This work examines the system of co ordination of national social security laws in the European Union from a gender perspective The central question that it raises concerns the level of social security protection enjoyed by women moving throughout the Union in cases of work interruption or marriage dissolution Women's social security protection has traditionally been based on two criteria namely economic activity and family marriage Work interruptions in particular for child rearing challenge the invocation of economic activity as an effective basis for social security rights Changing social and family conditions including the emergence of atypical relationships and increasing divorce rates challenge the criterion of family marriage Efforts have been made within the framework of the national systems of the Member States to address these challenges often unsuccessfully So how successful has the European system of co ordination the aim of which is to provide a sufficient level of protection to migrant workers and their families been in addressing these challenges The book contains comprehensive discussion of the phenomenon and legal institution of social security as well as a thorough analysis of the current state of European Community law concerning co ordination with a particular focus on gender It identifies several problematic areas where solutions must be worked out and action taken The book fills a gap in the legal literature on the social security field and will appeal to those with an interest in social security including academics policy makers and practitioners

Market Rules Douglas Brown, 2003 Federalism is about dividing and sharing government often in complex ways that involve some tasks being done jointly Are federal systems capable of effective joint policy making Is this possible in the fast moving context of globalization In Market Rules Douglas Brown examines these questions through a comparative study of Australia and Canada looking at recent major reforms to the economic union in the two federations and comparing them with the evolving European Union EU Brown argues that internal barriers to trade and competition in these

countries were significant obstacles to competition in the global economy and shows that the old market rules were rooted in longstanding political and regional compromises. He describes the process of detailed and difficult intergovernmental collaboration required for the EU and now Canada and Australia to produce new market rules. The resulting reforms created new regimes that provide deeper and broader national economic integration in Canada and Australia than in the EU. The new rules entrench neo liberal values retaining some room for diversity and flexibility for equity goals. Built on a careful analysis of the differences and similarities in political economy, constitutional design, federal culture and history of intergovernmental relations in Canada and Australia, *Market Rules* provides fresh evidence that federal states can be strong and autonomous in the global society while underscoring the conditions for effective collaboration that make this sustainable. Rich in detail, broad in scope, *Market Rules* makes a significant contribution to knowledge about federalism and economic policy making in the era of globalization.
