The Economics of Child Labour

OXFORD

Economics Of Child Labour

M Walker

Economics Of Child Labour:

Economics of Child Labour Kappadath Parameswara Kannan, 2001 Contributed articles presented at the 83rd Annual Conference of Indian Economic Association held at Jammu during 2000-2001

The Economics of Child Labour Alessandro Cigno, Furio Camillo Rosati, 2005-07-28 Children throughout the world are engaged in a great number of activities classifiable as work. These range from relatively harmless even laudable activities like helping parents in their domestic chores to morally and physically dangerous ones like soldiering and prostitution. If we leave out the former we are left with what are generally called economic activities. Only a small minority less than 4 percent of all working children are estimated to be engaged in what ILO defines as the unconditional worst forms of child labour. The absolute number of children estimated to be engaged in the latter is however a stunning 84 million. Should we only be concerned about the worst forms of child labour? Most forms of child labour other than the worst ones have valuable learning by doing elements. Furthermore child labour produces current income. If the family is credit rationed child labour relaxes the liquidity constraint and increases current consumption. There is thus a trade off between present and future consumption. To the extent that current consumption has a positive effect on future health hence on the child's future earning capacity and more generally utility this trade off may be lower than one might think. This book provides a blend of theory, empirical analysis and policy discussion. The first three chapters develop a fairly comprehensive theory of child labour and related variables such as fertility and infant mortality. Chapter 4 concerned with the effects of trade contains both theory and cross country empirical evidence. The remaining chapters are country studies aimed at illustrating and testing different aspects of the theory in different geographical contexts. These chapters apply the latest developments in microeconomic methodology for dealing with endogeneity, unobserved heterogeneity and the evaluation of public intervention.

Economics of Child Labour Biswajit Chatterjee, Runa Ray, 2019-05-31 This book examines the effectiveness of trade and non trade policies to combat the menace of child labour. Although it has decreased on the global scale in recent years child labour still remains high particularly in the developing countries. Keeping in mind the estimated extent of child labour in different regions around the globe the book offers a detailed critical review of both theoretical and empirical literature on the topic as well as the policies to reduce the incidence of child labour. It also develops a general equilibrium model to demonstrate the possible effects of growth promoting non trade policies as opposed to direct trade policies on child labour employment mitigation. The book argues that of the non trade policies the introduction of compulsory education appears to be an effective instrument for curtailing the child labour problem when families receive targeted subsidies for sending their children to school. It also shows that appropriately designed and targeted education subsidies can reduce the incidence of child labour and that social protection measures such as subsidies on school enrolment also tend to have a positive impact. The book not only opens up research topics for academicians but is also a valuable resource for policy makers.

The Economics of Child Labour in the Era of

Globalization Sarbajit Chaudhuri, Jayanta Kumar Dwibedi, 2016-10-14 Children in poor countries are subjected to exploitation characterized by low wages and long hours of work as well as by unclean unhygienic and unsafe working and living conditions and more importantly by deprivation from education all of which hampers their physical and mental development Child labour is a complex issue and clearly it has no simple solution This book sheds some understanding of its root causes The book attempts to delve into many of the important theoretical aspects of child labour and suggests policies that could indeed be useful in dealing with the problem under diverse situations using alternative multisector general equilibrium models

The Economics of Child Labour Alessandro Cigno, Furio C. Rosati, 2024-11-14 Children throughout the world are engaged in a variety of activities classifiable as work These range from relatively harmless even laudable activities like helping parents in the home to morally or physically dangerous ones Many forms of child labour have valuable learning by doing elements but they all conflict with formal education If the family is credit constrained child labour relaxes the liquidity constraint and may be necessary to avoid starvation Statistically and theoretically child labour is associated with high fertility high infant mortality and low productivity By contrast education is associated with low fertility low infant mortality and high productivity Suitable as an advanced development economics or development microeconomics textbook the book lays out the theory as it now stands and examines the available evidence within an integrated framework This second edition emphasizes the interplay between child labour education fertility and mortality The empirical aspects have been expanded to include new evidence available since the previous edition and an assessment of the impact of policy and programs There are new chapters on the emergence and implications of family rules and social norms and on policy optimization and an expanded chapter on international trade examines the effects of foreign direct investment

