The Economics of European Integration: System Competition versus Harmonization Nils De Rop, 2004-02-04 Seminar paper from the year 2002 in the subject Economics International Economic Relations grade 1 3 A University of G ttingen Economics Seminar course European Integration and EU Enlargement language English abstract The process of European Integration especially the economic perspective of these fascinating developments is the main issue of this seminar paper The decisive questions leading through the analysis are the following which approaches to economic integration exist which one of them has been is and will be dominant in the respective European Integration process and whether the current framework is appropriate for the future always in mind the further enlargement towards a European Union of 25 or even 27 member states I structure my analysis into mainly three parts namely the underling theory an empirical analysis and an outlook for the future The emphasis is clearly on the first two parts which are based on an economical perspective of integration processes I present the underlying theory of economic integration namely the two approaches to it System Competition and Harmonization at first Afterwards an overview of the process of European

Integration is provided always in mind the perspective of economic integration and therefore the ongoing battle of the two approaches to gain more importance in the process While doing so I analyse phases or stages in which one of these approaches has been increasingly dominant in the integration process and try to analyse why this special pattern has occurred At the end of my paper I combine the economic perspective to integration with a more general but interesting concept to integration processes which could help to overcome the increasing stagnation tendencies in European Integration that is one of the main findings of my earlier analysis Although this Concept named Differentiated Integration provides one with extensive measures to reform the integration process I limit the perspective to mostly the changes and proposals with importance to economic integration as this is the core issue of this paper Thus the final presentation of reform proposals is less focused on how the European Union as a final Political Union could look like in the far future but more on how to overcome stagnation tendencies and gain dynamic impulses again with more technically orientated middle term actions

The Single Market Programme and its weaknesses Susanne Jung, 2003-01-09 Seminar paper from the year 2002 in the subject Economics International Economic Relations grade 2.0 B University of Canterbury Economics course The Economics of European Integration language English abstract Economic integration can be defined as a long term process in which several stages improve the level of integration The first step is a free trade area in which internal visible trade restrictions customs duties quotas between partner countries are removed Examples for those forms of economic integration are the North American Free Trade Area NAFTA and the Asian Free Trade Area AFTA Adding a common external tariff for non member countries to the elimination of internal trade obstacles creates ensuing a Customs Union The next level of integration the single market for commodities is achieved by removing visible and invisible trade barriers Therefore all

restrictions on trade between member countries are abolished and a common external tariff is imposed on external countries Following to this level free factor mobility of production and of financial assets generate a common market Next steps to economic integration are the Monetary and lastly the Economic Union by having a common currency and policy Theme of this essay is critical arguments of disestablish trade barriers towards the European Union EU and its underlying economic theories in respect to the Single Market Programme SMP its aims and if they are achieved in terms of labour and social policies Therefore it is necessary to have a focus on the removal of non tariff barriers NTBs exemplary for goods and labour

The Political Economy of European Integration Paolo Guerrieri,Pier Carlo Padoan,1989

European Integration and Health Policy Panos Minogiannis,2003-01-01 The impact of European integration on diverse national social policies is still largely unknown While policy decision making remains at the country level there is a strong possibility that indirectly as a result of ideological imperatives and financial constraints policies will change National health policy is a case in point This important volume explores the current and probable effect of European integration on health care protection Will it tend to encourage all European member states to provide equitable and universal access to quality care Or is the European integration process likely to lead to social exclusion of some The high degree of social welfare as a health expectancy holds great significance for decisions in countries like the United States facing similar pressures for expanded coverage In answering these questions Panos Minogiannis examines policies in Greece France Germany and the Netherlands Minogiannis frames his argument

through an exploration of the history of the institutionalization of health care Chapter 1 explores the nature of challenges that health care faces in an era of integration and the ways in which these challenges have emerged Chapter 2 discusses centralization of governance in Brussels describing the structure and relations of different European Union institutions and their interactions with member states The final portions of the book through case studies of the Dutch French German and Greek health reforms explore the history of the political development of health care institutions with a particular interest in reform proposals in the last fifteen years Chapter 7 brings together lessons from previous chapters and discusses the dynamics of health policy making in the European Union Minogiannis concludes that health insurance will most likely remain at the member state level as far as politics are concerned at least for the present although policy makers will most likely have to deal with the issue of cross border health more comprehensively than in the past Those interested in comparative policy and in particular health care policy will find this volume highly informative reading Those interested in the impact of European integration will find it provocative Panos Minogiannis is with the Mailman School of Public Health at Columbia University and is a research associate at the Eisenhower Center

The Economic Crisis and European Integration Wim Meeusen, 2011 This unique and fascinating book illustrates that the credit crunch and the ensuing financial and economic crisis of 2007 2009 did not only strike hard at the economy in the Western world but also at its policymakers at economics as a scientific discipline and more specifically at the process of European integration itself In a series of theoretical and empirical papers the expert contributors discuss the impact of the financial crisis on European integration in detail considering issues including governance sovereign debt crises global economic imbalances and post crisis perspectives from Central and East European countries The conclusion is that there is an urgent need for political integration in Europe as a necessary tool to facilitate economic integration This book will prove invaluable to both academics and practitioners with a special interest in the economics of European integration international financial markets economics and international business Contributors include F C Bagliano H Berger N D

European Integration in Times of Crisis Demosthenes Ioannou, Patrick Leblond, Arne Niemann, 2017-10-02 Few events over the past few decades have given rise to an amount of debate and speculation concerning the state of the European Union EU and the future of European integration as the economic and financial crisis that began in 2007 In spite of substantial media policy making and academic attention the fundamental questions of why and how the euro area EA has remained not only intact but also expanded and integrated further during the crisis require deeper theoretical investigation One needs to understand not only the economics but also the politics and institutions of the crisis A lack of such an understanding is the reason why a number of observers at least initially had a hard time making sense of policy makers decisions and pace thereof including why the EA did not implode as some predicted Economic theories provide a certain perspective for why the crisis occurred and what economic policies were and are needed to resolve it however they fail to capture the deeper roots and management of the crisis In order to improve our understanding of a discussion that has oscillated between fears of EA disintegration on the one hand and the concrete advancement of integration during the crisis on the other this special collection brings together leading scholars of European integration who apply key theoretical approaches from liberal intergovernmentalism and neofunctionalism to other prominent theoretical accounts that have been applied to European integration such as historical institutionalism critical political economy normative theory and a public opinion approach to the economic and financial crisis The contributions seek to analyse understand and or explain the events that occurred and the reactions to them in order to draw conclusions concerning the applicability and usefulness of their respective theoretical perspectives This book was published as a special issue of the Journal of European Public Policy

Mapping European Economic Integration A. Verdun, A.
