Binchy,1960 **Planning and Budgeting in Poor Countries** Naomi Caiden,Aaron B. Wildavsky,1980-01-01 This substantial treatment of budgeting in poor countries and discussion of the relationship between planning and budgeting covers over eighty nations and three fourths of the worlds population While there are many treatments of planning the approach of this study is radically different The authors argue that the requisites of comprehensive economic planning do not exist in poor countries and that in the effort to create them planners merge into the environment they have set out to change Caiden and Wildavsky provide a unique and thorough examination of planning and budgeting by governments of poor countries throughout the world and recommend reforms that are workable and realistic for these countries They analyze the political economic and social developments that influence budgeting and planning in developing countries *Problems and Processes of Economic Planning in Underdeveloped Economics (with Special Reference to India)*. H. C. Gupta,1958 **The Three Laws of International Investment** Jeswald W. Wilber,2018-06-15 This book constructs the model of economic development implicit in the historical experience of the Soviet Union and the agricultural industrial and social strategies followed are shown to fit into a logical and coherent pattern Those strategies are then evaluated for the positive and negative answers they hold for underdeveloped countries today Originally published 1969 A UNC Press Enduring Edition UNC Press Enduring Editions use the latest in digital technology to make available again books from our distinguished backlist that were previously out of print These editions are published unaltered from the original and are presented in affordable paperback formats bringing readers both historical and cultural value **External Research List** ,1959 **Liberalization in the Process of Economic Development** Lawrence B. Krause,Kim Kihwan,2023-11-15 Economic growth in all developing countries is guided and often accelerated by generally intrusive policies implemented by governments intent on playing an active role in furthering development As economies have grown and become more complex however even small market distortions are magnified and the tendency is to rely more heavily on the market for continued growth In this volume leading experts in economic development examine the variety of issues that arise as governments in some of the newly industrializing countries of Southeast Asia such as South Korea Taiwan and Singapore grapple with this difficult process of liberalization This title is part of UC Press s Voices Revived program which commemorates University of California Press s mission to seek

out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 *Voices Revived* makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1991 **Development Administration and Assistance** Richard W. Gable,1963 **Capital Exports to Less Developed Countries** W. Guth,2013-03-09 There is little need today for an author publishing a work on less developed countries to emphasise the importance of this question In view of the large and increasing number of publications on this subject and in fairness to the reader it seems appropriate however to outline briefly what the book sets out to describe As the title conveys I have concentrated on the financial side of the problem without neglecting altogether the important political social and human aspects I have primarily dealt with the problems of capital formation capital transfer capital employment and the associated balance of payments considerations The attempt is made to set out in an integrated analysis the problems of capital exports to less developed countries both from the point of view of the creditor and of the debtor be they countries or individuals This method appeared all the more appropriate since the provision of long term funds for capital exports and the question of their employment in the capital importing countries are so closely interconnected that they could hardly be treated separately *Research on International Affairs* United States.