Economics of Child Labour, 2018 *The Economic Impact of Child Labour* Rossana Galli, 2001 *The World of Child Labor* Hugh D. Hindman, 2009 This definitive resource details both the current and historical state of child labor in each region of the world focusing on its causes consequences and cures Including contributions by an international team of leading child labor scholars researchers policy makers and activists as well as a wealth of current statistical data it is the most comprehensive reference available on the subject

Child Labour in South Asia Kishor Sharma, 2016-04-15 Child labour is a serious and contentious issue throughout the developing world and it continues to be a problem whose form and very meaning shifts with social geographical economic and cultural context While the debate about child labour practice in developing countries appears to be motivated by growing competition in labour intensive products brought about by globalization studies on this issue are both sparse and lopsided This important book aims to shed light on this debate by documenting the experience of South Asian developing countries which have experienced rapid income and export growth Based on evidence from Bangladesh India Nepal Pakistan and Sri Lanka this volume aims to improve our understanding about the link between trade growth and child labour practices as well as management of child labour in developing countries

Economics of Child Labour Ambreen Fatima, 2013 **Annotated**

Bibliography on Child Labour, 2003 The aim of this bibliography on child labour was to assemble the best of the rapidly increasing literature and research material in recent years and make it accessible The focus is from 1995 to 2002 although a few authoritative earlier sources have been included Three basic selection criteria were applied the material had to be considered representative relevant and to present sources that had been previously overlooked

The World of Child Labor Hugh D Hindman, Hugh Hindman, 2014-12-18 The World of Child Labor details both the current and historical state of child labor in each region of the world focusing on its causes consequences and cures Child labor remains a problem of immense social and economic proportions throughout the developing world and there is a global movement underway to do away with it Volume editor Hugh D Hindman has assembled an international team of leading child labor scholars researchers policy makers and activists to provide a comprehensive reference with over 220 essays This volume first provides a current global snapshot with overview essays on the dimensions of the problem and those institutions and organizations combating child labor Thereafter the organization of the work is regional covering developed developing and less developed regions of the world The reference goes around the globe to document the contemporary and historical state of child labor within each major region Africa Latin and South America North America Europe Middle East Asia and Oceania including country level accounts for nearly half of the world's nations Country level essays for more developed nations include historical material in addition to current issues in child labor All country level essays address specific facets of child labor problems such as industries and occupations in which children commonly work the national child welfare policy occupational safety regulations educational system and laws and often highlight significant initiatives against child labor Current statistical data accompany most country level essays that include ratifications to UN and ILO conventions the Human Development Index human capital indicators economic indicators and national child labor surveys conducted by the Statistical Information and Monitoring Program on Child Labor The World of Child Labor is designed to be a self contained comprehensive reference for high school college and professional researchers Maps photos figures tables references and index are included

Hard At Work In Factories And Mines Carolyn Tuttle, 2021-11-28 Children have worked for centuries and continue to work The history of the economic development of Europe and North America includes numerous instances of child labor Manufacturers in England France Belgium Germany and Prussia as well as the United States used child labor during the initial stages of industrialization In addition child labor prevails currently in many industries in the Third World This book examines the explanations for child labor in an economic context A model of the labor market for children is constructed using the new economics of the family framework to derive the supply of child labor and the traditional labor theory of marginal productivity to derive the demand for child labor The model is placed into a historical context and is used to test the existing supply and demand induced explanations for an increase in child labor during the British Industrial Revolution Evidence on the extent of children's employment their specific tasks and trends in their wages from the textile industry and mining

industry is used to support the argument that it was technological innovation which created a demand for child labor. Certain mechanical inventions and process innovations increased the demand for child labor in three ways: increasing number of assistants needed, increasing the substitutability between children and adults, and creating work situations that only children could fill. Specific innovations in the production of textiles and in the extraction of coal, copper, and tin are highlighted to show how they favored the use of child workers over adult workers. The book concludes with a look at the current situations in developing countries where child labor is prevalent. Considerable insight is gained on the role of child labor in economic development when this historical model is applied to the contemporary situation.

