Ecology of Vocation Kiara A. Jorgenson, 2020-05-15 Critically surveying various approaches to Christian ecological ethics alongside the vexing moral ambiguities of the Anthropocene Ecology of Vocation offers an integrative approach to responsible living vis vis one of Protestantism s key theological resources the doctrine of vocation Drawing on H Richard Niebuhr s germinal ethical framework with a decidedly ecofeminist perspective Kiara A Jorgenson demonstrates how vocation s emphasis on right relationship practically speaks to the embodied realities of planetary interrelatedness By excavating the ecological promise of the early Reformers democratized renderings of calling and linking their concerns to the contemporary context she argues that vocation cannot be reduced to the particular aim of monetized work nor to an elitist escape from it Rather vocation must be recast as the dynamic and vibrant space among the myriad roles any of us inhabits at any given time in a particular place When understood in this light vocation signals much

more than a job a passion or a quest for self discovery An alternative understanding of vocation s very ecology can extend Christian conceptions of the neighbor beyond the human and lead the church to more faithfully pursue lives characterized by humility restraint wisdom justice and love *New Publications* ,2000 Paul B. Thompson's Philosophy of Agriculture Samantha Noll,Zachary Piso,2024-01-01 This book explores the philosophical thought and praxis of Paul B Thompson who planted some of the first seeds of philosophy of agriculture and whose work inspires interdisciplinary scholarship in food ethics biotechnology and environmental philosophy Landmark texts such as *The Spirit of the Soil* *The Agrarian Vision* and *From Field to Fork* revealed the fertility of food systems for inspiring reflection on our relationships to technology the land and one another Rooted in philosophical traditions ranging from pragmatism to post phenomenology Thompson s work nourishes projects in ethics epistemology philosophy of science and social and political theory not only in academic philosophy departments but also in the social and natural sciences This volume collects this diversity of thought in a tour of the many fields of food systems from theorizing the sustainability of agroecological systems to appreciating the quotidian practice of agrarian communities to anticipating the impacts of emerging biotechnology and to savoring the roles that food plays in forming our identities Composed by an international crop of scholars working on the future of food ethics the volume is a vital contribution to scholars and practitioners thinking through our relationships to the food systems that sustain us
