wide range of factors compares initial situations institutions and government policies the dynamic responses to changing circumstances and discusses the inability of the governments of the MENA region to achieve not only political reform but also the kinds of economic reform that would allow their citizens to prosper in an increasingly globalized world The book focuses on Tunisia Since its independence in 1956 until 2010 Tunisia had considerable success relative to many other MENA countries but was somewhat less successful relative to East Asian countries Since 2010 however while transitioning away from autocracy to democracy it has been in rather serious economic decline The book highlights how both the factors identified as enabling Tunisia s initial success and those leading to its subsequent decline can provide many useful insights for improving the management of economic development across the whole MENA region and perhaps also to developing countries throughout the world

some of the oil exporting countries the entire region still suffers from these same burdens There have been many studies in the economic development and industrialization of the region in recent years This study is different motivated by scepticism and a sense of intellectual frustration and apprehension because of the apparent inadequacy of socioeconomic and political development in the Middle East First published in 1987 Making of the Tunisian Revolution Gana Nouri Gana,2013-09-07 From late 2010 to the present day the Arab world has been shot through with insurrection and revolt As a result Tunisia is now seen as the unlikely birth place and exemplar of the process of democratisation long overdue in the Arab world Mixing political historical economic social and cultural analyses and approaches these essays reflect on the local regional and transnational dynamics together with the long and short term factors that when combined set in motion the Tunisian revolution and the Arab uprisings Above all the book maps the intertwined genealogies of cultural dissent that have contributed to the mobilisation of protesters and to the sustenance of protests between 17 December 2010 and 14 January 2011 and beyond *The role of agriculture and agro-processing for development in Tunisia* Figueroa, Jose Luis,Mahmoud, Mai,El-Enbaby, Hoda,2018-05-02 This paper is part of a series of three country case studies to investigate the potential role of agro processing for economic development based on the strong backward and forward linkages agro processing firms have with the agricultural sector Previous analyses for Egypt and Jordan Figueroa Mahmoud and Breisinger 2017 El Enbaby et al 2016 have shown how developing the agro processing sub sector as well as encouraging the production of high value crops can promote economic and social well being especially in rural areas where the majority of the poor are concentrated In continuation with this line of research this paper aims at analyzing What role agriculture has played for the Tunisian economy in recent years What is the role of agricultural productivity and structural change in fostering agricultural growth in Tunisia and What is the potential of agro processing for economic development and rural transformation in the country

**Middle East and North Africa Economic Developments and Prospects, October 2012** WORLD BANK,2012-10-27

The post revolutionary economies of MENA Egypt Tunisia Libya and Yemen have been recovering after a period of growth decelerations in 2011 In Egypt and Tunisia the growth dips of 2011 were less dramatic than the declines observed during previous transitions The recovery has been relatively quick but the transition process is far from complete and uncertainty about the political and reform process remains a binding constraint to private investment Consequently post transition growth is below potential and is lower than growth prior to the Arab Spring with negative consequences for employment and poverty Events in the post revolution economies have affected other countries in MENA Macroeconomic fundamentals weakened in most developing MENA countries in 2011 12 as growth slowed and governments responded to social pressures with expansionary fiscal policies The regional growth outlook for 2013 reflects weaker expected global economic activity especially in the EU and moderating oil prices Regional economic growth is expected to decelerate to 3.5% in 2013 from 5.5% in 2012 Prolonged political and policy uncertainty and social unrest are serious downside risks to the outlook A
