MERCOSUR in the Americas SADC SACU and ECOWAS in Africa and the European Union EFTA and Eastern Europe The book argues that foreign direct investment is complementary to trade and most regional arrangements can create trade and induce growth so long as they remain open and non discriminatory But they could also become stumbling blocks to globalization The book demonstrates how US and EU trade policy will be crucial in shaping the world economy *Migration and Development in Southern Africa* K. Regional Economic Institutions and Conflict Mitigation Yoram Z. Haftel, 2012-05-21 Economic integration fosters regional peace The Geopolitics Of Southern Africa Kent H Butts, Paul R Thomas, 2019-07-09

South Africa is the dominant force in an area that is of increasing strategic importance to the West yet few studies address the geopolitical pressures that dictate the course of events there Analyzing South Africa's base of power the authors argue that because South Africa's relationships with other states in Southern Africa are asymmetrical in nature the country has substantial economic and political leverage in the region Control of Southern Africa's transport infrastructure and the ability to project a conventional or surrogate military presence throughout the region for example gives South Africa the power to affect the economic and political stability of virtually all regional states Asymmetry also characterizes relationships at the global level Because the West depends upon South Africa for access to the region's strategic minerals for the security of the Cape oil route and for the country's ability to counterbalance the Soviet presence in Southern Africa South Africa exercises considerable influence over the African foreign policies of the superpowers Focusing on the major geopolitical variables affecting South Africa's ability to sustain power the authors analyze the economic and geographic factors that contribute to asymmetrical relationships and examine the pluralism that divides South African society Pretoria's successful foreign policy which has created a security corridor of new buffer states is given particular emphasis In addition the authors provide a detailed analysis of South Africa's minerals based economy and discuss the implications for regional stability of economic sanctions against South Africa Finally they outline a policy framework that takes regional economic political and geographic realities into account

South Africa and Africa Adebayo Adedeji, 1996 The New Democratic South Africa led by the African National Congress is in the process of making fundamental choices Will South Africa's future be one where the needs of the majority population are at last addressed A future where its hegemonic relations with neighbouring states are restructured in an equitable direction A future where South Africa stands up for its own interests and those of Africa Or alternatively will the new leadership become distanced from its popular roots and pushed into a globalizing perspective which marginalizes its own immiserated classes and an immiserated continent These are some of the inter related questions which the contributors to this volume South African African and Western scholars and participants in the process explore In a context which portrays the current state of Africa's

political economy and the legacy of apartheid within South Africa itself the political security and in particular economic dimensions of South Africa's present and possible future relations with the rest of the Continent are examined This book's wealth of concrete information cogent analysis and informed clarification of the choices available make it a valuable policy relevant contribution It also marks the start of ACDESS's ambitious research programme on this theme

A Strategic Vision for Africa Francis M. Deng, I. William Zartman, 2004-06-23 Increasingly marginalized since the end of the Cold War the continent of Africa is struggling to identify both the root causes and possible solutions to the maladies that continue to plague it The problems read like a laundry list of misrule in the aftermath of decolonization rampant political corruption internecine wars widespread disease underdevelopment and economic collapse In the early 1990s a group of statesmen academics and civil leaders from all over Africa gathered to put together a comprehensive plan to make the continent become less dependent on the rest of the world and prepare it to compete in the new globalizing economy Those who gathered to write what would come to be known as the Kampala Document envisioned an organization which would succeed where the Organization for African Unity OAU had failed This new organization the Conference on Security Stability Development and Cooperation in Africa CSSDCA will provide a forum for discussion of democratization security issues and sustainable development This new book by noted scholars Francis Deng and I William Zartman provides a mid course appraisal of the progress of the CSSDCA as well as charting its future in relation to other regional organizations With a preface by President Olusegun Obasanjo this book will undoubtedly become an important tool in understanding Africa's present and future Francis Deng is a nonresident senior fellow in the Foreign Policy Studies program at the Brookings Institution His books include *Masses in Flight The Global Crisis of Internal Displacement* Brookings 1998 with Roberta Cohen *The Forsaken People Case Studies of the Internally Displaced* Brookings 1998 co edited with Roberta Cohen I William Zartman is Jacob Blaustein Professor of International Organizations and Conflict Resolution and Director of African Studies at the Paul H Nitze School of Advanced International Studies
