## **Edwin Buzz Aldrin:**

*Men from Earth* Buzz Aldrin, Jr., 2004-01-01 On July 20 1969 Apollo 11 astronauts Buzz Aldrin and Neil Armstrong landed their Lunar Module on the moon's Sea of Tranquility and became the first two humans to walk on the moon This unprecedented heroic endeavor was witnessed by the largest worldwide television audience in history Marking the 20th Anniversary of the Apollo 11 lunar landing Buzz publishes *Men From Earth* a detailed and astonishing account of America's race with the Soviets to the moon The book ends with an epilogue venturing Outward which looks toward future space travel through the year 2009 The book comes with original photo of Buzz Aldrin signing the book's Certificate of Authenticity

Lifetime Guarantee of Authenticity and a two part Hologram *Return to Earth* Buzz Aldrin, Wayne Warga, 2015-12-15 Apollo 11 astronaut Buzz Aldrin's courageous candid memoir of his return to Earth after the historic moon landing and his personal struggle with fame and depression We landed with all the grace of a freight elevator Buzz Aldrin relates in the opening passages of *Return to Earth* remembering Command Module Columbia's abrupt descent into the gravity of the blue planet With that splash Aldrin takes readers on a journey through the human side of the space program as one of the first two men to land on the moon learns to cope with the pressures of his new public persona In honest and compelling prose Aldrin reveals a side of instant fame for which West Point and NASA could never have prepared him One day a fighter pilot and engineer the next a cultural hero burdened with the adoration of thousands Aldrin gives a poignant account of the affair that threatened his marriage as well as his descent into alcoholism and depression that resulted from trying to be too many things to too many people He didn't realize that when he landed on his home planet his odyssey had just begun As Aldrin puts it I traveled to the moon but the most significant voyage of my life began when I returned from where no man had been before *Return to Earth* is a powerful and moving memoir that exposes the stresses suffered by those in the Apollo program and the price Buzz Aldrin paid when he became an American icon **Magnificent Desolation** Buzz Aldrin, Ken

Abraham, 2009-06-23 Forty years ago Buzz Aldrin became the second human minutes after Neil Armstrong to set foot on a celestial body other than the Earth The event remains one of mankind's greatest achievements and was witnessed by the largest worldwide television audience in history In the years since millions more have had their Earth-centric perspective unalterably changed by the iconic photograph of Aldrin standing on the surface of the moon the blackness of space behind him and his fellow explorer and the Eagle reflected in his visor Describing the alien world he was walking upon he uttered the words magnificent desolation And as the astronauts later sat in the Eagle waiting to begin their journey back home knowing that they were doomed unless every system and part on board worked flawlessly it was Aldrin who responded to Mission Control's clearance to take off with the quip Roger Understand We're number one on the runway The flight of Apollo 11 made Aldrin one of the most famous persons on our planet yet few people know the rest of this true American hero's story In *Magnificent Desolation* Aldrin not only gives us a harrowing first person account of the lunar landing that came within

seconds of failure and the ultimate insider's view of life as one of the superstars of America's space program he also opens up with remarkable candor about his more personal trials and eventual triumphs back on Earth From the glory of being part of the mission that fulfilled President Kennedy's challenge to reach the moon before the decade was out Aldrin returned home to an Air Force career stripped of purpose or direction other than as a public relations tool that NASA put to relentless use in a seemingly nonstop world tour The twin demons of depression and alcoholism emerged the first of which Aldrin confronted early and publicly and the second of which he met with denial until it nearly killed him He burned through two marriages his Air Force career came to an inglorious end and he found himself selling cars for a living when he wasn't drunkenly wrecking them Redemption came when he finally embraced sobriety gained the love of a woman Lois who would become the great joy of his life and dedicated himself to being a tireless advocate for the future of space exploration not only as a scientific endeavor but also as a thriving commercial enterprise These days Buzz Aldrin is enjoying life with an enthusiasm that reminds us how far it is possible for a person to travel literally and figuratively As an adventure story a searing memoir of self destruction and self renewal and as a visionary rallying cry to once again set our course for Mars and beyond Magnificent Desolation is the thoroughly human story of a genuine hero     *Buzz Aldrin* Elizabeth Raum,2005-12-28 An introduction to Buzz Aldrin the first astronaut to walk on the moon discussing his childhood in New Jersey his education and military service his career at NASA and his later life     No Dream Is Too High Buzz Aldrin,Ken Abraham,2016-04-05 Beloved American hero and astronaut Buzz Aldrin reflects on the wisdom guiding principles and irreverent anecdotes he's gathered both in outer space and on earth through his event filled life in this inspiring guide to life for the next generation Everywhere he goes crowds gather to meet Buzz Aldrin He is a world class hero a larger than life figurehead best known of a generation of astronauts whose achievements surged in just a few years from first man in space to first men on the moon Now he pauses to reflect and share what he has learned from the vantage point not only of outer space but also of time still a non stop traveler and impassioned advocate for space exploration Aldrin will be 86 in 2016 No Dream Is Too High whittles down Buzz Aldrin's event filled life into a short list of principles he values each illustrated by fascinating anecdotes and memories such as Second comes right after first NASA protocol should have meant he was first on the moon but rules changed just before the mission How he learned to be proud of being the second man on the moon Look for opportunities not obstacles Buzz was rejected the first time he applied to be an astronaut Failure is an opportunity to learn to do better Always maintain your spirit of adventure For his 80th birthday Buzz went diving in the Galapagos and hitched a ride on a whale shark He stays fit energetic and fascinated with life No Dream Is Too High is a beautiful memento a thought provoking set of ideas and a new opportunity for Buzz Aldrin to connect with the masses of people who recognize his unique place in human history

