Libraries, University of Kansas, 1984 **Bulletin of the New York Public Library** New York Public Library, 1929 Includes its Report 1896-19 **Reflections on the Future of Capitalism** Ramesh Chandra, 2024-06-04 This book explores the ideas of nine renowned economists to present the evolution of economic thought on the development and trajectory of capitalism as a system. The author shows how this diverse group of thinkers are linked by their thinking on the future role of capitalism in society and fleshes out the influences informing each economist's work. With chapters dedicated to Karl Marx, Joseph Schumpeter, Thorstein Veblen, Henry George, Gunnar Myrdal, Alfred Marshall, Allyn Young, J. M. Keynes, and Amartya Sen, the book aims to analyse contrasting views on the future of capitalism in historical perspective and make a critical assessment of their insights in contemporary contexts. While considering the views of some thinkers such as Marx, Schumpeter, and Veblen, who critiqued capitalism, the book does not view capitalism beyond redemption nor is meant to be a critique of capitalism in its conclusions. Rather, it argues that thinkers like Marshall, Myrdal, Young, and Keynes were more right in their optimism about the future prospects of capitalism than many others. It argues that capitalism can be reformed through the democratic process in a more humane direction. This can happen if democracy works for all and if discriminating privileges and crony capitalism are eschewed. This book is valuable reading for scholars and students of economic history and the history of economic thought. **The Economic Reader** Massimo M. Augello, Marco Enrico Luigi Guidi, 2012 The book studies the origins and evolution of economic textbooks in the nineteenth and early twentieth century up to the turning point represented by Paul Samuelson's *Economics* 1948, which became the template for all the textbooks of the postwar period. The case studies included in the book cover a large part of Europe, the British Commonwealth, the United States, and Japan. Each chapter examines various types of textbooks from those aimed at self-education to those addressed to university students, secondary school students, to the short manuals aimed at the popularisation of political economy among workers and the middle classes. An introductory chapter examines this phenomenon in a comparative and transnational perspective.
