Kiran Sagoo, Wilmar Salim, 2009-03-26 Coming out of an established international graduate student conference organized by the East West Center this book presents selected papers written by graduate students from different fields of study After identifying historical or contemporary issues in each field these papers propose a framework for resolving these issues whether through global commitment regional cooperation national policy or local knowledge and practice The unifying thread of this book is sustaining resilience in the Asia Pacific We acknowledge this perseverance and try to sustain and disseminate it so that other communities may learn from these practices and experiences Generally a volume like this would address the challenge of this region from a security economics or political perspective This book hopes to add to the literature on resiliency by addressing these issues from a multidisciplinary and multilevel perspective **The Oxford**

Handbook of International Law in Asia and the Pacific Simon Chesterman, Hisashi Owada, Ben Saul, 2019-09-12 The growing economic and political significance of Asia has exposed a tension in the modern international order Despite expanding power and influence Asian states have played a minimal role in creating the norms and institutions of international law today they are the least likely to be parties to international agreements or to be represented in international organizations That is changing There is widespread scholarly and practitioner interest in international law at present in the Asia Pacific region as well as developments in the practice of states The change has been driven by threats as well as opportunities Transnational issues such as climate change and occasional flashpoints like the territorial disputes of the South China and the East China Seas pose challenges while economic integration and the proliferation of specialized branches of law and dispute settlement mechanisms have also encouraged greater domestic implementation of international norms across Asia These evolutions join the long standing interest in parts of Asia notably South Asia in post colonial theory and the

Customary Land Tenure and Registration in Australia and Papua New Guinea James F. Weiner, Katie Glaskin, 2007-06-01 The main theme of this volume is a discussion of the ways in which legal mechanisms such as the Land Groups Incorporation Act 1974 in PNG and the Native Title Act 1993 in Australia do not as they purport serve merely to identify and register already existing customary indigenous landowning groups in these countries Because the legislation is an integral part of the way in which indigenous people are defined and managed in relation to the State it serves to elicit particular responses in landowner organisation and self identification on the part of indigenous people These pieces of legislation actively contour the progressive evolution of landowner social territorial and political organisation at all levels in these nation states The contributors to this volume provide in depth anthropological case studies of social structural and cultural transformations engendered by the confrontation between states developers and indigenous communities over rights to customarily owned land
