The book delves into how AI technologies can be leveraged to promote social inclusion, drive entrepreneurship, and foster sustainable economic growth in diverse contexts. This book contributes to the existing literature by providing insights into the potential of AI in advancing inclusive innovation and sustainable development. Offering practical strategies, case studies, and best practices, this book is an excellent resource for policymakers, researchers, practitioners, and students interested in the intersection of AI, social entrepreneurship, and economic development.

service program but has no impact on its novelty Conversely the implementation of a proactive market orientation has a positive influence on both the meaningfulness and novelty of the program Furthermore the meaningfulness and novelty of the program contribute positively to the hospital's financial performance In terms of indirect effects the study identified mediation phenomena a responsive market orientation positively affects a hospital's financial performance through the meaningfulness of the service program while a proactive market orientation enhances financial performance through the novelty of the program

IMPLICATIONS The study contributes to the current understanding confirming the positive impact of a proactive market orientation on innovations within the organization while contradicting the view that a responsive market orientation supports these innovations Additionally the results support the idea that innovations within the organization have a positive impact on its outcomes The study also reveals specific mechanisms that influence market orientation on organizational outcomes indicating that a responsive orientation affects a service provider's outcomes through the meaningfulness of its service program while a proactive orientation influences outcomes through the novelty of the program The practical recommendations for hospital managers are as follows a to achieve a high level of meaningfulness in the service program it is advisable to implement both responsive and proactive market orientations b to attain a high level of novelty in the program a proactive market orientation is recommended c to enhance the hospital's financial performance it is suggested to develop a service program that is both meaningful and novel and to implement both responsive and proactive market orientations

ORIGINALITY AND VALUE The study's originality and value stem from its exploration of specific direct and indirect mechanisms through which market orientation affects hospital financial performance filling a prior research gap By investigating these mechanisms the study enhances the overall understanding of hospital management

Does ESG performance have an impact on financial performance Evidence from Turkey

PURPOSE Stakeholders such as consumers nongovernmental organizations and public institutions have increasingly pressured companies to adopt corporate social responsibility CSR policies This trend has led to the integration of environmental social and governance ESG reporting into business strategies to achieve long term competitive advantages and enhance financial performance ESG reporting has become a critical tool for measuring corporate CSR efforts contributing to the institutionalization of nonfinancial reporting standards This study aims to determine how the adoption of ESG sub dimensions affects the financial performance of companies in Turkey

METHODOLOGY The study employed panel regression analysis on data from 21 companies listed in the Borsa Istanbul 100 index over the period 2011-2020 to investigate the relationship between ESG sub dimensions and firm performance

FINDINGS The findings indicate that adopting the environmental and governance sub dimensions positively affects ROE and Tobin's Q However the adoption of the governance sub dimension negatively impacts Tobin's Q while positively influencing ROE No statistically significant results were found regarding the impact of ESG sub dimensions on

the sustainability and economic performance of Small and Medium sized Enterprises This research underscores firm size as a key moderator in the relationship between stakeholder pressures and CE adoption aiming to provide a comprehensive understanding of this dynamic in SMEs

METHODOLOGY Based on a cross sectional survey of 124 SMEs in Estonia Latvia and Lithuania with respondents primarily being owners and managers of firms a three step approach tested the proposed model for CE practices First Confirmatory Factor Analysis CFA was used to ensure that the observed variables represented latent constructs Second Ordinary Least Squares OLS and Weighted Least Squares WLS regression methods were used to control for factors influencing CE adoption Finally the interaction terms assessed the moderating role of firm size

FINDINGS The research shows that firm size moderates these effects with external stakeholder pressure significantly influencing CE adoption more than internal pressure These finding underscores how firm size shapes SMEs responses to stakeholder pressure when adopting CE practices

IMPLICATIONS This study provides empirical evidence that stakeholder pressure significantly influences SMEs in the Baltic States to adopt CE practices thus impacting economic and sustainability performance Smaller firms can enhance CE practices by strategically managing stakeholders whereas larger SMEs should align with external stakeholder expectations for more effective CE initiatives leading to improved organizational performance

ORIGINALITY AND VALUE This study demonstrates how stakeholder pressures drive CE practices and impact organizational sustainability and economic performance Firm size plays a crucial role as a moderator amplifying the influence of external stakeholder pressure on CE practices

Keywords Stakeholder Pressure Circular Economy Practices Small and Medium sized Enterprise Sustainability Performance Economic Performance Baltic States Capital structure specificity in knowledge intensive industries A comparative study of EU countries

PURPOSE This paper aims to examine and compare the capital structure patterns and financial decision making determinants of knowledge based firms and traditional industries in selected EU countries over the period 2000 2023 The study seeks to uncover sector specific features focusing on the unique financial behaviors of knowledge intensive enterprises compared to their traditional counterparts It also explores how factors such as asset structure profitability and growth opportunities influence capital structure decisions within these industries thus providing implications for financial management in innovation driven sectors

METHODOLOGY The methodology involves analyzing data from 12 EU countries categorized by industry sectors M and J for knowledge based firms and other sectors for traditional firms and firm size The research applies panel data modeling to evaluate the differences and influences on capital structure within these groups

FINDINGS The study reveals that knowledge based firms exhibit distinct capital structure characteristics including a higher reliance on intangible assets and lower ratios of long term debt compared to traditional firms Specifically the findings indicate that intangible assets are positively correlated with total and long term debt in knowledge based firms meaning that an increase in intangible asset value is associated with a corresponding increase in total and long term debt levels This relationship aligns with the modified pecking order theory which posits that firms

prioritize funding sources based on their perceived cost and risk The determinants of capital structure such as profitability and growth opportunities also demonstrate differing impacts revealing the unique financial strategies employed by knowledge based firms IMPLICATIONS This research highlights the importance of adapting financial strategies to the specific needs of knowledge based firms which often face unique challenges due to their reliance on intangible assets Policymakers can use these findings to design targeted financial policies that support the growth and sustainability of innovation driven enterprises such as by offering incentives for intangible asset financing or by reducing barriers to accessing long term debt For practitioners the insights highlight the need to align financial decision making with sector specific characteristics to optimize capital structure and drive competitive advantage ORIGINALITY AND VALUE This research makes a unique contribution by providing one of the first comparative analyses of capital structure determinants across knowledge based and traditional firms in multiple EU countries over an extended timeframe 2000 2023 Unlike prior studies which often focus on individual sectors or countries this study offers a comprehensive and cross sectoral perspective enriching the understanding of how financial theories operate in diverse economic and institutional contexts By addressing the financial behaviors of knowledge intensive firms the research bridges a critical gap in the literature and informs both academia and practice Keywords capital structure knowledge based firms traditional industries panel data regression EU countries innovation driven enterprises modified pecking order theory sector specific analysis
