Efficiency and Effort Barbara Grier, David Wright, International American Institute (Washington, D.C.), Joanna Richardson, Vittorio B. Venturini, Wilhelm Baldamus, 1968 *Supervision and Authority in Industry* Patricia Van den Eeckhout, 2009-08-01 The number of studies discussing the labour relationship under industrial capitalism is overwhelming but the literature on labour and its concrete day today shop floor practices is much less abundant How and by whom workers were supervised is one of the neglected aspects in the history of labour relations After an insightful introductory chapter discussing the different forms of supervision in the United States Britain France and Germany before the First World War the case studies in this volume focus on foremen vital but largely unstudied figures in the history of factory life labour relations and management Illustrating the multiple faces of the foreman the contributors examine the artisanal sector textiles mining printing engineering heavy manufacturing and car industries in Western Europe and show that the foreman was a multifaceted character who possessed technical expertise in addition to educational and organizational qualities This comprehensive volume is further enhanced by comparisons with practices of supervision in Russia Japan China and India

The Sociology of Wilhelm Baldamus Mark Erickson, Charles Turner, 2016-03-03 Wilhelm Gi Baldamus 1908 1991 was one of the most distinctive voices in British sociology in the second half of the twentieth century He made major contributions to both industrial sociology and sociological theory yet many of his central concerns remain under explored This volume is the first of its kind to engage with these questions and Baldamus responses in combination with the publication of two of Baldamus s own later writings never before printed in English A substantial biographical introduction by the editors situates this work within the context of Baldamus s life both before and after his exile from Nazi Germany adding background to the exploration of his concerns that research should be underpinned by meticulous theoretical and conceptual work It will be of interest to sociologists social theorists intellectual historians and those working in the field of social science research methods **Managing the Modern Workplace** Alan Booth, 2017-05-15 A recurring theme in the history of modern Britain in the twentieth century has been the failure of its manufacturing industry and the record of disorder and conflict in the industrial workplace This image was reinforced by the evidence of national strikes from the 1960s until 1984

This emphasis on decline and disorder in British manufacturing has distorted our understanding of workplace relationships and cultures in the post war years This volume provides a fresh assessment of the diverse and complex world of the workplace and Britain's production cultures during the long boom Essays investigate the public and private sectors and both manufacturing and service industries The volume begins with a comparison of labour management in the post war automobile industry exploring the role of the foreman in the management of shop floor labour in Britain and the USA The following two essays are concerned with relations between management and workers in the publicly owned corporations The first examines negotiations over pay and effort at the Swindon locomotive works including the cultural values which informed the behaviour of the bargainers The second investigates managerial responses to technical change in the British gas industry We then move into the service sector with an essay on the management of clerical staff in banks including a discussion of the different roles available to male and female workers and the incorporation of automated technologies The final essay looks at the involvement of the unions in workplace productivity and the extent to which Labour politics informed union behaviour The essays in this volume shed new light on the reasons for Britain's economic performance and opens up earlier interpretations of national decline and adversarial workplace cultures for further debate

McGovern,Stephen Hill,Colin Mills,Michael White,2007-12-06 Much of the received wisdom about the world of work emphasizes the marketization of the employment relationship the decline of class based forms of inequality and the individualization of employment relations Non standard forms of employment the delayering of organizational hierarchies and the use of individual performance based payment systems are all held up as examples of a new neo liberal order in which employers and employees no longer feel a sense of obligation to each other Drawing on a range of employee and employer surveys including the authors own Working in Britain 2000 survey this ambitious study presents a comprehensive examination of the conditions attitudes and experiences of British employees from the mid 1980s to the early years of this century The authors analyses provides a compelling critique of the received wisdom while also providing an original alternative account of recent developments in work and labour markets Along the way the book covers such topical issues as the changing nature of trade union membership the consequences of Britain s long hours culture and the apparent inability of women to ask for pay rises Significantly the authors seek to reposition debates about the future of work by restoring the concepts of contracts and social class to the analysis of the employment relationship Based on the ESRC funded Future of Work research programme this book is destined to shape our understanding of employment in Britain for the foreseeable
