Eighteenth Century Studies Peter Gay,1975 Eighteenth Century Studies Arthur McCandless Wilson,1972 **The Writings of Arthur M. Wilson from Eighteenth Century Studies** Mary Tolford Wilson,1986 *Eighteenth-Century Studies Presented to Arthur Wilson* Sterling Professor of History Peter Gay,1972-12-15 **Eighteenth Century Studies** Arthur McCandless Wilson,1975 **Popular science and public opinion in eighteenth-century France** Michael Lynn,2018-02-28 In this book Michael R Lynn analyses the popularisation of science in Enlightenment France He examines the content of popular science the methods of dissemination the status of the popularisers and the audience and the settings for dissemination and appropriation Lynn introduces individuals like Jean Antoine Nollet who made a career out of applying electric shocks to people and Perrin who used his talented dog to lure customers to his physics show He also examines scientifically oriented clubs like Jean Fran ois Pil tre de Rozier s Mus e de Monsieur which provided locations for people interested in science Phenomena such as divining rods used to find water and ores as well as to solve crimes and balloons the most spectacular of all types of popular science demonstrate how people made use of their new knowledge Lynn s study provides a clearer understanding of the role played by science in the Republic of Letters and the participation of the general population in the formation of public opinion on scientific matters **The Sinews of Power** John Brewer,2002-09-11 First published in 1989 The book is a distinguished work of importance to students of governmental development generally It is written in a fluent non technical manner that should reach a wide audience *American Historical Review* **Electricity and Experimental Physics in Eighteenth-Century Europe** R.W. Home,2024-10-28 At the beginning of the 18th century there was no science of physics as we recognise it today by the early years of the nineteenth century there was The articles in this volume are concerned with the process by which this came about They focus in particular on the rise of experimental physics and the interactions between experiment theory and mathematics in the study of electricity and to a lesser extent magnetism and physical optics during this period Along the way they provide a significant reassessment of Isaac Newton s influence on the science of his successors A further recurring theme is the process by which ideas were disseminated within the expanding scientific community of the day and the manner of their reception often in a form somewhat different from that envisaged by their first inventors as Professor Home argues took place in the case of Franklin The social and intellectual context of the scientist indeed is the specific subject of several essays dealing not only with England and France but also offering new insights into the position of science in 18th century Russia Au d but du 18e s la science physique telle que nous l entendons de nos jours n existait pas d s les premi res ann es du 19e s cela n tait plus le cas Les articles contenus dans ce volume s int ressent au proc d qui a provoqu ce changement Ils s attachent plus particuli rement la mont e de la physique exp rimentale et l interaction entre exp rience th orie et math matiques en ce qui concerne l tude de l lectricit et dans une moindre mesure celle du magn tisme et de l optique physique durant cette p riode Ce faisant les tudes fournissent une r

valuation significative de l'influence d'Isaac Newton sur la science de ses successeurs Un autre thème est celui du processus par lequel les idées étaient disséminées à l'époque au sein d'une communauté scientifique en pleine expansion Enlightenment, Passion, Modernity Mark S. Micale, Robert L. Dietle, Peter Gay, 2000 Enriched by the methods and insights of social history the history of mentalités linguistics anthropology literary theory and art history intellectual and cultural history are experiencing a renewed vitality The far ranging essays in this volume by an internationally distinguished group of scholars represent a generous sampling of these new studies Elements of Early Modern Physics J. L. Heilbron, 2024-03-29 Elements of Early Modern Physics comprises the two long introductory chapters of J L Heilbron's monumental work Electricity in the 17th and 18th Centuries A Study of Early Modern Physics plus a concluding summary of the remaining chapters Heilbron opens with a presentation of the general principles of physical theory and a description of the institutional frameworks in which physics were cultivated in the seventeenth and eighteenth centuries He argues that the single most important contributor to physics in the seventeenth century was the Catholic Church In the first half of the eighteenth century Cartesian and Newtonian physicists disagreed over principles but thought in similar terms and cultivated the same sort of qualitative natural philosophy Work towards an exact physics which took on important dimensions after 1770 confounded the programs of both Heilbron shows that by attending too closely to the Copernican revolution and the confrontation of great philosophical systems historians have seriously misjudged the character of early modern science This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1982 Poetry and the Creation of a Whig Literary Culture 1681-1714 Abigail Williams, 2005-03-24 Poetry and the Creation of a Whig Literary Culture offers a new perspective on early eighteenth century poetry and literary culture arguing that long neglected Whig poets such as Joseph Addison John Dennis Thomas Tickell and Richard Blackmore were more popular and successful in their own time than they have been since These and other Whig writers produced elevated poetry celebrating the political and military achievements of William III's Britain and were committed to an ambitious project to create a distinctively Whiggish English literary culture after the Revolution of 1688 Far from being the penniless hacks and dunces satirized by John Dryden and the Scriblerians they were supported by the patronage of the wealthy Whig aristocracy and their works promoted as a new English literature to rival that of classical Greece and Rome Poetry and the Creation of a Whig Literary Culture maps for the first time the evolution of an alternative early eighteenth century poetic tradition which is central to our understanding of the literary history of the period **Eighteenth-century English Literary Studies** Waldo Sumner Glock, 1984 Geography and Enlightenment David N. Livingstone, Charles W. J. Withers, 1999-12-15 Geography and Enlightenment explores both the Enlightenment as a geographical phenomenon and the

