Economic History And The Historian Collected Essays:

Economic History and the Historian Charles Wilson, 1969 *Economic History and the Historian* Charles Henry Wilson, 1969 *Economic History and the Historian Collected Essays* Ch Wilson, 1969 **Economics and the Historian** Thomas G. Rawski, 1996-03-03 Developing a dialogue between historians and economists is a crucially important task if we are to improve our understanding of the past Economists have the tools to be able to provide in depth analysis the historians have the meat and substance which is necessary and a blending of the two is terribly important Economics and the Historian is a valuable resource for this interchange Nobel Laureate Douglass C North author of *Institutions Institutional Change and Economic Performance* This is a superlative collection of essays for historians who would like to learn about economic history but lack much formal training in mathematics and economic theory The essays present fundamental concepts of economic analysis in a clear and concise manner and they show how these concepts can be applied to a variety of historical problems Ted W Margadant author of *Urban Rivalries in the French Revolution* This book is must reading for historians who want to know what there is in economics that might be useful for their fields Nobel Laureate Robert W Fogel author of *Time on the Cross* Introduces historians and history students to the concepts models and logic of economic theory and shows how economic analysis can be applied to solving historical puzzles and problems Each of the essays illuminates a different subfield of economics with numerous examples drawn from a quarter century of cliometrics This book will make basic tools of economic historical analysis accessible and at times even entertaining to students and colleagues who have little or no background in economics And it is guaranteed to enliven any course or seminar as it did mine John H Coatsworth author of *Central America and the United States* **Economic History and the Historian** Charles Wilson, 1969 **Society and Economy in Early Modern Europe, 1450-1789** Barry Taylor, 1989 *The Cambridge Economic History of Europe* M. M. Postan, E. E. Rich, 1952 **Venice as the Polity of Mercy** Richard MacKenney, 2018-12-21 This study re examines Venice s political economy from the viewpoint of its ordinary people or popolani who despite the commonly held view that they were excluded from political life by the nobility or nobili actually organized and ran for themselves hundreds of corporations within the city state Mercy was central to this popolani s Christian values and those who offered mercy to their fellow men and women in temporary hardship were investing in the expectation of reciprocity in their own time of need Beginning by tracing a formative linking of religion economy and polity from the thirteenth to the fifteenth centuries Venice as the Polity of Mercy then chronicles the collapse of this triad during the struggles between church and state in the mid sixteenth and seventeenth centuries followed by a revitalizing reconnection of economy and polity within a different religious climate after the plague of 1630 As such Richard Mackenney s book offers up a revitalized image of Renaissance Venetian society as dynamic rather than static as well as a new understanding of the city s significance through a reconfiguration of its history and artwork

Ethnic Groups and Marital Choices Madeline Kalbach, 2011-11-01 Since the late nineteenth century the rate of

intermarriage between members of different European ethnic and cultural groups in Canada has increased and resulted in a gradual blending of these communities This book the first detailed comparative study of ethno religious intermarriage provides the background for understanding the dynamics of intermarriage in a culturally pluralistic society like Canada Using for the first time data from the 1871 Census of Canada in conjunction with data from the 1971 Census Madeline Richard delineates the general patterns of ethnic intermarriage in 1871 and 1971 and specifically considers the trends for the English Irish Scotch French and Germans Choosing a number of characteristics such as level of literacy nativity age and place of residence for the husbands the author determines the odds for their marrying outside their communities She also examines the socio demographic characteristics such as group size sex ratio per cent urban and level of literacy of each group to determine the marriage patterns of the husbands Richard s findings confirm that marital assimilation was occurring to some extent as early as 1871 and that the rate of intermarriage has doubled since then Of particular interest are the major shifts exhibited by Irish Scottish and German husbands who in 1871 overwhelmingly married within their community while in 1971 they typically found their mates outside This book is not only about marital patterns it is also about the ethnic groups themselves It gives detailed descriptions of the English Irish Scottish French German Italian Dutch Polish Scandinavian Ukrainian and other groups their immigration history settlement patterns and socio demographic characteristics as these all have some bearing on patterns of mate selection

The Making of Modern Finance Samuel Knafo, 2013-07-03 The Making of Modern Finance is a path breaking study of the construction of liberal financial governance and demonstrates how complex forms of control by the state profoundly transformed the nature of modern finance Challenging dominant theoretical conceptions of liberal financial governance in international political economy this book argues that liberal economic governance is too often perceived as a passive form of governance It situates the gold standard in relation to practices of monetary governance which preceded it tracing the evolution of monetary governance from the late middle Ages to show how the 19th century gold standard transformed the way states relate to finance More specifically Knafo demonstrates that the institutions of the gold standard helped to put in place instruments of modern monetary policy that are usually associated with central banking and argues that the gold standard was a prelude to Keynesian policies rather than its antithesis The author reveals that these state interventions played a vital role in the rise of modern financial techniques which emerged in the late 18th and 19th century and served as the foundation for contemporary financial systems This book will be of strong interest to students and scholars of international political economy economic history and historical sociology It will appeal to those interested in monetary and financial history the modern state liberal governance and varieties of capitalism

The Low Countries History Yearbook 1982 J. De Belder, R. W. J. M. Bos, G. Teitler, C. B. Wels, C. Fasseur, A. Meynen, C. R. Emery, Johanna A. Kossmann, 2012-12-06 The present volume number 15 of the *Acta Historiae Neerlandicae* which have been appearing since 1978 under the title *The Low Countries History Yearbook* is the last of the series Economic reasons force the

publishers to discontinue it This is a matter for regret Both the editors of the Yearbook and the board of the Nederlands Historisch Genootschap under the auspices of which it has been published are convinced that the books serve a useful purpose We hope that in the future more favourable circumstances will enable Dutch and Flemish historians to start a second series We feel however that the Yearbook should not be allowed to disappear completely In our opinion one of its most attractive features has been the Survey of recent historical works on Belgium and the Netherlands published in Dutch It is the intention of the Nederlands Historisch Genootschap to seek means to continue this in another form probably in that of pamphlets appearing every two years and written by the same or a similar group of experts In that way we may be able to provide a useful service to our colleagues abroad

John Ruskin's Politics and Natural Law Graham A.

