Walter Olthoff, 2003-05-16 For the ninth time now the European Conference on Object Oriented Programming provides a mid summer gathering place for researchers practitioners students and newcomers in the field of object technology Despite fierce competition from an increasing number of attractive conferences on object related topics ECOOP has successfully positioned itself as the premier European object technology conference One reason is without doubt the composition of the conference week and the nature of its events Running in parallel on the first two days a comprehensive tutorial program and a very selective workshop program are offered to attendees This is followed by a three day technical program organized in a single track providing a highly communicative atmosphere of scientific exchange and learning Overlapping with these events are a two day industrial exhibition and a two day opportunity for non industrial system developers to demonstrate their software Thus ECOOP is not just a conference on programming but an event touching on the full spectrum of object technology This volume constitutes the proceedings of the Ninth European Conference on Object Oriented Programming ECOOP held in Aarhus Denmark August 7 11 1995 Previous ECOOP conferences were held in Paris France Oslo Norway Nottingham England Ottawa Canada jointly with OOPSLA Geneva Switzerland Utrecht the Netherlands Kaiserslautern Germany and Bologna Italy Object technology continues to increase its impact on the corporate world [Subject Guide to Books in Print](#), 1991 *Proceedings*, 2001 Papers from a November 2001 workshop present the work of researchers and practitioners working on theory techniques and applications that concern analysis and manipulation of the source code of computer systems Specific topics include application maintenance using software agents a source to source compiler for generating dependable software detecting dead statements for concurrent programs finding code on the World Wide Web and identifying clones in the Linux Kernel Other subjects include measurement and analysis of runtime profiling data for Java programs preserving the documentary structure of source code in language based transformation tools and type infeasible call chains This work lacks a subject index c Book News Inc
