**Products: Theoretical Research And Reform Solutions** Hong Sheng,Pu Qian,2015-01-26 This book provides a comprehensive and unique perspective on China's oil and natural gas industry and a practical roadmap to reforms. The book begins with a thorough examination of the status quo of China's oil and natural gas industry. It explores the evolution, transition, and characteristics of the oil industry of China and unveils the problems that caused ineffectiveness of the oil and petroleum products market, namely the dominance of monopoly enterprises, price regulation, and restriction to entry. It provides an insightful analysis on the efficiency losses and welfare losses the monopoly system brings to the society as the current system distorts income distribution, violates the principle of fairness, and stands against the market rules and the legal pillars of the Chinese constitution. This book argues that the monopoly system in the oil industry of China results in a variety of toxic influences and that reforms are needed. It then offers a roadmap to reforms in the oil and petroleum products market in an incremental fashion. The findings and proposals of the Chinese version of this book have proved to be successful as they led to immediate shifts in the policies of the Chinese authorities. This book provides valuable insights into the urgency involved in carrying out reforms in the oil and petroleum products market in China with concrete and up-to-date statistics, comprehensive and detailed analyses, and authoritative and authentic sources. **China's Deep Reform** Lowell Dittmer,Guoli Liu,2006-03-28 This reader offers the most comprehensive assessment of Chinese domestic politics available by bringing together the best recent scholarship in the field. The anthology focuses on the origin, content, and significance of the post-1989 phase of China's reform and opening to the China's State Owned Enterprise Reforms Leila Fernandez-Stembridge,Juan Antonio Fernandez,2007-01-24 Much has been written on China's State Owned Enterprises (SOEs) reform following the restructuring impact on China's economic reform process in the last decade. However, as a major root of social and economic change, little has been discussed beyond a description of SOEs' shortcomings and their overall impact on the economy. This book provides a more in-depth analysis of SOEs by assessing the transformation process of eleven specific industries with reference to the state of competition, the influence of WTO membership, and the challenges these industries face in the future. Importantly, the authors also provide a personal perspective alongside the industry analysis with eleven case studies of firms actually undergoing this restructuring process, including interviews with crucial agents of reform such as CEOs and GMs. The provision of both a macro and business perspective of SOEs' reforms provides the reader with a complete and accurate insight into the economic, social, and business reality of China today. China's State Owned Enterprises Reforms will therefore be essential reading for those interested in the Chinese economy and Chinese business, as well as economists, foreign investors, MBA and EMBA students, and scholars specializing in emerging or transitional economies.
