

A large, thick, red abstract graphic that resembles a stylized, continuous line or ribbon. It starts as a horizontal bar at the top left, then curves down and around to form a large, open loop that occupies the lower half of the cover. The background is split horizontally: the top half is a light gray, and the bottom half is a solid black. The red graphic is layered over both background colors.

Economics For An Imperfect World Essays In Honor Of Joseph E Stiglitz:

Economics for an Imperfect World Joseph E. Stiglitz, Richard Arnott, 2003 Throughout Joseph Stiglitz's long and distinguished career in economics the focus has been on the real world with all of its imperfections His 2001 Nobel Prize recognized his pioneering research in imperfect information his work in other areas including macroeconomics public economics and development economics has been just as influential This volume a collection of essays written to mark Stiglitz's sixtieth birthday reflects the wide ranging influence of Stiglitzian economics The many distinguished contributors are his teachers students and coauthors their participation testifies to the personal and professional impact of Joseph Stiglitz's contributions to contemporary economic thought

Economics for an Imperfect World Joseph E. Stiglitz, 2003 The focus of Joseph Stiglitz's work in economics throughout his long and distinguished career has been on the real world with all of its imperfections

Economics in a Changed Universe Gerald L. Houseman, 2008-05-29 A revolution in economics politics and international affairs has been shaped by the new economics of information For the first time we are able to look at our world through a lens illuminated by a much more precise understanding of how economies work and how individuals groups and corporations react to them All of the disciplines of the social sciences are affected by this development but the greatest impact we can expect will be upon public policy making Joseph E Stiglitz and his fellow Nobel Prize winners have demonstrated with the precision and force of logic reason and mathematics that the folklore of what has been regarded as political economy for the past two hundred and thirty years has misled us with ideological and mystical but useless ideas such as free enterprise and the immutability of market givens Houseman describes and demonstrates the new resonance liveliness and optimism which characterize the economics of information calling upon his own experience with Third World issues and problems He also looks at this new but often ignored economics as a challenge to the existing literature of the social sciences and to the practices and assumptions of policy makers interest groups such as environmentalists labor and multinational corporations think tanks international organizations such as the IMF and World Bank and political activists Effectively arguing that the changed universe of economics requires any of us concerned with world affairs to re think and adjust our assumptions Houseman provides us with the necessary insight to apply this new paradigm to real world problems

Architecture and Innovation Barbara Van Schewick, 2012-08-17 A detailed examination of how the underlying technical structure of the Internet affects the economic environment for innovation and the implications for public policy Today following housing bubbles bank collapses and high unemployment the Internet remains the most reliable mechanism for fostering innovation and creating new wealth The Internet's remarkable growth has been fueled by innovation In this

pathbreaking book Barbara van Schewick argues that this explosion of innovation is not an accident but a consequence of the Internet's architecture a consequence of technical choices regarding the Internet's inner structure that were made early in its history The Internet's original architecture was based on four design principles modularity layering and two versions of the celebrated but often misunderstood end to end arguments But today the Internet's architecture is changing in ways that deviate from the Internet's original design principles removing the features that have fostered innovation and threatening the Internet's ability to spur economic growth to improve democratic discourse and to provide a decentralized environment for social and cultural interaction in which anyone can participate If no one intervenes network providers' interests will drive networks further away from the original design principles If the Internet's value for society is to be preserved van Schewick argues policymakers will have to intervene and protect the features that were at the core of the Internet's success

Perspectives on Financing Innovation James E. Daily, F. Scott Kieff, Arthur E. Wilmarth, 2014-05-16 Although much has been written about innovation in the past several years not all parts of the innovation lifecycle have been given the same treatment This volume focuses on the important first step of arranging financing for innovation before it is made and explores the feedback effect that innovation can have on finance itself The book brings together a diverse group of leading scholars in order to address the financing of innovation The chapters address three key areas intellectual property venture capital and financial engineering in the capital markets in order to provide fresh and insightful analyses of current and future economic developments in financing innovation Chapters on intellectual property cover topics including innovation in law making orphan business models and the use of intellectual property to protect financial engineering innovations and developing intellectual property regimes in Brazil Russia India and China The book also covers the tax treatment of venture capital founders the treatment of preferred stock by the Delaware Courts asset backed lending hedge funds and corporate governance for small businesses after the Dodd Frank financial reform bill The book will be of interest to scholars practitioners and students in law innovation finance and business

The U.S. Experience with No-Fault Automobile Insurance James M. Anderson, Paul Heaton, Stephen J. Carroll, 2010-02-15 No fault regimes a formerly popular alternative to the tort compensation system for auto accident victims have gradually lost

support Over time premiums and claim costs have grown in no fault states relative to other states primarily driven by explosive medical cost increases No fault and tort states have also converged across many domains affecting costs including excess claiming litigation patterns and noneconomic damage payments **Regulating Older Drivers** David S. Loughran, Seth A. Seabury, Laura Zakaras, 2007 Are older drivers posing increasing risk to the public If so what public policies might mitigate that risk Older drivers those 65 and older are slightly likelier than drivers aged 25 to 64 to cause an accident but drivers aged 15 to 24 are nearly three times likelier than older drivers to do so The authors of this paper conclude that stricter licensing policies targeting older drivers would likely not improve traffic safety substantially
