Eec Financial Services Cases:

Intermediation of Insurance and Financial Services in European VAT Claus Bohn Jespersen, 2011-01-01 The current European VAT legislation encompassing insurance and financial services including intermediation thereof dates back to the adoption of the Sixth VAT Directive in 1977 The definitions do not however encompass the current complexity of insurance and financial transactions This has resulted in considerable confusion for fiscal authorities and for businesses when deciding upon the application of the VAT exemption As the correct VAT treatment has a significant economic impact on businesses a great number of cases have been referred to the Court of Justice of the European Union This is also the reason why the European Commission presented its proposal for the future treatment of insurance and financial services including intermediation thereof in November 2007 The political process has not yet been finalised and if the Commission's proposal is agreed upon the question of understanding the definitions still exists This book deals with the exemption for intermediation of insurance and financial services within European VAT This implies analysing the methods of interpretation applied by the Court of Justice of the European Union when interpreting the provisions regarding insurance and financial services Furthermore the current definitions for intermediation of insurance and financial services as provided for in the VAT Directive are analysed and conclusions are made in order to define a single concept of intermediation These analyses are followed by various practical scenarios from case law of the Member States concerning intermediation of insurance and financial services Finally comments based on the analyses carried out are given on the European Commission's proposal for amending the VAT Directive and the accompanying Regulation regarding intermediation of insurance and financial services

integration of the markets from a legal point of view provides an opportunity to highlight the role of globalisation as the key element favouring the circulation of rules models and especially the development of new regulatory sources The book examines market transactions and the institutes at the root of these transactions including the type of legislative sources in force and the subjects acting as legislators The first part of the book concentrates on the micro discipline of money debts payments and financial instruments The second part goes on to analyse the macro context of integration of the markets looking at the persistence of legal barriers and options for their removal as well as the development of new legal sources as a consequence of the transfer of monetary and political sovereignty Finally the book draws links between the two parts and assesses the consequences of the changes at the macro level of regulation on the micro level of legal discipline of monetary obligations particularly focusing on the emergence and growing importance of soft law Bulletin of the European Union, 1996 EU Banking and Financial Regulation Jean-Baptiste Poulle, Arut Kannan, Nicolas Spitz, Sandra Kahn, Anastasia Sotiropoulou, 2024-03-14 EU Banking and Financial Regulation presents a comprehensive and systematic overview of the major directives and regulations which currently govern the EU s banking and finance industries Offering a depiction of the main EU rules this timely book not only addresses the various banking and financial legislations relating to EU supervisors banks and financial markets but also considers more peripheral issues such as anti money laundering whilst referring to important case law
