Rohan, 2014-07-10 Equally admired and maligned

for his remarkable Brutalist buildings, Paul Rudolph (1918-1997) shaped both late modernist architecture and a generation of architects while chairing Yale's department of architecture from 1958 to 1965. Based on extensive archival research and unpublished materials, *The Architecture of Paul Rudolph* is the first in-depth study of the architect neglected since his postwar zenith. Author Timothy M. Rohan unearths the ideas that informed Rudolph's architecture, from his Florida beach houses of the 1940s to his concrete buildings of the 1960s to his lesser-known East Asian skyscrapers of the 1990s. Situating Rudolph within the architectural discourse of his day, Rohan shows how Rudolph countered the perceived monotony of mid-century modernism with a dramatically expressive architecture for postwar America, exemplified by his Yale Art and Architecture Building of 1963, famously clad in corrugated concrete. The fascinating story of Rudolph's spectacular rise and fall

considerably deepens longstanding conceptions about postwar architecture. Rudolph emerges as a pivotal figure who anticipated new directions for architecture, ranging from postmodernism to sustainability *Hocker* Hocker, 2020-09-15 A visually stunning overview of the work of internationally recognized award-winning landscape architecture studio Hocker, whose thoughtfully conceived projects reveal a deep understanding of environment and materials and express a strikingly contemporary point of view. This monograph is the first to present the work of the award-winning Texas-based but internationally recognized landscape architecture studio Hocker. Founded in 2005 by David L. Hocker, the studio has over fifteen years of practice, earned wide acclaim for projects that are meticulously detailed, evince a superlative understanding of

materials thoughtfully address environmental context and promote an arrestingly contemporary aesthetic Hocker's work and the fifteen projects featured in the book represent a range of typologies from residential gardens to urban parks Among them are landscapes for a weekend retreat in the Sonoma Hills winner of the 2019 ASLA Award of Excellence a former power station turned contemporary art center winner of a 2016 ASLA Honor Award the revitalized Dallas Museum of Art winner of a 2017 ASLA Texas Chapter Merit Award a historic synagogue and a Cistercian abbey and preparatory school Equipped with the knowledge necessary to confront complex environmental and programmatic challenges Hocker nevertheless approaches each project with the ambition of creating spaces that are simple and restrained but beautiful and engaging

Loeffler, 1998-07 The Architecture of Diplomacy reveals the complex interplay of architecture politics and power in the history of America's embassy building program Through colorful personalities bizarre episodes and high drama this compelling story takes readers from scandalous inspection junkets by members of Congress to bugged offices at the Moscow embassy to the daring rescue of American personnel in Somalia by Marines and Navy Seals Rigorously researched and lucidly written The Architecture of Diplomacy focuses on the embassy building program during the Cold War years when the United States initiated a massive construction campaign that would demonstrate its commitment to its allies and assert its presence as a superpower
