Architectural Forum ,1923 **The Conservation Movement: A History of Architectural Preservation** Miles Glendinning,2013-01-17 Winner of the 2016 Antoinette Forrester Downing Award presented by the Society of Architectural Historians In many cities across the world particularly in Europe old buildings form a prominent part of the built environment and we often take it for granted that their contribution is intrinsically positive How has that widely shared belief come about and is its continued general acceptance inevitable Certainly ancient structures have long been treated with care and reverence in many societies including classical Rome and Greece But only in modern Europe and America in the last two

centuries has this care been elaborated and energised into a forceful dynamic ideology a Conservation Movement infused with a sense of historical destiny and loss that paradoxically shared many of the characteristics of Enlightenment modernity The close inter relationship between conservation and modern civilisation was most dramatically heightened in periods of war or social upheaval beginning with the French Revolution and rising to a tragic climax in the 20th century age of totalitarian extremism more recently the troubled relationship of heritage and global commercialism has become dominant Miles Glendinning s new book authoritatively presents for the first time the entire history of this architectural Conservation Movement and traces its dramatic fluctuations in ideas and popularity ending by questioning whether its recent international ascendancy can last indefinitely

Immaterial Architecture Jonathan Hill,2006-04-18 This fascinating argument from Jonathan Hill presents the case for the significance and importance of the immaterial in architecture Architecture is generally perceived as the solid physical matter that it unarguably creates but what of the spaces it creates This issue drives Hill s explorative look at the immaterial aspects of architecture The book discusses the pressures on architecture and the architectural profession to be respectively solid matter and solid practice and considers concepts that align architecture with the immaterial such as the superiority of ideas over matter command of drawing and design of spaces and surfaces Focusing on immaterial architecture as the perceived absence of matter Hill devises new means to explore the creativity of both the user and the architect advocating an architecture that fuses the immaterial and the material and considers its consequences challenging preconceptions about architecture its practice purpose matter and use This is a useful and innovative read that encourages architects and students to think beyond established theory and practice *Scene Design in the American Theatre from 1915 to 1960* Helen N. Larson,Orville Kurth Larson,1989-01-01 *Architecture, Actor and Audience* Iain Mackintosh,2003-09-02 Understanding the theatre space on both the practical and theoretical level is becoming increasingly important to people working in drama in whatever capacity Theatre architecture is one of the most vital ingredients of the theatrical experience and one of the least discussed or understood In *Architecture Actor and Audience* Mackintosh explores the contribution the design of a theatre can make to the theatrical experience and examines the failings of many modern theatres which despite vigorous defence from the architectural establishment remain unpopular with both audiences and theatre people A fascinating and provocative book
