## **Economic Transformation Of Eastern Europe Views From Within:**

*The Economic Transformation of Eastern Europe* Bernard S. Katz, Libby Rittenberg, 1992-10-26 This volume provides an up to date account of how the process of economic transition in Eastern Europe is unfolding from the point of view of Eastern European economists assessing their native economies The authors have personally experienced the frustrations of the previous Stalinist system of central planning and public ownership as well as the difficulties and pitfalls of designing new systems based on markets and private ownership The book focuses on the three countries of Eastern Europe leading the reform efforts Czechoslovakia Hungary and Poland and points out similarities and differences in their reform strategies Although the stories of economic change in Eastern Europe have dominated news headlines the real challenges of designing and maintaining viable economies are just beginning The analysis in this volume will be of interest to those in the academic and policy making communities

*Economic Transformation in Eastern Europe and East Asia* Herbert Hax, Wolfgang Klenner, Willi Kraus, Tomoo Matsuda, Takafusa Nakamura, 2012-12-06 The economic transformation taking place in Eastern Europe and Asia is in particular a challenge for Japan and Germany because these two states as the immediate neighbors of the developing regions are directly affected and also because they are the strongest economic powers in their regions and have the necessary potential to influence developments there Japan and Germany are affected in many ways both positively and negatively Should the economic and social transformation run into difficulties leading to economic and political chaos perhaps even to armed conflicts then economy and social fabric of the prosperous neighbors would doubtlessly suffer In the past Japan and the South East Asian region have already experienced how economic problems in China caused millions of Chinese to seek their fortunes in other countries An economic and political destabilization of China would today probably have even greater effects on migration flows Similar effects can be expected in Europe if the transformation process in Eastern Europe should fail But even less dramatic developments in Eastern Europe and East Asia can have deleterious consequences for Germany and Japan Both nations are linked closely to the transforming economies near them though at a fairly low level A reduction in trade with them a refusal to service debts and other economic frictions ensuing out of economic and political troubles would of necessity hamper the prosperity of Japan and Germany A successful transformation process would without doubt benefit all economic partners to a considerable extent

**Economic Reform and Structural Adjustment in East European Industry**  
Mr. Eduardo Borensztein, Mr. Jonathan David Ostry, 1994-06-01

A consistent set of disaggregated industrial output data for four Eastern European countries is examined In order to determine the extent to which structural adjustment has taken place since the initiation of market oriented reform The latter created a massive relative price shock whose affects on the structure of the industrial sectors of these economies is shown to have been relatively small at least one to two years after the reforms

An implication is that one argument in favor of more gradualist reform based on the premise that more gradualism implies a smaller output cost in the short run is questionable. By and large in these economies the output cost associated with the removal of relative price distortions may still have to be faced.

**East-Central European Economies in Transition** John P. Hardt, Richard F. Kaufman, 2016-09-16 This volume makes JEC commissioned expert studies of economic developments in East Central Europe available to business people, educators and students. **Crisis and Reform in Eastern Europe** Ferenc Feher, 2020-02-13. Communism in Eastern Europe is in crisis. Its dimensions are social and economic; its manifestation is political. This volume, a collection of essays by leading authorities, describes the symptoms of the crisis, diagnoses the causes of the malady and offers alternative scenarios for therapy. A unique dimension of this collection is its avoidance of one-dimensional explanations. The contributors approach the subject from very different angles and start from very distinct sociopolitical premises. The volume includes original accounts of unexplored aspects of East European communism as well as classic interpretations of the economic crisis and social stagnation that characterize the area. Contributions not only examine the sociopolitical behavior of the ruling apparatus but also analyze its strategies, political culture and the opposition. Both the professional and the general reader seeking more information about Eastern Europe will find this volume an extensive in-depth portrait of the current situation in what many observers predict may develop into the major area of tension in post World War II Europe.
