015-04-10 The Education of Radical Democracy explores why radical democracy is so necessary difficult and possible and why it is important to understand it as an educative activity The book draws on critical social theory and critical pedagogy to explain what enables and sustains work for radical democratization and considers how we can begin such work in neoliberal societies today Exploring examples of projects from the nineteenth century to the present day the book sheds light on a wealth of critical tools research studies theoretical concepts and practical methods It offers a critical reading of the crisis of hope in neoliberal capitalist societies focusing on the problem of the contraction of possibilities for democratic agency resistance to domination and practices of freedom It argues that radically democratic thinking practice and forms of social organization are vital for countering and overcoming systemic hegemonies and that these can be learned and cultivated This book will be of interest to academics practitioners researchers and students in education and critical theory and to those interested in the sociology philosophy and politics of hope It also invites new dialogues between theorists of neoliberal power and political possibility those engaged in projects for radical democratization and teachers in formal and informal educational settings Technology in Higher Education M.H. Siddiqui, **Bridging the Education Divide Using Social Technologies** Somprakash Bandyopadhyay,Arina Bardhan,Priyadarshini Dey,Sneha Bhattacharyya,2021-02-06 This book explains the concept of education divide in rural India and identifies various factors that shape and sustain such a divide In doing so it also discusses a range of attempts undertaken to bridge the education divide Subsequently the book has attempted in providing a socio technical framework towards optimally deploying social technologies for addressing the issue of education divide of marginalized communities The proposed framework offers a transition from traditional content centric teacher centric and centralized education ecosystem to a connection centric

learner centric and decentralized education ecosystem of the socio digital age It demonstrates how Internet enabled digital platforms based on the principles of sharism and mass collaboration using social technologies could help to solve one of the greatest problems facing the world mitigating the extant education divide by delivering quality education to underprivileged sections of society The book also presents empirical validation of the proposed framework to show how a community driven blended learning platform can mobilize the dormant knowledge capital of domain experts to teach underprivileged rural Indian children as well as help form communities of practice to enable lifelong learning for the rural adult population The book closes by pointing out the challenges involved in building an equitable education ecosystem using social technologies and ultimately the possibility of creating a fair and equitable society Given its scope the book offers a valuable resource for researchers policymakers and practitioners in the domain of education who want to transform education ecosystems by using technological and process related innovations to improve educational practices for underprivileged sections of society
