Lecture Notes on Resource and Environmental Economics Anthony C. Fisher, 2020-06-26 This book based on lectures on natural and environmental resource economics offers a nontechnical exposition of the modern theory of sustainability in the presence of resource scarcity It applies an alternative take on environmental economics focusing on the economics of the natural environment including development computation and potential empirical importance of the concept of option value as opposed to the standard treatment of the economics of pollution control The approach throughout is primarily conceptual and theoretical though empirical estimation and results are sometimes noted Mathematics ranging from elementary calculus to more formal dynamic optimization is used especially in the early chapters on the optimal management of exhaustible and renewable resources but results are always given an economic interpretation Diagrams and numerical examples are also used extensively The first chapter introduces the classical economists as the first resource economists in their discussion of the implications of a limited natural resource base agricultural land for the evolution of the wider economy A later chapter returns to the same concerns along with others stimulated by the energy and environmental crises of the 1970s and beyond One section considers alternative measures of resource scarcity and empirical findings on their behavior over time Another introduces the modern concept of sustainability with an intuitive development of the analytics A chapter on the dynamics of environmental management motivates the concept of option value shows how to compute it then demonstrates its importance in an illustrative empirical example The closing chapter on climate change first projects future changes and potential catastrophic impacts then discusses the policy relevance of both option value and discounting for the very long run This book is intended for resource and environmental economists and can be read by interested graduate and advanced undergraduate students in the field as well

Change in the World Economy Phillip Anthony O'Hara, 2025-10-02 This book investigates eras of major geopolitical and socioeconomic power development relative demise and potential renewal for four major political economies It concentrates on the Dutch Golden Age of the late 1500s and 1600s British hegemony of the 1800s Pax Americana of the 1900s and Chinese potential hegemony of the 2000s as well as long wave patterns of change over successive centuries to the present and to some degree into the future Dutch British US and Chinese economies are situated within patterns of long term successive rise and fall and fall and rise of economic growth hegemony and climate change in the world political economy

including linkages between core periphery and semi periphery Patterns of multiple crises tend to appear in between hegemonic periods and climate change often undergoes complex dynamics through time while currently climate anomalies are emerging during mostly long wave downswings and polycrises in the world economy Contemporary themes of the book include the ongoing competition for world domination between the US and China the conflict over Ukraine Taiwan that some think may generate world war 3 the climate change crisis that continues to plague the world and whether the world and its major economies are likely to undergo a Golden Age into the future Chapter 7 of this book on US hegemony and long waves includes extracts of material that won the Myrdal Prize for Book of the Year Prize from EAEPE as well as Journal Article of the Year from Curtin Business School Ideas from parts of Chapter 9 emanate from a volume that won Book of the Year Award from CBS A climate change paper that won Journal Article of the Year Awards from EAEPE and CBS informed ideas that are used in several parts of this book The book outlines key stylized facts from the analysis and presents hypotheses for further investigation on the relationship between long term growth hegemony and climate change The book uses the work of Kondratiev Schumpeter and company themes in economic history modern political economy schools and the principles of political economy contingency paradigm to reformulate long wave hegemony and climate change hypotheses and empirics

Foundations of Real-World Economics John Komlos,2023-03-20 The 2008 financial crisis the rise of Trumpism and the other populist movements which have followed in their wake have grown out of the frustrations of those hurt by the economic policies advocated by conventional economists for generations Despite this textbooks remain frozen in time continuing to uphold traditional policies as though nothing has happened Foundations of Real World Economics demonstrates how misleading it can be to apply oversimplified models of perfect competition to the real world The math works well on college blackboards but not so well on the Main Streets of America This volume explores the realities of oligopolies the real impact of the minimum wage the double edged sword of free trade and other ways in which powerful institutions cause distortions in mainstream models Bringing together the work of key scholars like Kahneman Minsky and Schumpeter this textbook takes into consideration the inefficiencies that arise when the perfectly competitive model is applied to the real world dominated by multinational oligopolies The third edition has been updated throughout bringing in new material on the financial crises the rise of populism racism inequality climate change and the Covid 19 pandemic A must have for students studying the principles of economics as well as micro and macroeconomics this textbook redresses the existing imbalance in economic teaching as John Komlos focuses on the paradigm of humanistic economics **Austrian and German Economic Thought**

Kiichiro Yagi,2013-03-01 This book intends to renovate the view of social sciences in the German speaking world It explores the intellectual tension in the social science in Austria and Germany in the late nineteenth and early twentieth centuries It deals with how the emergence of the new school Austrian School changed the focus of social science in the German speaking world and how it prepared the introduction of an evolutionary perspective in economics politics and sociology Based on

mostly hitherto unknown primary evidence this development is lively described in a series of encounters and decisions by each social scientists Yearbook of Agriculture ,1929 *Preparation Division Notes* New York Public Library.
