*Economics As a Science of Human Behaviour* Bruno S. Frey, 2013-06-29 This book champions the view that economics is a social science and that moreover it may serve as a new paradigm for the social sciences Economics is taken to be part of those sciences which deal with actual problems of society by providing insights improving our understanding and suggesting solutions I am aware that the way problems are addressed here has little in common with economics as it is generally understood today most economists make strong efforts to imitate the exact sciences Economics tends to become a branch of applied mathematics the majority of all publications in professional journals and books are full of axioms lemmas and proofs and they are much concerned with purely formal deductions Often when the results are translated into verbal language or when they are applied empirically disappointingly little of interest remains The book wants to show that another type of economics exists which is surprisingly little known This type of economics has its own particular point of view It centres on a concept of man or a model of human behaviour which differs from those normally used in other social sciences such as sociology political science law or psychology I do not however claim that economics is the only legitimate social science On the vii viii PREFACE contrary economics can provide useful

insights only in collaboration with the other social sciences an aspect which has been disregarded by mathematically oriented economics      *Developing Property Rights Theory* Shaoan Huang,2023-11-08 This book aims to interpret China's property rights reform since 1978 on theory level Property rights reform is no doubt the essential for economic system reform which led to China's economic miracle in the past 40 years Neither modern property rights theory nor Marxism can explain all issues around Chinese complex economic system reform The book sheds light on the theory development through comparative study and China focused research      Law and Economic Performance in the Roman World ,2022-09-26 This

book offers critical analyses of the dynamic relation between legal regulations institutions and economic performance in the Roman world It studies how law and legal thought affected economic development and vice versa Inspired by New Institutional Economics scholars the past decades used ancient law to explain economic growth There was however no natural selection process directing legal changes towards macro economic efficiency Ancient rulers and jurists modified institutions to serve or safeguard particular interests political social or economic Nevertheless both economic performance and legal scholarship peaked at unprecedented levels These were momentous historical developments How were they related
