Economic And Political Incentives To Petroleum Exploration Developments In The Asiapacific Region:

Economic and Political Incentives to Petroleum Exploration Jeremiah D. Lambert, Fereidun Fesharaki, 1990-03-15 To find more information about Rowman and Littlefield titles please visit www.rowmanlittlefield.com Global Oil Trends Shankar Sharma, Joseph L H Tan, 1991 The Gulf crisis has once again drawn attention to the volatility of the world's largest industry. Even in its aftermath, trends in the world oil market are unclear. Global Oil Trends provides a detailed assessment and long term perspective of the global oil market in general and the Asia Pacific market in particular. The 1990 oil crisis is reviewed and the possible impact of growing environmental concerns on the oil industry is discussed. For the last two decades oil demand in the Asia Pacific region has been the highest in the world and this trend is expected to continue into the future. Global Oil Trends analyses the role of the Asia Pacific region in the world oil market, discusses the regional oil supply demand balance, the prospects for the trading of oil products and the development of the oil refining industry in the region. Global Oil Trends is valuable not only for those in the oil industry but also for academicians, energy planners, university students who are concerned with the global oil situation and the dynamism of the Asia Pacific oil market. Routledge Library Editions: History of the Middle East Various, 2021-08-25 This multi volume set of reissued classics brings together a collection of titles that touch on many key aspects of the history of the Middle East. From the early explorers of Arabia to the 1979 revolution in Iran, via histories of places as varied as the UAE and Zanzibar, the analysis of Nazi policies towards the Arab East and a close reading of the territorial foundations of the Gulf states, the books collected here form a wide ranging and eclectic study of the history of the region. **Territorial Foundations of the Gulf States** Richard Schofield, 2016-11-18 This book first published in 1994 provides a comprehensive treatment of a crucial set of geopolitical issues from a region where political developments are observed with great care and some trepidation by the rest of the world. Based on expert analysis by leading researchers, the book is the first English language to deal collectively with the origins and contemporary status of land and maritime boundaries in the Gulf and Arabian Peninsula. The 1990 Iraqi invasion of Kuwait was the gravest challenge yet posed to the system of small states established by Britain during its stay as a protecting power along the western Gulf littoral. Immediately questions were raised about the origins of these tiny emirates. How had this territorial framework evolved? What was its *raison d'être*? How capable was this framework of withstanding serious internal and external upheaval such as that caused by the Iraqi invasion? This book reviews these and related concerns from a variety of informed perspectives: those of the boundary maker himself, the international lawyer, the oil economist and the political and historical geographer. The origins of the region's framework of state territory are carefully scrutinised, as are the region's borders and the contemporary disputes over their status. The period following the first Gulf War has witnessed an increase in the prevalence of Arabian territorial disputes. Some are new such as Saudi-Qatar but most are established cyclical affairs. Although a complete explanation for these developments is premature, they have occurred as states in the region have been making clear moves to

finalise the framework of Arabian state territory only the Saudi Yemen border remains indeterminate albeit the subject of current negotiations The book begins with a major scene setting chapter by Richard Schofield This is followed by chapters containing expert insights into the relationship between territory and indigenous notions of sovereignty Britain's role in drawing Arabian territorial limits including a contribution from someone who drew up some of its boundaries Iran Kuwait disputes in particular maritime boundaries the hydrocarbon dimension and concepts of shared political space With many newly drawn maps based on original research this volume stands alone as a comprehensive reader on an issue that plays a dominant part in the regional geopolitics of the Gulf and Arabian Peninsula

Critical Energy Issues In Asia And The Pacific Toufiq A. Siddiqi, 2019-03-08 This book is the outgrowth of various research programs carried out within the Energy Project of the Resource Systems Institute of the East West Center It provides an understanding of some of the major energy issues faced by the policy makers of the nations of Asia and the Pacific *Annual Report East-West Center, 1990*

Princeton Alumni Weekly Jesse Lynch Williams, Edwin Mark Norris, 1989 **International Aspects of Economic Development** Graham Bird, 1992 Within development economics there has always been a tendency to draw a distinction between the domestic and international aspects of the subject with many economists arguing that the domestic context is of much greater interest than the international arena in which it exists This is an extreme view which ignores the complex interplay between the internal and external environments International Aspects of Economic Development examines important aspects of economic development debt energy environment industrialization trade and aid and shows that these are problems that cannot be viewed solely from one country's perspective but must be viewed as part of an international system to gain the greatest understanding Key Features Written by well known international economists Discusses all aspects of economic development □□□□□□□□, 1992-07 Abstracts of Public Administration, Development, and Environment, 1993
