Smith, 2016-04-14 The global financial crisis and sovereign debt crisis exposed the inadequacy of European economic governance Despite the multitude of new mechanisms and institutions that have arisen over the last few years many contend that economic governance remains inadequate and the EU must integrate even further to calm still volatile markets A tension exists between creating effective instruments that will not overstep the authority delegated to an EU that has integrated economically but not politically Can the EU's economic governance system satisfy the demands of markets and politics Relevant issues include the ability of supranational institutions to dictate policy to national governments the harmonization of economic policies and institutions across Europe and a substantial increase in the transfer of funds across borders Can monetary union continue without political union How will the new institutions alter the distribution of power between EU institutions as well as between member states This edited volume analyzes the major policy challenges and institutional mechanisms at the EU and international levels to combat the global financial crisis and the EU's sovereign debt crisis such as financial integration fiscal cooperation and the rising power of the ECB This book was published as a special issue of the Journal of European Integration An Islamic Perspective on Governance Zafar Iqbal, Mervyn Lewis, 2009-01-01 Presents an analysis of key areas in governance from an Islamic standpoint This book draws on classical Islam and contemporary sources to provide a comprehensive Islamic governance framework to contrast with the Western position

Constitutional Imaginaries Jiří Přibáň, 2021-09-30. This book offers a social theoretical analysis of imaginaries as constituent social forces of positive law and politics. Constitutional imaginaries invite constitutional and political theorists, philosophers and sociologists to rethink the concept of constitution as the normative legal limitation and control of political power. They show that political constitutions include societal forces impossible to contain by legal norms and political institutions. The constitution of society as one polity defined by the unity of topos, ethnos, nomos, that is the unity of territory, people and their laws, informed the rise of modern nations and nationalisms as much as constitutional democratic statehood and its liberal and republican regimes. However, the imaginary of polity as one nation living on a given territory under the constitutional rule of law is challenged by the process of European integration and its imaginaries informed by transnational legal and societal pluralism, administrative governance, economic performativity and democratically mobilised polity. This book discusses the sociology of imagined communities and the philosophy of modern social imaginaries in the context of transnational European constitutionalism and its recent theories, most notably the theory of societal constitutions. It offers a new approach to the legal constitutions as societal power formations evolving at national, European and global levels. The book will be of interest to scholars and students interested in constitutional and European law, theory and philosophy as much as interdisciplinary and socio-legal studies of transnational law and society.

Managing Development in a Globalized World Habib Zafarullah, Ahmed Shafiqul Huque, 2017-09-25. Traditionally, development has been rooted in ideologies and assumptions prevalent in the developed world and in practices and strategies adopted by leading industrial nations. However, historically eclectic ideas and approaches often clash with existing long-established notions of progress and modes of realizing social and economic change. *Managing Development in a Globalized World: Concepts, Processes, Institutions* explores this topic by incorporating ideas and interpretations that have previously been neglected or given inadequate attention in the discourse on developing countries. It underscores development as a continuous process that must be supported by sound policies and efficient management, supplying a wider understanding of the field. The authors argue that the application of innovative development techniques and best practices is essential for obtaining optimum results in meeting the needs of society. They examine the style of managing development with a new perspective that links the phenomenon with changing demands and the interplay of internal, external actors and a host of stakeholders. An exploration

of key sectors in development provides clear comprehension of problems and solutions A careful synthesis of theoretical conceptual and empirical literature the book assesses real world situations and provides insight into the operational dynamics of development policies programs and institutions It focuses on goals values and dynamics of development management that are undergoing rapid changes and continue to be enhanced to alleviate poverty and improve living standards in an era of globalization and inter regional and inter institutional synergies It highlights best practices essential for the efficient and effective delivery of human development services that are designed and put in place to obtain optimum results in meeting the needs of society The ^AOxford Handbook of Public Heritage Theory and Practice Angela M.

