Marxism, China, and Development A. James Gregor, 2017-07-05 China has always been something of a mystery to Westerners For one generation Mao Zedong and his followers were simple agrarian reformers while for another they were the communist emperor and his blue ants In the 1970s some of the finest Sinologists believed there was much the United States could learn from Mao's Great Proletarian Cultural Revolution with regard to bureaucracy criminal justice health care and mass education By the 1980s those same theorists asserted that Maoism was nothing more than a

feudal fascism and had absolutely nothing positive to teach Marxism China and Development provides a plausible explanation of these developments that have had such a powerful effect on the people of China for the past half century The author describes and explains the strange collection of beliefs that made up the Marxism of Mao Zedong He seeks to understand why the communist leadership of China like that of the USSR tried to spur economic growth by abandoning the market modalities common to developed economies A James Gregor's conceptual framework is both original and makes more comprehensible the history of Marxism and the history of China Among the major topics he covers are imperialism political democracy economics and alternatives to Maoism and Marxism for China While it is unlikely that our understanding of so complex a series of events as modern Chinese history will soon become less controversial Marxism China and Development's clear concise explanations will clarify some perplexing areas and make the new turns in Chinese political economy more understandable This is a monumental effort at theory construction that will be of interest to political scientists economists sociologists and Sinologists

Capital and Imperialism Utsa Patnaik, Prabhat Patnaik, 2021-03-02 A comprehensive survey of capitalism's colonialist roots and uncertain future Those who control the world's commanding economic heights buttressed by the theories of mainstream economists presume that capitalism is a self contained and self generating system Nothing could be further from the truth In this pathbreaking book winner of the Paul A Baran Paul M Sweezy Memorial Award radical political economists Utsa Patnaik and Prabhat Patnaik argue that the accumulation of capital has always required the taking of land raw materials and bodies from noncapitalist modes of production They begin with a thorough debunking of mainstream economics Then looking at the history of capitalism from the beginnings of colonialism half a millennium ago to today's neoliberal regimes they discover that over the long haul capitalism in order to exist must metastasize itself in the practice of imperialism and the immiseration of countless people A few hundred years ago write the Patnaiks colonialism began to ensure vast virtually free markets for new products in burgeoning cities in the West But even after slavery was generally abolished millions of people in the Global South still fell prey to the continuing lethal exigencies of the marketplace Even after the Second World War when decolonization led to the end of the so called Golden Age of Capitalism neoliberal economies stepped in to reclaim the Global South imposing drastic austerity measures on working people But say the Patnaiks this neoliberal economy which lives from bubble to bubble is doomed to a protracted crisis In its demise we are beginning to see finally the transcendence of the capitalist system
