Carchedi,2001 In this innovative work Guglielmo Carchedi argues that only an analysis centered on class as the basic unit of social life with production and distribution of value understood as the bedrock of the economy can throw light on the internal contradictions of European economic integration Two specific themes emerge from this radical approach First familiar topics such as competition and social policy economic and monetary union the Common Agricultural Policy and immigration are treated in an original manner Second subjects usually ignored in the standard textbooks for instance the role of interest groups in the Union s decision making process are shown to be of crucial importance in understanding the economics of the European Union This work therefore provides both an introduction to and a critique of the European project The book s central message however is that another sort of Europe is possible one based on the erosion of economic polarization on the abolition of Europe s imperialist relations with the Third World and on the creation of truly democratic institutions of self determination *Analyzing the European Union Policy Process* Esther Versluis,Mendeltje van Keulen,Paul

Stephenson,2010-10-15 Readers are provided with a practical insight into how to analyze policies and policy making in the EU Using case studies to deepen readers understanding this book examines the various stages of the policy process from the moment the issue reaches the agenda through to drafting implementation and evaluation **Routledge Handbook of the Economics of European Integration** Harald Badinger,Volker Nitsch,2015-10-05 Routledge Handbook of the Economics of European Integration provides readers with a brief but comprehensive overview of topics related to the process of European integration in the post World War II period Its short chapters reflect the most up to date and concise research written by a collective of experts on their own subjects The aim of this book is twofold Firstly the text illustrates the broad and diverse range of issues associated with European integration and lastly the key approaches and findings are summarised Since institutional integration in Europe is an ongoing process with possibly frequent and sometimes rapid changes the chapters are intended to focus on the key features of the economic analyses of these topics A wide and diverse set of economic issues is of direct relevance for European integration These topics cover various fields ranging from the history of the European Economic and Monetary Union EU Trade Policy and the stability of international trade single market issues over fiscal monetary and other policies the crisis that faces the Euro area and institutions such as EU Council of Ministers Not surprisingly many of these issues have also been analysed from a European perspective This handbook is designed to provide students researchers the public and policy makers with ready and accessible knowledge of issues related to European integration and will provide the definitive overview of research in the area *The New Industrial Policy of the European Union* Adam A. approaches but rather on the expanding the scope of industrial economic activities within the framework of both the pre and post fabrication stages The book targets three market segments academics policy and decision makers at the EU national and regional level as well as business practitioners It includes a wide ranging analysis of different spheres of industrial policies conducted within the European Union making it of interest to an international audience Each chapter also offers detailed and valuable comments as well as conclusions that can be generally applied ensuring the book s universality The book presents the results of a research project conducted in the Collegium of World Economy at the Warsaw School of Economics

Shortlisted for the 2012 Prix Vogel in Economic Law Public procurement and competition law are both important fields of EU law and policy intimately intertwined in the creation of the internal market Hitherto their close connection has been noted but not closely examined This new work is the most comprehensive attempt to date to explain the many ways in which these fields often considered independent of one another interact and overlap in the creation of the internal market In this process of convergence between competition and public procurement law the need for this joint study is clearly apparent As such the book asks whether competition law principles inform or condition public procurement rules and whether they are adequate to ensure that competition is not distorted in markets where public procurement is particularly significant The book moves away from the classical focus of public procurement on the activities of private actors developing instead an analytical framework for the appraisal of the market behaviour of the public buyer from a competition perspective The analysis is both legal and economic Proceeding through a careful assessment of the general rules of competition and public procurement the book constantly tests the efficacy of the rules in competition and public procurement against a standard of the proper functioning of undistorted competition in the market for public procurement *Central and Eastern European Agriculture in an Expanding European Union* Stefan Tangermann, M. Banse, 2000-01-01 The problems caused by the proposed enlargement of the EU to include the associated Central and Eastern European countries CEEC are discussed in this book The two main agricultural issues raised by this are the relative competitiveness of CEEC agricultural policies *The European Union, the World Bank and the Policymaking of Aid* Eugenia Baroncelli, 2019-01-03 Based on the experience of the author an IPE scholar and former trade policy consultant at the World Bank WB the book offers an in depth exploration of the EU WB relations conceptualized as hybrid delegation Coupling cross time analyses of their interaction in the regions of the Middle East and North Africa Europe and Central Asia and Sub Saharan Africa with an original investigation on the coordination among the EU member states at the Executive Board of the International Bank for Reconstruction and Development over the voice and participation reform of 2008 2010 the book advances an innovative theoretical framework to assess the EU WB joint institutional and field policy performances Augmented PA models of delegation role theory and performance analyses are engaged and selectively recombined to investigate the nature evolution and impact of the interactions of the two organizations both in their everyday and constituent politics Hybrid delegation in motion is reconstructed against the background of post Washington Consensus and post Lisbon EU to unveil the changing division of labour between the two largest development multilaterals of the new global context The book will be of interest to scholars students and practitioners in European Politics Development International Relations International Political Economy and Global Economic Governance