Labrador,Neil Asher Silberman,2018-07-11 The Oxford Handbook of Public Heritage Theory and Practice charts some of the major sites of convergence between the humanities and the social sciences where new disciplinary perspectives are being brought to bear on the field of cultural heritage These convergences have the potential to provide the interdisciplinary expertise needed not only to critique but also to achieve the intertwined intellectual political and socioeconomic goals of cultural heritage in the twenty first century *The Emergence of Southern Multinationals* Louis Brennan,2010-12-21 In today s globalised world there is a need to investigate new trends in the global economy which impact on Europe The emergence of these southern multinationals in Europe is one such phenomenon This book explores the existing trends and trajectories of these companies the evidence of their impact and their strategies and processes **Environmental**

Technology Development in Liberal and Coordinated Market Economies S. Wong,2006-11-27 This book explores the role of institutions in policy making and the states role in promotion of technology focusing on environmental technology development Case studies include wind power diffusion in the UK and Germany waste recycling in a variety of countries and green automobile technology in the US and Japan Corporate Social Responsibility, Accountability and Governance Istemi Demirag,2018-10-08 The business case for corporate social responsibility which suggests that socially and environmentally aware companies can expect to reap financial rewards is seemingly gaining widespread acceptance within the business community This is particularly apparent in the ever increasing number of prominent companies parading their social ethical and environmental credentials by producing paper or web based social and environmental or sustainability reports In so doing reporting companies claim they are demonstrating a clear commitment to transparency and accountability to their key stakeholder groups However in the prevailing voluntaristic business case centred climate within which such initiatives are taking place little thought appears to have gone into the question of how stakeholders other than the capital provider group can actually use corporate disclosures offered in order to hold management accountable for the social and environmental consequences of their actions While much corporate rhetoric abounds concerning notions of stakeholder dialogue and engagement rigorous analysis of the governance implications of their claimed commitment to the principles of corporate social responsibility is largely conspicuous by its absence Corporate Social Responsibility Accountability and Governance

seeks to explore this missing link between CSR and associated reporting initiatives and governance mechanisms that are capable of embracing true stakeholder accountability A wide range of case studies drawing on experiences of both public and private sector initiatives in Europe the United States Canada South America and Asia offer insightful analysis of the complex relationships between the state the market and civil society in the development of CSR accountability and sustainable development The book employs a multidisciplinary perspective in order to analyse the political social economic technological legal and organisational shaping of CSR The complexities underpinning the concept are thereby clearly drawn out and the gross oversimplifications inherent in the prevailing consultancy driven business case literature painfully exposed Above all the book offers a sound practically and theoretically informed contribution to public policy debate and reflects and builds on urgent calls from public and private sector policy makers as well as academics to develop better governance and accountability frameworks for business to deal with the imperatives of social responsibility sustainable development and ethics This book is divided into five parts In Part 1 the complex concepts of responsibility accountability and governance are discussed and in particular the presumed relationships between the state the market and civil society in improving accountability and governance are explored and critiqued Part 2 consists of chapters relating to corporate social responsibility and stakeholder theory Part 3 is concerned with empirical studies covering governance structures networking and corporate social responsibility Part 4 deals with corporate governance and its implications for regulators and civil society Part 5 discusses multinational companies and how they impact on national governance regimes Finally a summary is provided with emerging international patterns of accountability and governance structures Corporate Social Responsibility Accountability and Governance will be essential reading for public and private policy makers and practitioners and academics interested in how CSR can become more than a soundbite and rather a substantial force for better global corporate governance and accountability

The Economics of Uniqueness Guido Licciardi, Rana

Amirtahmasebi, 2012-10-01 In a world where half of the population lives in cities and more than 90 percent of urban growth is occurring in the developing world cities struggle to modernize without completely losing their unique character which is embodied by their historic cores and cultural heritage assets As countries develop cultural heritage can provide a crucial element of continuity and stability the past can become a foundation for the future This book collects innovative research papers authored by leading scholars and practitioners in heritage economics and presents the most current knowledge on how heritage assets can serve as drivers of local economic development What this book tries to suggest is a workable approach to explicitly take into account the cultural dimensions of urban regeneration in agglomerations that have a history and possess a unique character going beyond an approach based solely on major cultural heritage assets or landmarks The knowledge disseminated through this book will help stakeholders involved in preparation implementation and supervision of development investments to better assess the values of cultural heritage assets and incorporate them in urban development

policies **Globalizing International Political Economy** Nicola Phillips, 2017-10-07 Despite its claims to global scope and relevance International Political Economy as a field of study remains entrenched in a narrow set of theoretical conceptual and empirical foundations derived from the experiences of the advanced industrialized democracies Bringing together specially commissioned chapters by leading authorities in each key area of debate Globalizing International Political Economy provides a systematic examination and critique of contemporary IPE and puts forward a new agenda for a truly global political economy