MacDonald, 2018-02-14 This book offers new perspectives on the origins and development of John Ruskin's political thought Graham A MacDonald traces the influence of late medieval and pre Enlightenment thought in Ruskin's writing reintroducing readers to Ruskin's politics as shaped through his engagement with concepts of natural law legal rights labour and welfare organization From Ruskin's youthful studies of geology and chemistry to his back to the land project the Guild of St George he emerges as a complex political thinker a reformer and what we would recognize today as an environmentalist John Ruskin's Politics and Natural Law is a nuanced reappraisal of neglected areas of Ruskin's thought

Britain's Political Economies

Julian Hoppit, 2017-05-03 The Glorious Revolution of 1688-9 transformed the role of parliament in Britain and its empire Large numbers of statutes resulted with most concerning economic activity Julian Hoppit here provides the first comprehensive account of these acts revealing how government affected economic life in this critical period prior to the Industrial Revolution and how economic interests across Britain used legislative authority for their own benefit Through a series of case studies he shows how ideas interests and information influenced statutory action in practice Existing frameworks such as mercantilism and the fiscal military state fail to capture the full richness and structural limitations of how political power influenced Britain's precocious economic development in the period Instead finely grained statutory action was the norm guided more by present needs than any grand plan with regulatory ambitions constrained by administrative limitations and some parts of Britain benefiting much more than others

INTRODUCTION This bibliographical article has been put together by members of the Dutch history seminar held at London University's Institute of Historical Research The article is intended for non Dutch reading scholars and indeed all who are interested in Netherlands history An attempt has been made and will continue to be made to survey important works published in the year previous to that in which the article is drawn up This year we have concerned ourselves with books or in the earlier part of 1971 *Encyclopedia of Historians and Historical Writing* Kelly Boyd, 2019-10-09 The *Encyclopedia of Historians and Historical Writing* contains over 800 entries ranging from Lord Acton and Anna Comnena to Howard Zinn and from Herodotus to Simon Schama Over 300 contributors from around the world have composed critical assessments of

historians from the beginning of historical writing to the present day including individuals from related disciplines like Jürgen Habermas and Clifford Geertz whose theoretical contributions have informed historical debate Additionally the *Encyclopedia* includes some 200 essays treating the development of national regional and topical historiographies from the Ancient Near East to the history of sexuality In addition to the Western tradition it includes substantial assessments of African Asian and Latin American historians and debates on gender and subaltern studies *Harmony and the Balance* Andrea Lynne

Finkelstein, 2009-12-21 Places the work of major economic writers of seventeenth century England within the broader context of the intellectual revolutions of the period *Imagined Histories* Anthony Molho, Gordon S. Wood, 2018-06-05 This collection of essays by twenty one distinguished American historians reflects on a peculiarly American way of imagining the past At a time when history writing has changed dramatically the authors discuss the birth and evolution of historiography in this country from its origins in the late nineteenth century through its present more cosmopolitan character In the book's first part concerning recent historiography are chapters on exceptionalism gender economic history social theory race and immigration and multiculturalism Authors are Daniel Rodgers Linda Kerber Naomi Lamoreaux Dorothy Ross Thomas Holt and Philip Gleason The three American centuries are discussed in the second part with chapters by Gordon Wood George Fredrickson and James Patterson The third part is a chronological survey of non American histories including that of Western

civilization ancient history the middle ages early modern and modern Europe Russia and Asia Contributors are Eugen Weber Richard Saller Gabrielle Spiegel Anthony Molho Philip Benedict Richard Kagan Keith Baker Joseph Zizak Volker Berghahn Charles Maier Martin Malia and Carol Gluck Together these scholars reveal the unique perspective American historians have brought to the past of their own nation as well as that of the world Formerly writing from a conviction that America had a singular destiny American historians have gradually come to share viewpoints of historians in other countries about which they write The result is the virtual disappearance of what was a distinctive American voice That voice is the subject of this book

2 result of the attitudes characteristic of the small group of permanent residents at the schools the academic scholars This conservatism however was not everywhere equally efficacious In the sixteenth century the universities of northern Italy Padua above all had nurtured an intellectual ferment of considerable significance to the rise of the new science and they continued to be penetrated by the influence of that science throughout the seventeenth century The University of Oxford momentarily played host to leading members of the English scientific community during the Commonwealth period and Cambridge was shortly to boast the genius of Isaac Newton Indeed a small number of the one hundred odd universities in Europe strove more or less purposefully to come to grips with the new science and to in at least within the body of learning for which they corporate facets of it 2 held themselves responsible Among the most notable of these more progressive schools must be included the University of Leiden recently founded by the Lowlanders in revolt against the King of Spain Philip II The doors of the University of Leiden had first opened to be sure in the midst of rebellion and had been forced open as it were by rumors of peace In 1572 the revolt with the Calvinists now clearly in the van acquired what was to prove an enduring foothold in the maritime provinces of Holland and Zeeland
