**Church, State and Dynasty in Renaissance Poland** Natalia Nowakowska, 2017-03-02 This book provides the first comprehensive analysis of the career of Fryderyk Jagiellon 1468 1503 arguably the most powerful churchman in medieval or early modern Central Europe Royal prince bishop of Kraków Polish primate cardinal regent and brother to the rulers of Hungary Poland Bohemia and Lithuania Fryderyk was a leading dynastic politician diplomat ecclesiastic and cultural patron and a pivotal figure in three Polish royal governments Whereas Polish historians have traditionally cast Fryderyk as a miscreant and national embarrassment this study argues that he is in fact a figure of fundamental importance for our understanding of church and monarchy in the Renaissance who can enhance our grasp of the period in a variety of ways Jagiellon's career constitutes an ambitious state building programme executed in the three spheres of government ecclesiastical governance and cultural patronage which reveals the multi dimensional ways in which Renaissance monarchies might exploit the local church to their own ends This book also offers a rare English language insight into the development of the Reformation in central Europe and an analysis of the reigns of Kazimierz IV 1447 92 Jan Olbracht 1492 1501 Aleksander 1501 6 Poland's evolving constitution her foreign policy Jagiellonian dynastic strategy and above all the tripartite relationship between church Crown and state

[The Oxford History of Poland-Lithuania](#) Robert I. Frost, 2018-07-16 The history of eastern Europe is dominated by the story of the rise of the Russian empire yet Russia only emerged as a major power after 1700 For 300 years the greatest power in Eastern Europe was the union between the kingdom of Poland and the grand duchy of Lithuania one of the longest lasting political unions in European history Yet because it ended in the late eighteenth century in what are misleadingly termed the Partitions of Poland it barely features in standard accounts of European history The Making of the Polish Lithuanian Union 1385 1569 tells the story of the formation of a consensual decentralised multinational and religiously plural state built from below as

much as above that was founded by peaceful negotiation not war and conquest From its inception in 1385 a vision of political union was developed that proved attractive to Poles Lithuanians Ruthenians and Germans a union which was extended to include Prussia in the 1450s and Livonia in the 1560s Despite the often bitter disagreements over the nature of the union these were nevertheless overcome by a republican vision of a union of peoples in one political community of citizens under an elected monarch Robert Frost challenges interpretations of the union informed by the idea that the emergence of the sovereign nation state represents the essence of political modernity and presents the Polish Lithuanian union as a case study of a composite state The modern history of Poland Lithuania Ukraine and Belarus cannot be understood without an understanding of the legacy of the Polish Lithuanian union This volume is the first detailed study of the making of that union ever published in English

**Rulers and Rulership in the Arc of Medieval Europe, 1000-1200** Christian Raffensperger,2023-08-24 Rulers and Rulership in the Arc of Medieval Europe challenges the dominant paradigm of what rulership is and who rulers are by decentering the narrative and providing a broad swath of examples from throughout medieval Europe Within that territory the prevalent idea of monarchy and kingship is overturned in favor of a broad definition of rulership This book will demonstrate to the reader that the way in which medieval Europe has been constructed in both the popular and scholarly imaginations is incorrect Instead of a king we have multiple rulers male and female ruling concurrently Instead of an independent church or a church striving for supremacy under the Gregorian Reform we have a pope and ecclesiastical leaders making deals with secular rulers and an in depth interconnection between the two Finally instead of a strong centralizing polity growing into statehood we see weak rulers working hand in glove with weak subordinates to make the polity as a whole function Medievalists Byzantinists and Slavists typically operate in isolation from one another They do not read each other s books or engage with each other s work This book requires engagement from all of them to point out that the medieval Europe that they work in is one and the same and demands collaboration to best understand it

**The Bioarchaeology of Urbanization** Tracy K. Betsinger, Sharon N. DeWitte, 2020-11-05 Urbanization has long been a focus of bioarchaeological research but what is missing from the literature is an exploration of the geographic and temporal range of human biological demographic and sociocultural responses to this major shift in settlement pattern Urbanization is characterized by increased population size and density and is frequently assumed to produce negative biological effects However the relationship between urbanization and human health requires careful examination given the heterogeneity that exists within and between urban contexts Studies of contemporary urbanization have found both positive and negative outcomes which likely have parallels in past human societies This volume is unique as there is no current bioarchaeological book addressing urbanization despite various studies of urbanization having been conducted Collectively this volume provides a more holistic understanding of the relationships between urbanization and various aspects of human population health The insight gained from this volume will provide not only a better understanding of urbanization in our past but it will also have potential implications for those studying urbanization in contemporary communities
