reinvigorate classic issues of monetary economics and take them to the frontier *Roads to Wisdom, Conversations with Ten Nobel Laureates in Economics* Karen Ilse Horn, 2009-01-01 This is a beautifully written and engaging book At its heart is a series of structured interviews with ten Nobel Memorial Laureates in Economics that provide fascinating insights into the main influences on their career paths and pioneering work Karen Horn is to be applauded not just for her wide ranging scholarship and thought provoking analysis but also for producing a non technical yet rigorous book which is eminently accessible to non specialists In short this an excellent volume which comes highly recommended Howard R Vane Liverpool John Moores University UK Karen Horn s questions are insightful her notes are accurate and informative and her summing up of the central question of creativity that she poses in the book is cogent and to the point All in all this book is difficult to put down and I can t imagine any reader who will not fail to learn a great deal about economics along the way Mark Blaug University of London and University of Buckingham UK Karen Horn s remarkable interviews with ten Nobel Laureates explore the conditions required for scientific progress by navigating the roads to wisdom in economic science How does progress in economic theory come about Where do path breaking ideas come from What is it that has enabled these outstanding scholars to make their substantial contributions How deep are the footprints of a particular historical situation how strong the political tide or the state of the art in economics and how influential is personal history on their individual roads to wisdom Analytical answers to these fundamental questions are presented in this insightful collection of deep and highly inspiring conversations with Nobel Laureates Paul A Samuelson Kenneth J Arrow James M Buchanan Robert M Solow Gary S Becker Douglass C North Reinhard Selten George A Akerlof Vernon L Smith and Edmund S Phelps Superbly supplemented with concise overviews of the Nobel Laureates lives and works these fascinating discussions culminate with a comprehensive inquiry into progress in economic theory As such this eloquent and highly accessible book will prove to be a compelling read for scholars and students of the discipline and all those with an interest in economics and the history of economic thought *Nonlinear Evolution of Spatial Economic Systems* Peter Nijkamp, Aura Reggiani, 2012-12-06 Is our world more dynamic than it used to be in the past Have phenomena in the social science field become unpredictable Are chaotic events nowadays occurring more frequently than in the past Such questions are often raised in popular debates on nonlinear evolution and self organizing systems At the same time many scientists are also raising various intriguing methodological issues Is it possible to separate deterministic chaos from random disturbances if their trajectories are almost similar Is prediction still possible in a world of chaos Poincare Is it possible to distinguish specification errors from measurement errors in a nonlinear dynamic model Is evolution a random process The list of such questions can easily be extended with dozens of others But despite the myriad of questions on problems of nonlinear evolution one common trait is evident in both the natural and the social sciences we are still groping in the dark in areas which are par excellence promising hunting grounds for exploratory and exploratory research viz structural grounds in an uncertain nonlinear world

The present book aims at offering a collection of refreshing contributions to the above research issues by focusing attention in particular on nonlinear dynamic evolution in space at the Netherlands Institute for Advanced Study NIAS in Wassenaar the Netherlands The Institute has to be thanked for its hospitality and support reflected inter alia in a workshop at which several of the papers included in this book were discussed
