Engineering Education Firoz Alam, Alexandra Kootsookos, 2020-12-17 This book details the key concepts objectives and processes relating to the professional accreditation of engineering bachelor honours degrees The contemporary context of accreditation is examined in terms of the globalised nature of both the engineering profession and higher education Examples of the processes relating to single and dual accreditation are provided with examination of the Washington Accord and the requirements of the European Network for Accreditation of Engineering Education Details are also provided as to how learning outcomes can be structured to demonstrate compliance with accreditation criteria The final chapters deal briefly with quality assurance processes used in education and the current international quality ranking systems which exist This book will provide the reader with a detailed examination of outcome based education within the context of Bachelor of Engineering honours degrees A key feature of this book is the side by side comparison of different accreditation criteria and a thorough discussion of the relatively new phenomenon of dual accreditation The book seeks to provide a very clear explanation and exploration of accreditation within

the context of engineering education and will benefit those practitioners involved in the accreditation process

Empowering Professional Teaching in Engineering John Heywood, 2022-05-31 Each one of us has views about education how discipline should function how individuals learn how they should be motivated what intelligence is and the structures content and subjects of the curriculum Perhaps the most important beliefs that beginning teachers bring with them are their notions about what constitutes good teaching The scholarship of teaching requires that beginning teachers should examine evaluate these views in the light of knowledge currently available about the curriculum and instruction and decide their future actions on the basis of that analysis Such evaluations are best undertaken when classrooms are treated as laboratories of inquiry research where teachers establish what works best for them Two instructor centred and two learner centred philosophies of knowledge curriculum and instruction are used to discern the fundamental basic questions that engineering educators should answer in respect of their own beliefs and practice They point to a series of classroom activities that will enable them to challenge their own beliefs and at the same time affirm develop or change their philosophies of knowledge curriculum and instruction
