*Rangelands of the Arid and Semi-arid Zones in Uzbekistan* Gustave Gintzburger, 2003 This abundantly illustrated book presents a panorama of the biodiversity climatology and flora of the arid zones of Uzbekistan and describes around 150 dominant range species with their ecology utilization and range rehabilitation techniques It should contribute to a better understanding of these little known arid zones of Central Asia and to the conservation and rational use of their fragile natural resources Environmental Consequences of War and Aftermath Tarek A. Kassim, Damià Barceló, 2009-04-07 and used in munitions Rather the requirements for the agent s military effects took precedence In addition the interaction among the political technical and legal challenges connected with the known or possible risks posed by CW agents is complex and sometimes not well understood This is usually because technical considerations when acted on are almost invariably informed by political ones such as various legal requirements The book contains nine chapters covering different aspects of the research on environmental consequences of war and its aftermath and covers in one additional chapter more general issues such as prevention of war and its environmental c sequences the legal political and technical background to selected environmental and human health effects of CW agents and the atmospheric transport and depo tion of persistent organic pollutants under warfare conditions to more specific ones related to two main tragic examples the war in the Balkans and the

Gulf War Aspects of the war in the Balkans cover contamination by heavy metals in Serbian national parks the impact of NATO strikes on the Danube river basin and the problems associated with transuranium elements The Gulf War in Kuwait covers other problems related to the impact of oil contamination the impact on ground water resources and the soil damage of ground fortifications among other environmental and health problems *Euphrates and Tigris, Mesopotamian Ecology and Destiny* J. RZÓSKA, 2012-12-06 Scope and limitations of this book I am trying here to present the natural history of a land largely created and dominated by two great rivers the Euphrates and Tigris All rivers have two main functions quite different from lakes they transport water and eroded material sometimes over large distances The astute Greeks who penetrated here in the 4th century B C called the land Mesopotamia an apt name it is the only region in the Near East except Egypt having the benefit of large rivers Another name coined in antiquity was Fertile Crescent stretching from Egypt to present day Iraq Herodotus marvelled at the fertility of the soils the abundance of water and the magnificent cities of Mesopotamia Thus a further role of some great rivers is recognized as foci of human development The desire to collate this book arose from a similar motif as in the Nile book 1976 the intricate connection between man and rivers *Rivers of the Sultan* Faisal H. Husain, 2021-03-05 In the early sixteenth century a series of military campaigns between the Mediterranean Sea and Persian Gulf brought the entirety of the Tigris and Euphrates rivers under Ottoman control This book offers a history of this rare political unification of the longest rivers in West Asia and its impact on the Ottoman state provincial society and the environment **Handbook of Plant Palaeoecology (First edition 2012)** René T. J. Cappers, Reinder Neef, 2012-01-06 Plant palaeoecologists use data from plant fossils and plant subfossils to reconstruct ecosystems of the past This book deals with the study of subfossil plant material retrieved from archaeological excavations and cores dated to the Late Glacial and Holocene One of the main objectives of this book is to describe the processes that underlie the formation of the archaeobotanical archive and the ultimate composition of the archaeobotanical records being the data that are sampled and identified from this immense archive Our understanding of these processes benefits from a knowledge of plant ecology and traditional agricultural practices and food processing This handbook summarizes the basic ecological principles that relate to the reconstruction of former vegetations and of agricultural practices in particular We hope this book will help palaeobotanists environmental archaeologists and colleagues from related disciplines optimize inferences based on what we could term old style archaeobotany And we hope that our observations will serve as an eye opener and improve future research not only as it is practised in our laboratories but also as it is practised in the field *Remote Sensing in Soil Science* M.A. Mulders, 1987-05-01 This book provides comprehensive coverage of remote sensing techniques and their application in soil science A clear step by step approach to the various aspects ensures that the reader will gain a good grasp of the subject so that he can apply the techniques to his own field of study The book opens with a thorough introduction to the physical aspects of electromagnetic radiation and the technical aspects of remote sensing and image processing This is

followed by a discussion of the methods for interpreting remote sensing data and their application to soils vegetation and land as a whole As the interpretation of soil conditions is based on many aspects i e soil surface vegetation land use land form the scope of the book is correspondingly broad It will therefore provide much useful information for students and scientists in soil science geography geology hydrology ecology agriculture and civil engineering *Halophytes and Biosaline Agriculture* Choukr-Allah,1995-09-13 Delineates the unique ability of halophytes to revegetate salt affected land Provides easy access to current information concerning the biology biogeography ecophysiology productivity and utilization of halophytes Offers a low cost approach to reclaiming and rehabilitating saline habitats previously regarded as useless **Semiarid Lands and Deserts** J. Skujins,1991-04-16 A compendium of current information on arid soils Provides a comprehensive background of the various soils and biota of arid regions as well as a detailed account of the current understanding of degradation processes and includes methodologies for arid land maintenance and rehabilitation and for *Middle East and North Africa*,2021-02-01 The volume Middle East and North Africa Climate Culture and Conflicts focuses on the intricate interrelationships between nature culture and society in this ecologically historically and politically fragile region As such it debates ideas of eco theology from Muslim and Jewish perspectives followed by mythological interpretations and geo archeological resp historical analyses of the interrelationships and impacts of climate and other environmental factors on the development of ancient civilizations and cultures The section Present addresses current conflict scenarios as a result of climate change i e water scarcity droughts desertification and similar factors The final section is concerned with potentials of international cooperation in pursuit of developing and ensuring sustainable energy resources and moves across different scales of environmental and religious education from awareness raising to perspectives of best practice examples Contributors are Katajun Amirpur Helmut Br ckner Eckart Ehlers Max Engel Kerstin Fritzsche Ursula Kowanda Yassin Tobias von Lossow Ephraim Meir Rosel Pientka Hinz Matthias Schmidt and Franz Trieb **Vegetation dynamics in grasslands, heathlands and mediterranean ligneous formations** P. back to 1982 when the Club du Sahel requested that available data on woody plants in the Sahel region be synthesised to provide basic information to enable better attention to be given to woody plants in rural development programmes We are grateful to the Club du Sahel for this challenge Various people contributed to studies used in this book The preliminary inventory of the data available was made by Frits Ohler later his work was continued by Franciska Dekker      **Range Management In Arid Zones** Samira A.S. Omar, Mohammed A. Razzaque, Fozia Almdirawi, 2014-09-19 First published in 1995 This title presents the proceedings of The Second International Conference on Range Management in the Arabian Gulf 1990 The objectives of the Conference were to evaluate progress made following the First Conference exchange information on range management development review advances in applicable technologies discuss potential strategies for range enhancement and assemble pertinent recommendations for enactment As such these proceedings will serve as a reference base for researchers professors lecturers and students alike both at advanced undergraduate and graduate levels      **Flora Of Eastern Saudi Arabia** James P. Mandaville, 2013-08-06 First published in 1990 A practical manual for identifying the plants of Saudi Arabia s Eastern Province This guide is useful for development and conservation of natural resources includes botanical terminology and so will appeal to those with this knowledge but also due to the colour plates to the non specialist who might be interested in desert wildflowers of the area