place of geography in the Enlightenment From wide ranging disciplinary and topical perspectives contributors consider the many ways in which the world of the long eighteenth century was brought to view and shaped through map and text exploration and argument within and across spatial and intellectual borders The first set of chapters charts the intellectual and geographical contexts in which Enlightenment ideas began to form including both the sites in which knowledge was created and discussed and the different means used to investigate the globe Detailed explorations of maps created during this period show how these new ways of representing the world and its peoples influenced conceptions of the nature and progress of human societies while studies of the travels of people and ideas reveal the influence of far flung places on Enlightenment science and scientific credibility The final set of chapters emphasizes the role of particular local contexts in Enlightenment thought Contributors are Michael T Bravo Paul Carter Denis Cosgrove Stephen Daniels Matthew Edney Anne Marie Claire Godlewska Peter Gould Michael Heffernan David N Livingstone Dorinda Outram Chris Philo Roy Porter Nicolaas Rupke Susanne Seymour Charles Watkins and Charles W J Withers **Studies in Burke and His Time** ,1974

Western Political Thought Robert Eccleshall, Michael Kenny, 1995 This is a guide to the vast amount of literature on the history of political thought which has appeared in English since 1945 The editors provide an annotation of the content of many entries and where appropriate indicate their significance controversial nature and readability

Utopia's Garden E. C. Spary, 2010-12-15 The royal Parisian botanical garden the Jardin du Roi was a jewel in the crown of the French Old Regime praised by both rulers and scientific practitioners Yet unlike many such institutions the Jardin not only survived the French Revolution but by 1800 had become the world's leading public establishment of natural history the Muséum d'Histoire Naturelle E C Spary traces the scientific administrative and political strategies that enabled the foundation of the Muséum arguing that agriculture and animal breeding rank alongside classification and collections in explaining why natural history was important for French rulers But the Muséum's success was also a consequence of its employees Revolutionary rhetoric by displaying the natural order they suggested the institution could assist in fashioning a self educating self policing Republican people Natural history was presented as an indispensable source of national prosperity and individual virtue Spary's fascinating account opens a new chapter in the history of France science and the Enlightenment

The English Novel, 1700-1740 Robert Letellier, 2003-02-28 The English novel written between 1700 and 1740 remains a comparatively neglected area In addition to Daniel Defoe whose Robinson Crusoe and Moll Flanders are landmarks in the history of English fiction many other authors were at work These included such women as Penelope Aubin Jane Barker Mary Davys and Eliza Haywood who made a considerable contribution to widening the range of emotional responses in fiction These authors and many others continued writing in the genres inherited from the previous century such as criminal biographies the Utopian novel the science fictional voyage and the epistolary novel This annotated bibliography includes entries for these works and for critical materials pertinent to them The volume first seeks to establish the existing studies of the era along with anthologies It then provides entries for a wide ranging selection of works which cover fictional theoretical historical political and cultural topics to provide a comprehensive background to the unfolding and understanding of prose fiction in the early 18th century This is followed by an alphabetical listing of novels their editions and any critical material available on each The next section provides a chronological record of significant and enduring works of fiction composed or translated in this period The volume concludes with extensive indexes

Sensibility in Transformation Sydney McMillen Conger, 1990-03 Focusing on the period from about 1690 to 1890 these essays depict an age of sensibility that was in transformation New connections are revealed between sensibility and other key preoccupations of the age including the feminine ideal and the poetic imagination

The Books that Made the European Enlightenment Gary Kates, 2022-08-11 In contrast to traditional Enlightenment studies that focus solely on authors and ideas Gary Kates employs a literary lens to offer a wholly original history of the period in Europe from 1699 to 1780 Each chapter is a biography of a book which tells the story of the text from its inception through to the revolutionary era with wider aspects of the Enlightenment era being revealed through the

narrative of the book's publication and reception. Here Kates joins new approaches to book history with more traditional intellectual history by treating authors, publishers, and readers in a balanced fashion throughout. Using a unique database of 18th-century editions representing 5,000 titles, the book looks at the multifaceted significance of bestsellers from the time. It analyses key works by Voltaire, Adam Smith, Madame de Graffigny, Jean-Jacques Rousseau, and David Hume and champions the importance of a crucial innovation of the age: the rise of the erudite blockbuster, which for the first time in European history helped to popularize political theory among a large portion of the middling classes. Kates also highlights how, when, and why some of these books were read in the European colonies, as well as incorporating the responses of both ordinary men and women as part of the reception histories that are so integral to the volume.