**Welcome to Mars** Buzz Aldrin, Marianne J. Dyson, 2015 The Apollo 11 astronaut invites young people to evaluate Mars as a potential planet for human colonization and describes what Mars residents might experience while traveling to and living on the Red Planet Buzz Aldrin (National Geographic Kids Readers, Level 3)

Kitson Jazynka, 2018 Biography of Buzz Aldrin for beginner readers *Beyond Flagpoles and Footprints: Pioneering the Space Frontier* Buzz Aldrin, Larry Bell, 2021-11-30 Advancements in rocketry spacecraft and instruments of exploration have opened an epic new era of cosmic discovery Complex challenges driving such achievements yielded countless technological advancements and business opportunities that continue to enhance the quality of our everyday lives In total these advancements have expanded human experience while making our world seem smaller Buzz Aldrin and Larry Bell bring us up to date on the current state of space exploration and make a case for establishing a permanent human presence on Mars Neil Armstrong and Buzz Aldrin Charles River Editors, 2019-05-30 Includes pictures Includes a bibliography for further reading I guess we all like to be recognized not for one piece of fireworks but for the ledger of our daily work Neil Armstrong Some things just can t be described And stepping onto the moon was one of them Buzz Aldrin At 9 32 a m on July 16 1969 time stood still throughout the world as thousands converged on the Kennedy Space Center and millions tuned in on live television At that instant the first rumbles began to shake the ground as a small spacecraft attached to the giant Saturn V rocket several hundred feet tall started lifting off Quickly being propelled several thousand miles per hour it takes just a few minutes to reach a speed of 15 000 miles per hour and just a few more minutes to enter orbit at 18 000 miles per hour Apollo 11 was on its way to a historic first landing on the Moon Apollo 11 s trip to the Moon may have started on that day in 1969 but the journey had begun over a decade earlier as part of the Space Race between the United States and the Soviet Union While landing on the Moon was a noble goal proposed as early as 1961 by President Kennedy NASA and the nation as a whole moved with urgency simply to best the Soviet Union which had spent the 1950s beating America to important space related firsts including launching the first satellite and cosmonaut in orbit In fact President Eisenhower s administration began the design for the Apollo program in 1960 in hopes of getting a head start to the Moon

despite the fact the plans originated a year before the first Russian cosmonaut Yuri Gagarin orbited the Earth and two years before John Glenn did. Over the decade NASA would spend tens of billions on the Apollo missions, the most expensive peacetime program in American history to that point, and even though Apollo 11 was only one of almost 20 Apollo missions, it was certainly the crown jewel, only one of nearly 20 Apollo missions conducted by NASA. And to make Apollo 11 a success, it would take nearly a decade of planning by government officials, hard work by NASA scientists, intense training by the astronauts, and several missions preceding Apollo 11. It also cost over 20 billion, making the Apollo program the most expensive peacetime program in American history at the time. When the Apollo program reached its pinnacle, the man at the center of it was Neil Armstrong, a farm boy and pilot who rose from a hardworking rural home to become the first to set foot on the Moon and utter one of the 20th century's most famous phrases: "That's one small step for man, one giant leap for mankind." Armstrong did so through education, first in high school and later at Purdue University, a lot of hard work as a pilot during and after the Korean War, and some luck coming of age at a moment when the Space Race was in full effect. After reaching the peak of his fame and career at the young age of 40, Armstrong spent the second half of his life as he had the first: working hard and serving his country. In doing so, he serves as one of the best examples of national pride and service that America has ever known. Alongside him was Buzz Aldrin, which was somewhat fitting given his family's past. His father was a military test pilot, and Aldrin would follow a similar path on his way to becoming a member of the Gemini program and ultimately the Apollo 11 mission. Despite reaching the peak of his fame and career before the age of 40, Aldrin has continued to work in the field and has been one of the most effective advocates of further space travel, particularly to Mars. Neil Armstrong and Buzz Aldrin: The Lives and Careers of the First Men on the Moon profiles both astronauts and the most memorable space mission in history. Along with pictures of important people, places, and events, you will learn about Neil Armstrong and Buzz Aldrin like never before.
