Learning Through Teaching Mathematics Roza Leikin, Rina Zazkis, 2010-04-10 The idea of teachers Learning through Teaching LTT when presented to a naive bystander appears as an oxymoron Are we not supposed to learn before we teach After all under the usual circumstances learning is the task for those who are being taught not of those who teach However this book is about the learning of teachers not the learning of students It is an ancient wisdom that the best way to truly learn something is to teach it to others Nevertheless once a teacher has taught a particular topic or concept and consequently truly learned it what is left for this teacher to learn As evident in this book the experience of teaching presents teachers with an exciting opportunity for learning throughout their entire career This means acquiring a better understanding of what is being taught and moreover learning a variety of new things What these new things may be and how they are learned is addressed in the collection of chapters in this volume LTT is acknowledged by multiple researchers and mathematics educators In the first chapter Leikin and Zazkis review literature that recognizes this phenomenon and stress that only a small number of studies attend systematically to LTT processes The authors in this volume purposefully analyze the teaching of mathematics as a source for teachers own learning

The International Handbook of Consultation in Educational Settings Chryse Hatzichristou, Sylvia Rosenfield, 2017-03-16 The rapid changes in the composition of school age youth around the world have catalyzed a growing concern about how to address children's mental health and education Grounded in this increasingly global perspective The International Handbook of Consultation in Educational Settings is designed to provide a multicultural transnational approach to consultation theory research training and practice in educational settings With chapters written by geographically diverse and prominent scholars across the field of school psychology this handbook captures the range of ways in which consultation services are trained implemented and researched internationally Written for practitioners researchers faculty members and graduate students in the fields of school psychology school counseling special education and educational psychology this volume is the first of its kind to provide a comprehensive look at consultation in learning environments across the world The International Handbook of Consultation in Educational Settings offers various perspectives on models implementation training and research on school consultation After an introduction to the volume by the editors contributors to Part II examine school based consultation around the world to explore how consultation services are implemented in different countries Part III addresses cross cultural issues in consultation particularly at a systems level Part IV presents themes related to processes and issues in the implementation of consultation by focusing on approaches in various countries The chapters in Part V focus on consultation training offering insights into the development of students and professionals into effective consultants in cross cultural and systemic contexts Part VI describes how practitioners can contribute to the body of research on consultation through careful planning and implementation of their work Finally the editors summarize key concepts and findings in a concluding chapter