Child Labor and Education in Latin America P. Orazem, Z. Tzannatos, Guilherme Sedlacek, 2009-03-30. This book examines the facts concerning child labour in Latin America, how it varies over time across countries, and in comparison to other areas of the world. It aims to improve the understanding of root causes and consequences of persistent child labour and to contribute to the policy debate.

Child Labor in the Developing World Alberto Posso, 2020-07-20. This book provides new evidence of the theoretical and empirical causes and consequences of child labor. In so doing, the chapters provide a unique set of policy prescriptions that are applicable to both the developing countries that make up the case studies of the volume as well as other countries more broadly. The volume is constructed to inform policy with rigorous analysis. However, unlike most academic studies, the language and flavour of the volume is largely non-technical, while the policy recommendations are practical. The volume is made up of three sections. The first section builds on the existing literature and provides new theoretical insights into child labor. Section 2 provides empirical evidence from both quantitative and qualitative case studies on child labor from across Asia, Africa, and Latin America. This section provides information from studies conducted in Brazil, Cameroon, the Dominican Republic, India, and Vietnam. Section 3 provides policy recommendations.

Child Labour and Human Rights D. C. Nanjunda, 2008. The recent trend in the global system is to evaluate the development of any country not in terms of their military or economic strength or the splendor of their capital cities and big public buildings, but also in terms of human development or the well-being of its citizens. Against this backdrop, the existence and perpetuation of child labor has been one of the main limiting factors standing in the way of human development in almost all the developing countries, including India. The issue of child labour is a worldwide phenomenon and it exists in almost all the countries of this planet. Meanwhile, it is very saddening to write that our India is one among the nations in the world which has the unique distinction of being a large employer of child labour. Since child labour is a more complex natured problem, a balanced approach is needed to solve this issue with an interactive role from all concerned people and the agencies. It is the right time for all to be highly and really think regarding ensure of better social, political, and economic lives to all sections of the society, at least in the interest of human rights in this new millennium. Apart from the normal style, this book contains some thematic discussion on child labor and human rights. Each chapter has been written based on grass root experiences of the author. This is the most creamy part of this

book Each and every chapter of his book gives a different outlook on the problem to the readers This book will be highly useful to academic people anthropologists policy makers NGOs research students Development agencies and others interested in studying the growing problems of child labour *Anthropology and Child Labour* D. C. Nanjunda,2009 Study conducted in Bangalore City of Karnataka India *The relations between climate change and child labour in agriculture* Food and Agriculture Organization of the United Nations ,2023-06-07 Climate change related events undermine children s educational attainment exposing them to child labour hazardous work and forced migration This nexus is particularly relevant for agriculture and its subsectors indeed they absorb about 26 percent of the economic impacts of climate change related disasters and host 70 percent of all child labour This study aims to identify the extent to which climate change related events and impacts affect child labour in agriculture by exploring the underlying connection between the two challenges as the initial step towards integrating a child labour lens within the international community s work on climate change It showcases the multi dimensional relationship through a mixed methods approach in four countries Cote d Ivoire Ethiopia Nepal and Peru The qualitative and quantitative findings propose a set of policy implications that are in line with the concept that one size fits all policy prescriptions are unlikely to work as they must be tailored to different communities based on their characteristics **How Child Labor and Child Schooling Interact with Adult Labor** Ranjan Ray,1999 The link between household poverty and child labor is much stronger in Pakistan than in Peru Providing good schools in South Asia could help reduce child labor The link between child labor and adult labor markets varies with gender **Economics of Child Labour in Selected Industries** ,1995
