The Oxford Handbook of Africa and Economics Célestin Monga, Justin Yifu Lin, 2015-07-02 For a long time economic research on Africa was not seen as a profitable venture intellectually or professionally few researchers in top ranked institutions around the world chose to become experts in the field This was understandable the reputation of Africa centered economic research was not enhanced by the well known limitations of economic data across the continent Moreover development economics itself was not always fashionable and the broader discipline of economics has had its ups and downs and has been undergoing a major identity crisis because it failed to predict the Great Recession Times have changed many leading researchers including a few Nobel laureates have taken the subject of Africa and economics seriously enough to devote their expertise and creativity to it They have been amply rewarded the richness complexities and subtleties of African societies civilizations rationalities and ways of living have helped renew the humanities and the social sciences and economics in particular to the point that the continent has become the next major intellectual frontier to researchers from around the world In collecting some of the most authoritative statements about the science of economics and its concepts in the African context this handbook the first of two volumes opens up the diverse acuity of commentary on exciting topics and in the process challenges and stimulates the quest for knowledge Wide ranging in its scope themes language and approaches this volume explores examines and assesses economic thinking on Africa and Africa's contribution to the discipline The editors bring a set of powerful resources to this endeavor most notably a team of internationally renowned economists whose diverse viewpoints are complemented by the perspectives of philosophers political scientists and anthropologists

No Great Wall Felix Boecking,2020-05-11 This book an in depth study of Nationalist tariff policy fundamentally challenges the widely accepted idea that the key to the Communist seizure of power in China lay in the incompetence of Chiang Kai shek s Nationalist government It argues instead that during the second Sino Japanese War China s international trade the Nationalist government s tariff revenues and hence its fiscal policy and state making project all collapsed Because tariffs on China s international trade produced the single greatest share of central government revenue during the Nanjing decade the political existence of the Nationalist government depended on tariff revenue Therefore Chinese economic nationalism both at the official and popular levels had to be managed carefully so as not to jeopardize the Nationalist government s income Until the outbreak of war in 1937 the Nationalists management of international trade and China s government finances was largely successful in terms of producing increasing and sustainable revenues Within the first year of war however the Nationalists lost territories producing 80 percent of tariff revenue Hence government revenue declined just as war related expenditure increased and the Nationalist government had to resort to more rapacious forms of revenue extraction a decision that had disastrous consequences for both its finances and its political viability
